Second Quarter Report 2011

QUARTERLY MANAGEMENT'S DISCUSSION AND ANALYSIS

UNITED STATES GAAP

(all figures are expressed in US dollars unless otherwise noted and all units of measurement expressed in metric unless otherwise noted)

Results of Operations

Agnico-Eagle Mines Limited ("Agnico-Eagle" or the "Company") reported second quarter net income of \$68.8 million, or \$0.41 per share, compared to net income of \$100.4 million, or \$0.64 per share, in the second quarter of 2010. In the second quarter of 2011, the operating margin increased 22.1% to \$220.9 million from \$180.9 million in the second quarter of 2010 due to the increase in gold price. Gold production in the second quarter of 2011 decreased by 7.1% to 239,328 ounces from 257,728 ounces in the second quarter of 2010. Cash provided by operating activities was \$162.8 million in the second quarter of 2011 compared to cash provided from operating activities of \$161.6 million in the prior year's second quarter. During the second quarter of 2011, cash costs amounted to \$565 per ounce compared to \$482 per ounce during the same period in the previous year.

The table below summarizes the key variances in net income for the second quarter of 2011 from the net income reported for the same period in 2010:

(millions of dollars)	Second Quarter	Year to Date
Increase in gold		
revenue	\$ 57.7	\$ 216.8

In the second quarter of 2011, revenues from mining operations increased to \$433.7 million from \$347.5 million in the second quarter of 2010. This was mainly due to higher prices for all metals, especially gold and silver prices.

In the second quarter of 2011, total cash costs per ounce increased to \$565 per ounce of gold produced from \$482 per ounce in the second quarter of 2010. This increase in total cash costs is mainly attributable to the unfavourable cash costs at the Meadowbank and Kittila Mines. The Meadowbank Mine has continued to ramp-up to achieve steady state production (expected to be in the latter half of 2011 following the commissioning and installation of a new crusher). Kittila experienced higher cash costs during the second quarter of 2011 due to an unscheduled maintenance shutdown during the quarter.

During the second quarter of 2011, production costs increased to \$212.8 million from \$166.6 million in the second quarter of 2010 mainly due to general cost increases in the industry and the stronger Canadian dollar.

During the second quarter of 2011, there was a non-cash foreign currency translation loss of \$2.7 million due to the strengthening of the Canadian dollar against the US dollar. Also during the second quarter, income and mining taxes increased to \$35.9 million from \$8.2 million in the second quarter of 2010 mainly due to the Company's election to commence using the US dollar as its functional currency for Quebec income tax purposes in 2010.

During March of 2011, the kitchen facilities to support the employee camp at the Meadowbank Mine sustained extensive damage as a result of a fire. The fire was contained to the kitchen and there were no injuries sustained. A temporary kitchen has been installed and the number of on-site employees have now been normalized. The Company is in the process of recovering property damage and business interruption losses. Property damage receivables from the insurance company have been recognized, however, the determination of the business interruption insurance claim is in process and no receivable in this regard was recognized as at June 30, 2011.

The following tables provide a reconciliation of the total cash costs per ounce of gold produced and mine site costs per tonne to the interim consolidated financial statements for the LaRonde, Goldex, Lapa, Kittila, Pinos Altos and Meadowbank mines:

Notes:

