**Section 8 – Other Events****Item 8.01. Other Events.**

On July 27, 2015, at Greif Inc.'s (the "Company") paper mill facility in Massillon, Ohio, a portion of the roof collapsed during a torrential rain event, causing the facility to temporarily cease production. The collapsed roof was not directly above the facility's main production equipment and the Company has not identified any damage to such equipment; however, repairs to the building, utilities and ancillary systems are required to restore operations. The Company does not anticipate any significant supply disruptions and is implementing plans to meet customers' needs. Further, the Company does not currently expect this event to have a material adverse impact on its third quarter or annual financial results.

The Company is working with its contractors and its insurance company to fully assess the damage and develop plans to effect repairs and resume production. The Company anticipates that the facility will be partially operational in the near future with full production operations resuming shortly thereafter.
