FORWARD-LOOKING STATEMENTS

The statements in this report that are not based on historical facts are called "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995. These statements appear in a number of different places in this report and can be identified by words such as "estimates", "projects", "expects", "intends", "believes", "plans", or their negatives or other comparable words. Also look for discussions of strategy that involve risks and uncertainties. Forward-looking statements include statements regarding the outlook for our future operations, forecasts of future costs and expenditures, evaluation of market conditions, the outcome of legal proceedings, the adequacy of reserves, or other business plans. You are cautioned that any such forward-looking statements are not guarantees and may involve risks and uncertainties. Our actual results may differ materially from those in the forward-looking statements due to risks facing us or due to actual facts differing from the assumptions underlying our predictions. Some of these risks and assumptions include:

- * general economic and business conditions, including changes in interest rates;
- * prices and other economic conditions;
- * natural phenomena;
- * actions by government authorities, including changes in government regulation;
- * uncertainties associated with legal proceedings;
- * technological development;
- * future decisions by management in response to changing conditions;
- * our ability to execute prospective business plans; and
- * misjudgments in the course of preparing forward-looking statements.

We advise you that these cautionary remarks expressly qualify in their entirety all forward-looking statements attributable to us or persons acting on our behalf.

MFC is a financial services company that focuses on merchant banking. We provide specialized banking and corporate finance services internationally. We advise clients on corporate strategy and structure, including mergers and acquisitions and capital raising. These activities are principally conducted through our wholly-owned subsidiary, MFC Merchant Bank S.A., which is a licensed full-service Swiss bank based in Geneva, Switzerland. We also commit our own capital to promising enterprises and invest and trade to capture investment opportunities for our own account. We seek to invest in businesses or assets whose intrinsic value is not properly reflected in their share price or value. Our proprietary investing is generally not passive and we seek investments where our financial expertise and management can either add or unlock value. Our operations are primarily conducted in Europe and North America.

Our banking operations require substantially less regulatory capital than traditional North American banks as the majority of its customer deposits are placed in the European fiduciary market. Such placements are off- balance sheet items which allow us to generate fee income without tying up

significant amounts of capital. This is in contrast to most North American banks, which generate revenue from the spread between the cost of funds and the credit received.

At our shareholders' meeting in June 2000, shareholders approved a 100- for-one share consolidation and a one-for-100 share split. As a result, approximately 1,500 registered shareholders who held 99 shares or less (representing approximately two-thirds of the total number of registered shareholders) will receive cash for their shares without incurring any selling commissions or expenses, while shareholders holding 100 or more shares will be unaffected.

In August 2000, our banking operations were extended by the opening of an office in Zurich, Switzerland, which will specialize in merchant and investment banking.

We have established a solid foundation for our financial services business and look forward to continued growth during the remainder of 2000.

Respectfully submitted,

/s/ M.J. Smith

Liquidity and Capital Resources

The following table is a summary of selected financial information concerning MFC for the periods indicated:

	U.S. Dollars		Canadian Dollars	
	June 30,		June 30,	
	2000	1999	2000	1999
	(in thousands)		(in thousands)

Shareholders' equity	125,851	105,700	186,171	155,592

We maintain a high level of liquidity, with a substantial amount of assets held in cash and cash equivalents, highly liquid marketable securities and customer loans collateralized by marketable securities. The highly liquid nature of these assets provides us with flexibility in managing our business and financing. This liquidity is used by us in client related services where we act as a financial intermediary for third parties and in our own proprietary investing activities.

At June 30, 2000, our cash and cash equivalents were \$51.0 million, compared to \$38.4 million at June 30, 1999. At June 30, 2000, we had securities of \$66.1 million, compared to \$85.5 million at June 30, 1999.

Operating Activities

Operating activities provided cash of \$4.8 million in the six months ended June 30, 2000, compared to using cash of \$4.9 million in the comparable period of 1999. In the six months ended June 30, 2000, an increase in receivables from dispositions used cash of \$6.6 million, compared to a decrease in receivables providing cash of \$5.9 million in the comparable period of 1999. A decrease in amounts due from investment dealers as a result of securities trading activities provided cash of \$1.7 million in the six months ended June 30, 2000, compared to an increase which used \$10.4 million in the comparable period of 1999. A decrease in accounts payable and accrued expenses used cash of \$6.1 million in the six months ended June 30, 2000, compared to \$4.4 million in the comparable period of 1999. Net sales of securities provided cash of \$1.6 million in the current period, compared to net purchases of securities using \$11.7 million in the comparable period of 1999. We expect to generate sufficient cash flow from operations to meet our working capital requirements.

Investing Activities

Investing activities in the six months ended June 30, 2000 used cash of \$10.0 million, compared to \$22.1 million in the comparable period of 1999, primarily as a result of a smaller net increase in loans outstanding.

Financing Activities

Financing activities provided cash of \$6.2 million in the six months ended June 30, 2000, compared to \$31.1 million in the comparable period of 1999, primarily as a result of a smaller increase in customer deposits. During the current period, net borrowings increased by approximately \$4.3 million.

The appreciation of the Swiss franc relative to the Canadian dollar by approximately 0.03% over the period resulted in an unrealized foreign exchange translation gain of \$0.5 million on cash and cash equivalents, which is included as shareholder's equity in our balance sheet and does not affect our net earnings.

We continue to explore potential acquisition opportunities as a means of expanding our business. Such opportunities may involve acquisitions which are material in size and may require the raising of additional capital.

Foreign Currency

Substantially all of our operations are conducted in international markets and our consolidated financial results are subject to foreign currency exchange rate fluctuations, in particular, those in Switzerland.

We translate foreign assets and liabilities into Canadian dollars at the rate of exchange on the balance sheet date. Revenues and expenses are translated at the average rate of exchange prevailing during the period. Unrealized gains or losses from these translations are recorded as shareholders' equity on the balance sheet and do not affect our net earnings.

As a substantial amount of our revenues are received in Swiss francs, our financial position for any given period, when reported in Canadian dollars, can be significantly affected by the exchange rate for Swiss francs prevailing during that period. In the period ended June 30, 2000, we reported an approximately net \$0.9 million foreign exchange translation gain and, as a result, our cumulative foreign exchange translation loss at June 30, 2000 was \$3.3 million, compared to \$0.7 million at June 30, 1999. We use derivatives to hedge our foreign exchange exposure.

Based upon the period average exchange rate in the second quarter of 2000, the Canadian dollar increased by approximately 10.0% in value against the Swiss franc, over the comparative period in 1999.

Certain Factors

Our results of operations may be materially affected by market fluctuations and economic factors. In addition, our results of operations have been and may continue to be affected by many factors of a global nature, including economic and market conditions, the availability of capital, the level and volatility of equity prices and interest rates, currency values and other market indices, technological changes, the availability of credit, inflation and legislative and regulatory developments. Our results of operations may also be materially affected by competitive factors. Competition includes firms traditionally engaged in financial services such as banks, broker-dealers and investment dealers, along with other sources such as insurance companies, mutual fund groups, on-line service providers and other companies offering financial services in Europe and globally.

Inflation

We do not believe that inflation has had a material impact on revenues or income during the second quarter of 2000. Because our assets to a large extent are liquid in nature, they are not significantly affected by inflation. However, increases in inflation could result in increases in our expenses, which may not be readily recoverable in the price of services provided to our clients. To the extent inflation results in rising interest rates and has other adverse effects on capital markets, it could adversely affect our financial position and profitability.