- (i) Under the Company's revenue recognition policy, revenue is recognized on concentrates when legal title passes. Since total cash costs per ounce are calculated on a production basis, this inventory adjustment reflects the sales margin on the portion of concentrate production for which revenue has not been recognized in the period.
- (ii) The Company has decided to report total cash costs per ounce using the more common industry practice of deferring certain stripping costs that can be attributed to future production. The methodology is in line with the Gold Institute Production Cost Standard. The purpose of adjusting for these stripping costs is to enhance the comparability of cash costs to the majority of the Company's peers within the mining industry. The previous period's cash costs have been adjusted for comparability purposes.
- Total cash costs per ounce is not a recognized measure under US GAAP and this data (iii) may not be comparable to data presented by other gold producers. The Company believes that this generally accepted industry measure is a realistic indication of operating performance and is useful in allowing year over year comparisons. This measure is calculated by adjusting Production Costs as shown in the Consolidated Statements of Income and Comprehensive Income for net byproduct metals revenues, stripping costs, royalties, inventory adjustments and asset retirement provisions. This measure is intended to provide investors with information about the cash generating capabilities of the Company's mining operations. Management uses this measure to monitor the performance of the Company's mining operations. Since market prices for gold are quoted on a per ounce basis, using this per ounce measure allows management to assess a mine's cash generating capabilities at various gold prices. Management is aware that this per ounce measure of performance can be impacted by fluctuations in byproduct metal prices and exchange rates. Management compensates for the limitation inherent with this measure by using it in conjunction with the minesite costs per tonne measure (discussed below) as well as other data prepared in accordance with US GAAP. Management also performs sensitivity analyses in order to quantify the effects of fluctuating metal prices and exchange rates.
- (iv) This inventory adjustment reflects production costs associated with unsold concentrates.
- Minesite costs per tonne is not a recognized measure under US GAAP and this data (v) may not be comparable to data presented by other gold producers. This measure is calculated by adjusting Production Costs as shown in the Consolidated Statements of Income and Comprehensive Income for inventory and hedging adjustments, stripping costs and asset retirement provisions and then dividing by tonnes processed through the mill. Since total cash costs per ounce data can be affected by fluctuations in byproduct metal prices and exchange rates, management believes minesite costs per tonne provides additional information regarding the performance of mining operations and allows management to monitor operating costs on a more consistent basis as the per tonne measure eliminates the cost variability associated with varying production levels. Management also uses this measure to determine the economic viability of mining blocks. As each mining block is evaluated based on the net realizable value of each tonne mined, in order to be economically viable the estimated revenue on a per tonne basis must be in excess of the minesite costs per tonne. Management is aware that this per tonne measure is impacted by fluctuations in production levels and thus uses this evaluation tool in conjunction with production costs prepared in accordance with US GAAP. This measure supplements production cost information prepared in accordance with US GAAP and allows investors to distinguish between changes in production costs resulting from changes in production versus changes in operating performance.

Liquidity and Capital Resources

capital was \$434.1 million. At December 31, 2010, the Company had \$104.6 million in cash, cash equivalents, short-term investments and restricted cash and \$370.9 million in working capital. The Company's policy is to invest excess cash in highly liquid investments of the highest credit quality to eliminate any risks associated with these investments. Such investments with remaining maturities at time of purchase

greater than three months are classified as short-term investments and decisions regarding the length of maturities are based on cash flow requirements, rates of returns and various other factors.

Cash provided by operating activities was \$162.8 million in the second quarter of 2011 compared to cash provided by operating activities of \$161.6 million in the second quarter of 2010. In the second quarter of 2011, revenues from mining operations increased to \$433.7 million from \$347.5 million in the second quarter of 2010. This was mainly due to higher gold and silver prices.

For the three months ended June 30, 2011, capital expenditures were \$114.4 million compared to \$117.0 million in the three months ended June 30, 2010. The significant capital expenditures during the second quarter of 2011 pertained to sustaining capital for the Company's six operating mines, construction of the dyke and crusher at the Meadowbank Mine, construction of the LaRonde depth extension and costs relating to the development of the Meliadine Project.

During the second quarter of 2010, the Company closed a private placement of notes consisting of \$600 million of guaranteed senior unsecured notes due 2017, 2020 and 2022 with a weighted average maturity of 9.84 years and weighted average yield of 6.59%. The net proceeds from the sale of the notes were used to reduce amounts outstanding under the Company's credit lines during the second quarter of 2010. Also during the second quarter of 2010, the Company increased and extended its credit facility to \$1.2 billion. The amended facility has lower standby-fees and draw spreads and matures in June 2014. At June 30, 2011, the remaining outstanding balance owing on the bank facility amounts to nil.

Subsequent to period end, on July 27, 2011, the Company made a strategic investment in Rubicon Metals Corporation ("Rubicon") in a non-brokered private placement for cash consideration of C\$70 million or C\$3.23 per share. After closing the transaction, the Company's interest in Rubicon is 21.671.827 shares.

In addition, subsequent to period end, on July 27, 2011 the Company amended and restated its credit facility to extend the scheduled maturity date from June 22, 2014 to June 22, 2016. Terms related to standby fees and drawn amounts were reduced to reflect current market conditions.

Volatility remains high in global financial markets and weakness in the global economy continues to have a serious impact on the profitability and liquidity of many businesses. Although there are signs of stabilization, the timing of a return to historical market conditions is uncertain. Virtually all industries, including the gold mining business, have been affected by weak economic conditions and volatile financial markets. Positive signs for the global economy include a relative easing of credit risk spreads, a reduction in financial systemic risk, lower levels of volatility in many markets and an improvement in investor confidence. However, economic data show mixed signals for the likelihood of sustained near-term economic recovery, and the costs of funding for many businesses, especially for financial institutions with which we do business, remain high compared to historical levels. A prolonged global recession and continuation of volatility in world markets could have a significant impact on our business. In particular, the global credit/liquidity crisis could continue to affect the cost and availability of financing and our overall liquidity. The volatility in gold, silver, zinc and copper prices affects the amount of our revenues, and our earnings and cash flow. Volatile energy prices, commodity and consumables prices and currency exchange rates impact our production costs. The volatility of global stock markets impacts the valuation of our equity investments. The recent economic turmoil in Europe will compound the global volatility issues.

Disclosure Controls and Procedures and Internal Controls Over Financial Reporting

Pursuant to regulations adopted by the US Securities and Exchange Commission, under the Sarbanes-Oxley Act of 2002 and those of the Canadian Securities Administrators, the Company's management evaluates the effectiveness of the design and operation of the Company's disclosure controls and procedures, and internal controls over financial reporting. This evaluation is done under the supervision of, and with the participation of, the Vice-Chairman and Chief Executive Officer ("CEO") and the Senior Vice-President, Finance and Chief Financial Officer ("CFO").

As of the end of the period covered by this MD&A and accompanying unaudited consolidated financial statements, the Company's management evaluated the effectiveness of its disclosure controls. Based on that evaluation, the CEO and the CFO have concluded that the Company's disclosure controls and procedures were

effective to provide reasonable assurance that the information required to be disclosed by the Company in reports it files was recorded, processed, summarized and reported, within the appropriate time periods.

Management of the Company, with the participation of the CEO and the CFO, are responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal controls over financial reporting are designed to provide reasonable assurance regarding the reliability of financial reporting and preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. There have been no significant changes in the Company's internal control over financial reporting in Q2 2011 that have materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

The Company's management including the CEO and the CFO believe that any disclosure controls and procedures and internal controls over financial reporting, no matter how well designed, can have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance that the objectives of the control system are met.

Other

The above items contained within the Management Discussion and Analysis have been prepared as of August 12, 2011 and should be read in conjunction with our interim unaudited Consolidated Financial Statements and the notes thereto included in this quarterly report. Information pertaining to new accounting pronouncements can also be obtained within our interim unaudited Consolidated Financial Statements and notes. Additionally, the above discussion and analysis should be read in conjunction with Management's Discussion and Analysis and the Consolidated Financial Statements included in our Annual Report on Form 20-F for the year ended December 31, 2010. Other information regarding critical accounting estimates and risk factors are also available in the Company's Annual Report on Form 20-F.

Notes:

⁽¹⁾ Payable mineral production means the quantity of mineral produced during a period contained in products that are or will be sold by the Company, whether such products are sold during the period or held as inventory at the end of the period.

⁽²⁾ Total cash costs per ounce is a non-US GAAP measure of performance that the Company uses to monitor the performance of its operations. See "Results of Operations — Production Costs".

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(thousands of United States dollars except share and per share amounts, unless otherwise indicated)
(Unaudited)
June 30, 2011

1. BASIS OF PRESENTATION

The accompanying unaudited interim consolidated financial statements of Agnico-Eagle Mines Limited ("Agnico-Eagle" or the "Company") have been prepared in accordance with United States generally accepted accounting principles ("GAAP") in US dollars. They do not include all of the disclosures required by GAAP for annual financial statements. Accordingly, these unaudited interim consolidated financial statements should be read in conjunction with the fiscal 2010 annual consolidated financial statements, including the accounting policies and notes thereto, included in the Annual Report and Annual Information Form/Form 20-F for the year ended December 31, 2010. In the opinion of management, the unaudited interim consolidated financial statements reflect all adjustments, which consist only of normal and recurring adjustments necessary to present fairly the financial position as at June 30, 2011 and the results of operations and cash flows for the three and six months ended June 30, 2011 and 2010.

Operating results for the three and six months ended June 30, 2011 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2011.

2. USE OF ESTIMATES

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Management believes that the estimates used in the preparation of the interim consolidated financial statements are reasonable and prudent; however, actual results could differ from these estimates.

3. ACCOUNTING POLICIES

These interim consolidated financial statements follow the same accounting policies and methods of their application as the December 31, 2010 audited annual consolidated financial statements except for the changes discussed below.

Recently Adopted Accounting Pronouncement

Fair Value Accounting

In January 2010, the Financial Accounting Standards Board ("FASB") guidance for fair value measurements and disclosures was updated to require additional disclosures. The updated guidance was effective for the Company's fiscal year beginning January 1, 2010, with the exception of the level 3 disaggregation which was effective for the Company's fiscal year beginning January 1, 2011. Adoption of this updated guidance had no impact on the Company's financial position, results of operation or cash flows. See Note 4 for details regarding the Company's assets and liabilities measured at fair value.

Business Combinations

In December 2010, the Accounting Standards Codification ("ASC") guidance for business combinations was updated to clarify existing guidance which requires a public entity to disclose pro forma revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual period only. The update also expands the supplemental pro forma disclosures required to include a description of the nature and amount of material, non-recurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. Adoption of this updated guidance, effective for the Company's fiscal year beginning January 1, 2011, had no impact on the Company's financial position, results of operations or cash flows.

 $Revenue\ Recognition -- Multiple-Deliverable\ Revenue\ Arrangements$

In October 2009, the FASB issued an amendment to its guidance on multiple-deliverable revenue arrangements which is effective for fiscal years beginning on or after June 15, 2010. This updated guidance addresses accounting and reporting for arrangements under which the vendor will perform multiple revenue-generating activities, including how to separate deliverables and measure and allocate the arrangement consideration. This amendment also significantly expands the disclosure requirements related to a vendor's multiple-deliverable revenue arrangement. Based on the Company's assessment, these changes did not have an impact on its current accounting for revenue or required disclosures.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(thousands of United States dollars except share and per share amounts, unless otherwise indicated)
(Unaudited)
June 30, 2011

3. ACCOUNTING POLICIES (Continued)

Recently Issued Accounting Pronouncements

Comprehensive Income

In June 2011, ASC guidance was issued related to comprehensive income. Under the updated guidance, an entity will have the option to present the total of comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In addition, the update requires certain disclosure requirements when reporting other comprehensive income. The update does not change the items reported in other comprehensive income or when an item of other comprehensive income must be reclassified to income. The update is effective for the Company's fiscal year beginning January 1, 2012. The Company does not expect the updated guidance to have an impact on the consolidated financial position, results of operations or cash flows.

Fair Value Accounting

In May 2011, ASC guidance was issued related to disclosures around fair value accounting. The updated guidance clarifies different components of fair value accounting including the application of the highest and best use and valuation premise concepts, measuring the fair value of an instrument classified in a reporting entity's shareholders' equity and disclosing quantitative information about the unobservable inputs used in fair value measurements that are categorized in level 3 of the fair value hierarchy. The update is effective for the Company's fiscal year beginning January 1, 2012. The Company does not expect the updated guidance to have a significant impact on the consolidated financial position, results of operations or cash flows.

4. FAIR VALUE MEASUREMENT

ASC 820 — Fair Value Measurement and Disclosure defines fair value, establishes a framework for measuring fair value under GAAP, and requires expanded disclosures about fair value measurements. The three levels of the fair value hierarchy under the Fair Value Measurements and Disclosure Topic of the FASB Accounting Standards Codification are as follows:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 — Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3 — Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Fair value is the value at which a financial instrument could be closed out or sold in a transaction with a willing and knowledgeable counterparty over a period of time consistent with the Company's investment strategy. Fair value is based on quoted market prices, where available. If market quotes are not available, fair value is based on internally developed models that use market-based or independent information as inputs. These models could produce a fair value that may not be reflective of future fair value.

The following table sets forth the Company's financial assets and liabilities measured at fair value within the fair value hierarchy.

	Total	Level 1	Level 2	Level 3
Financial assets:				
Cash equivalents, and short-term investments (1)	\$ 6,811	\$ —	\$ 6,811	\$ —
Available-for-sale securities (2)(3)	100,654	92,401	8,253	_
Trade receivables (4)	64,821	_	64,821	_
Derivative assets (3)	2,148	_	2,148	_
	\$ 174,434	\$ 92,401	\$ 82,033	\$
Financial liabilities:				
Derivative liabilities ⁽³⁾				

(1) Fair value approximates the carrying value due to the short-term nature.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(thousands of United States dollars except share and per share amounts, unless otherwise indicated)
(Unaudited)
June 30, 2011

4. FAIR VALUE MEASUREMENT (Continued)

- (2) Recorded at fair value using quoted market prices.
- (3) Recorded at fair value based on broker-dealer quotations
- (4) Trade receivables from provisional invoices for concentrate sales are included within Level 2 as they are valued using quoted forward rates derived from observable market data on the month of expected settlement.

Both the Company's cash equivalents and short-term investments are classified within Level 2 of the fair value hierarchy because they are held to maturity and are valued using interest rates observable at commonly quoted intervals. Cash equivalents are market securities with remaining maturities of three months or less at the date of purchase. The short-term investments are market securities with remaining maturities of over three months at the date of purchase.

The Company's available-for-sale securities are recorded at fair value using quoted market prices or broker-dealer quotations. The Company's available-for-sale securities that are valued using quoted market prices are classified as Level 1 of the fair value hierarchy. The Company's available-for-sale securities classified as Level 2 of the fair value hierarchy consist of equity warrants, which are recorded at fair value based on broker-dealer quotations.

In the event that a decline in the fair value of an investment occurs and the decline in value is considered to be other-than-temporary, an impairment charge is recorded in the interim consolidated statements of income and a new cost basis for the investment is established. The Company assesses whether a decline in value is considered to be other-than-temporary by considering available evidence, including changes in general market conditions, specific industry and individual company data, the length of time and the extent to which the fair value has been less than cost, the financial condition and the near-term prospects of the individual investment. New evidence could become available in future periods which would affect this assessment and thus could result in material impairment charges with respect to those investments for which the cost basis exceeds its fair value.

5. SHAREHOLDERS' EQUITY

During the three months ended March 31, 2009, the Company implemented a restricted share unit plan for certain employees. A deferred compensation balance was recorded for the total grant-date value on the date of the grant. The deferred compensation balance was recorded as a reduction of shareholders' equity and is being amortized as compensation expense (or capitalized to construction in progress) over the applicable vesting period.

During the three months ended March 31, 2011, the Company funded the plan by transferring \$3.7 million (2010 — \$4.0 million) to an employee benefit trust (the "Trust") that then purchased shares of the Company in the open market. The Trust is funded once per year during the first quarter of each year. For accounting purposes, the Trust is treated as a variable interest entity and consolidated in the accounts of the Company. On consolidation, the dividends paid on the shares held by the Trust were eliminated. The shares purchased and held by the Trust are treated as not being outstanding for the basic earnings per share ("EPS") calculations. They are amortized back into basic EPS over the vesting period. All of the shares held by the Trust were included in the diluted EPS calculations.

The following table presents the maximum number of common shares that would be outstanding if all instruments outstanding at June 30, 2011 were exercised:

Common shares outstanding at June 30, 2011	169,141,820
Employees' stock options	9,047,351
Warrants	8,600,000
Restricted share unit plan	65,941
	186,855,112

During the six months ended June 30, 2011, 2,593,785 (2010 - 2,795,080) options were granted with an exercise price of C\$76.46 (2010 - C\$57.05), 217,388 (2010 - 285,373) employee stock options were exercised for cash of \$8.9 million (2010 - \$9.5 million), and 91,750 (2010 - 53,050) options were cancelled with a weighted average exercise price of C\$66.87 (2010 - C\$55.70).

During the three months ended June 30, 2011, 19,000 (2010 — 40,000) options were granted with an exercise price of C\$63.39 (2010 — C\$63.70), 53,169 (2010 — 226,048) employee stock options were exercised for cash of \$2.1 million (2010 — \$8.2 million), and zero (2010 — 42,500) options were cancelled with a weighted average exercise price of nil (2010 — C\$57.14).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(thousands of United States dollars except share and per share amounts, unless otherwise indicated)
(Unaudited)
June 30, 2011

5. SHAREHOLDERS' EQUITY (Continued)

The following table illustrates the changes in common shares for the six months ended June 30, 2011:

	# of Shares	\$ Amount
Common shares, beginning of period	168,720,355	3,078,217
Shares issued under Employee Stock Option Plan	217,388	11,168
Shares issued under Incentive Share Purchase Plan	146,546	9,609
Shares issued under Dividend Reinvestment Plan	80,331	4,943
Restricted share unit plan	(22,800)	(1,796)
Common shares, end of period	169,141,820	3,102,141

The following table provides the reconciliation for the weighted average number of common shares in the calculation of basic and diluted income per share:

	Three months ended June 30,				Six months ended June 30,			
	 2011		2010		2011		2010	
Net income	\$ 68,825	\$	100,360	\$	114,089	\$	122,692	
Weighted average number of common shares outstanding — basic Add: Dilutive impact of employee stock options Dilutive impact of warrants Dilutive impact of treasury shares related to	169,029,450 1,086,858 2,265,878		156,899,468 1,047,887 1,915,390		168,948,799 1,086,858 2,530,192		156,789,221 1,047,887 1,690,164	
restricted share unit plan	65,941		57,468		65,941		57,468	
Weighted average number of common shares outstanding — diluted	172,448,127		159,920,213		172,631,790		159,584,740	
Net income per share — basic	\$ 0.41	\$	0.64	\$	0.68	\$	0.78	
Net income per share — diluted	\$ 0.40	\$	0.63	\$	0.66	\$	0.77	

The calculation of diluted net income per share has been computed using the treasury stock method. A total of 718,696 employee stock options were excluded from the computation of diluted weighted average common shares because their effect would have been anti-dilutive.

For the three and six months ended June 30, 2011 and 2010, the Company's warrants were dilutive and were included in the calculation of diluted net income per share.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(thousands of United States dollars except share and per share amounts, unless otherwise indicated)
(Unaudited)
June 30, 2011

5. STOCK-BASED COMPENSATION

The following summary sets out the activity with respect to the Company's outstanding stock options:

	2-11-11-1	ths ended 80, 2011
	# of Options	Weighted average exercise price (C\$)
Outstanding, beginning of period	6,762,704	56.94
Granted	2,593,785	76.46
Exercised	(217,388)	40.46
Cancelled	(91,750)	66.87
Outstanding, end of period	9,047,351	62.83
Options exercisable at end of period	5,518,997	58.94

For the six months ended June 30, 2011 and 2010, the Company estimated the fair value of options under the Black-Scholes option pricing model using the following weighted average assumptions:

	2011	2010
Risk-free interest rate	1.96%	1.87%
Expected life of options (in years)	2.5	2.5
Expected volatility of the Company's share price	34.6%	44.3%
Expected dividend yield	0.88%	0.43%

7. AVAILABLE-FOR-SALE SECURITIES

During the three months ended June 30, 2011, the Company received proceeds of \$0.5 million (2010 — nil) from the sale of certain available-for-sale securities and recognized a gain before income taxes of \$0.4 million (2010 — nil).

During the six months ended June 30, 2011, the Company received proceeds of \$9.3 million (2010 — \$0.5 million) from the sale of certain available-for-sale securities and recognized a gain before taxes of \$4.8 million (2010 — \$0.3 million).

The cost of an available-for-sale security was determined based on the average cost. Available-for-sale securities are carried at fair value and comprise the following:

	June	30, 2011	Deceml	per 31, 2010
Available-for-sale securities in an unrealized gain position				
Cost	\$	47,689	\$	50,958
Unrealized gains in accumulated other comprehensive income		48,381		48,151
Estimated fair value		96,070		99,109
Available-for-sale securities in an unrealized loss position				
Cost		6,038		_
Unrealized losses in accumulated other comprehensive income		(1,454)		_
Estimated fair value		4,584		_
Total estimated fair value of available-for-sale securities	\$	100,654	\$	99,109

The Company's investments in available-for-sale securities consist primarily of investments in common shares of entities in the mining industry. Within the Company's portfolio of common shares in the mining industry approximately 5 percent of the total fair value of investments are in an unrealized loss position. The Company evaluated the near-term prospects of the issuers in relation to the severity and duration (less than 3 months) of the impairment. Based on that evaluation and the Company's ability and intent to hold those

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(thousands of United States dollars except share and per share amounts, unless otherwise indicated)
(Unaudited)
June 30, 2011

7. AVAILABLE-FOR-SALE SECURITIES (Continued)

investments for a reasonable period of time sufficient for a forecasted recovery of fair value, the Company does not consider those investments to be other-than-temporarily impaired as at June 30, 2011.

8. LONG-TERM DEBT

During the three months ended June 30, 2011, the Company repaid nil, net, to the credit facilities (2010 — \$600 million). At June 30, 2011, the credit facilities were drawn down by nil (December 31, 2010 — \$50 million).

Total long-term debt interest costs incurred during the three and six month periods ended June 30, 2011 was \$10.3 million (2010 — \$15.3 million) and \$20.3 million (2010 — \$19.8 million), respectively. Total interest costs capitalized to property, plant and mine development for the three and six month periods ended June 30, 2011 was \$0.2 million (2010 — mil) and \$0.2 million (2010 — \$4.6 million), respectively. The outstanding long-term debt balance as at June 30, 2011 relates to the notes entered into in April 2010.

9. FINANCIAL INSTRUMENTS

In the first quarter of 2011, to mitigate the risks associated with fluctuating zinc prices, the Company entered into a zero-cost collar to hedge the price on a portion of zinc associated with the LaRonde Mine's 2011 production. The purchase of zinc put options has been financed through selling zinc call options at a higher level such that the net premium payable to the counterparty by the Company is nil.

A total of 20,000 metric tonnes (2010 — 15,000 metric tonnes) of zinc call options were written at a strike price of \$2,500 (2010 — \$2,500) per metric tonne with 2,000 metric tonnes (2010 — 1,500 metric tonnes) expiring each month beginning February 28, 2011 (2010 — March 31, 2010). A total of 20,000 metric tonnes (2010 — 15,000 metric tonnes) of zinc put options were purchased at a strike price of \$2,200 (2010 — \$2,200) per metric tonne with 2,000 metric tonnes (2010 — 1,500 metric tonnes) expiring each month beginning February 28, 2011 (2010 — March 31, 2010). While setting a minimum price, the zero-cost collar strategy also limits participation to zinc prices above \$2,500 (2010 — \$2,500) per metric tonnes. These contracts did not qualify for hedge accounting under ASC 815 — Derivatives and Hedging. Gains or losses, along with mark-to-market adjustments, are recognized in the gain on derivative financial instruments component of the consolidated statements of income. The options that expired during the first quarter of 2011 and 2010 expired out of the money. The options that expired during the second quarter of 2011 resulted in a realized gain of \$0.1 million (2010 — \$1.3 million). As at June 30, 2011, the Company had an unrealized mark-to-market gain of \$0.7 million (2010 — \$3.9 million).

In March 2011, the Company entered into a foreign exchange forward contract at a rate of C\$0.99 per US dollar. The risk hedged in 2011 was the variability in expected future cash flows arising from changes in foreign currency exchange. There were no similar foreign exchange forward contracts in the first or second quarter of 2010. The hedged items represent a portion of the unhedged forecasted Canadian dollar denominated cash outflows arising from Canadian dollar denominated expenditures in 2011. In 2011, the forward contract hedged \$90 million of 2011 expenditures. \$10 million will expire each month starting in April 2011 and will be completely expired by December 31, 2011. The options that expired during the second quarter of 2011 resulted in a realized gain of \$0.9 million. As of June 30, 2011, the Company recognized a mark-to-market gain of \$1.4 million in the "Gain on derivative financial instruments" line item of the Consolidated Statements of Income and Comprehensive Income. The cash flow hedging relationship did not meet the requirements to be perfectly effective and therefore, did not qualify for hedge accounting.

The Company's other foreign currency derivative strategies in 2011 consisted mainly of writing US dollar call options with short maturities to generate premiums that would, in essence, enhance the spot transaction rate received when exchanging US dollars to Canadian dollars. All of these derivative transactions expired prior to the period-end such that no derivatives were outstanding on June 30, 2011. The Company's foreign currency derivative strategy generated \$2.5 million (2010 — \$2.0 million) in call option premiums for the quarter ended June 30, 2011.

In addition, the Company recognized a loss of \$1.3 million on intra-quarter silver financial instruments associated with timing of sales of silver products during the second quarter of 2011. For the six months ended June 30, 2011, the Company recognized a loss of \$3.4 million on intra-quarter silver financial instruments. There were no silver financial instruments during the first or second quarter of 2010.

The Company's financial instruments were recognized in the "Gain on derivative financial instruments" line item of the Consolidated Statements of Income and Comprehensive Income.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(thousands of United States dollars except share and per share amounts, unless otherwise indicated)
(Unaudited)
June 30, 2011

10. COMMITMENTS, CONTINGENCIES, AND GUARANTEES

As part of its ongoing business and operations, the Company has been required to provide assurance in the form of letters of credit for environmental and site restoration costs, custom credits, government grants and other general corporate purposes. As at June 30, 2011, the total amount of these guarantees was \$122.3 million.

11. SEGMENTED INFORMATION

Agnico-Eagle operates in a single industry, namely exploration for and production of gold. The Company's primary operations are in Canada, Mexico and Finland. The Company identifies its reportable segments as those operations whose operating results are reviewed by the Chief Executive Officer and Chief Operating Officer, and that represent more than 10% of the combined revenue, profit or loss or total assets of all reported operating segments. The following are the reporting segments of the Company and reflect how the Company manages its business and how it classifies its operations for planning and measuring performance:

Canada: LaRonde Mine, Lapa Mine, Goldex Mine, Meadowbank Mine, and the Regional Office

Europe: Kittila Mine

Latin America: Pinos Altos Mine and the Creston Mascota deposit at Pinos Altos

Exploration: USA Exploration office, Europe Exploration office, Canada Exploration office, Meliadine Mine Project and

the Latin America Exploration office

The accounting policies of the reporting segments are the same as those described in the summary of significant accounting policies. There are no transactions between the reported segments affecting revenue. Production costs for the reported segments are net of intercompany transactions. The goodwill of \$200.1 million on the Consolidated Balance Sheets relates to the Meliadine Mine Project that is a component of the Exploration segment.

Corporate Head Office assets are included in the Canada category and specific corporate income and expense items are noted separately below.

The Meadowbank Mine achieved commercial on production March 1, 2010. The Creston Mascota deposit at Pinos Altos achieved commercial production on March 1, 2011.

12. GENERAL AND ADMINISTRATIVE

Due to a kitchen fire at the Meadowbank Mine in March 2011, the Company recognized, during the three months ended March 31, 2011, a loss on disposal of the kitchen of \$6.9 million, and incurred related costs of \$5.3 million, and also recognized an insurance receivable for \$9.1 million. The difference of \$3.1 million was recognized in the "General and Administrative" line item of the Consolidated Statements of Income during the first quarter of 2011. The Company's exposure to insurance losses related to this claim is limited to the \$3.1 million exposure through its captive insurance company. An additional \$1.5 million in kitchen fire related costs were incurred during the second quarter of 2011. An insurance receivable was recognized for the full amount and there was no impact on the "General and Administrative" line item of the Consolidated Statements of Income during the second quarter of 2011.

13. SUBSEQUENT EVENTS

On July 27, 2011, the Company made a strategic investment in Rubicon Metals Corporation ("Rubicon") in a non-brokered private placement for cash consideration of C\$70 million or C\$3.23 per share. After closing the transaction, the Company's interest in Rubicon is 21,671,827 shares.

In addition, on July 27, 2011 the Company amended and restated its credit facility to extend the scheduled maturity date from June 22, 2014 to June 22, 2016. Terms related to standby fees and drawn amounts were reduced to reflect current market conditions.

14. COMPARATIVE FIGURES

Certain figures in the comparative consolidated financial statements have been reclassified from statements previously presented to conform to the presentation of the 2011 interim consolidated financial statements.
