Item 2.02 Results of Operations and Financial Condition

On February 7, 2008, National Fuel Gas Company (the “Company”) issued a press release regarding its earnings for the quarter ended December 31, 2007. A copy of the press release is furnished as part of this Current Report as Exhibit 99.

Neither the furnishing of the press release as an exhibit to this Current Report nor the inclusion in such press release of any reference to the Company’s internet address shall, under any circumstances, be deemed to incorporate the information available at such internet address into this Current Report. The information available at the Company’s internet address is not part of this Current Report or any other report filed or furnished by the Company with the Securities and Exchange Commission.

In addition to financial measures calculated in accordance with generally accepted accounting principles (“GAAP”), the press release furnished as part of this Current Report as Exhibit 99 contains certain non-GAAP financial measures. The Company believes that such non-GAAP financial measures are useful to investors because they provide an alternative method for assessing the Company’s operating results in a manner that is focused on the performance of the Company’s ongoing operations. The Company’s management uses these non-GAAP financial measures for the same purpose, and for planning and forecasting purposes. The presentation of non-GAAP financial measures is not meant to be a substitute for financial measures prepared in accordance with GAAP.

Certain statements contained herein or in the press release furnished as part of this Current Report, including statements regarding expected future natural gas and oil production and estimated future earnings, as well as statements that are identified by the use of the words “anticipates,” “estimates,” “expects,” “forecasts,” “intends,” “plans,” “predicts,” “projects,” “believes,” “seeks,” “will” and “may” and similar expressions, are “forward-looking” statements” as defined by the Private Securities Litigation Reform Act of 1995. There can be no assurance that the Company’s projections will in fact be achieved nor do these projections reflect any acquisitions or divestitures that may occur in the future. While the Company’s expectations, beliefs and projections are expressed in good faith and are believed to have a reasonable basis, actual results may differ materially from those projected in forward-looking statements. Furthermore, each forward-looking statement speaks only as of the date on which it is made. In addition to other factors, the following are important factors that could cause actual results to differ materially from those discussed in the forward-looking statements: changes in economic conditions, including economic disruptions caused by terrorist activities, acts of war or major accidents; changes in demographic patterns and weather conditions, including the occurrence of severe weather such as hurricanes; changes in the availability and/or price of natural gas or oil and the effect of such changes on the accounting treatment of derivative financial instruments or the valuation of the Company’s natural gas and oil reserves; uncertainty of oil and gas reserve estimates; ability to successfully identify, drill for and produce economically viable natural gas and oil reserves; significant changes from expectations in the Company’s actual production levels for natural gas or oil; changes in the availability and/or price of derivative financial instruments; changes in the price differentials between various types of oil; inability to obtain

new customers or retain existing ones; significant changes in competitive factors affecting the Company; changes in laws and regulations to which the Company is subject, including changes in tax, environmental, safety and employment laws and regulations; governmental/regulatory actions, initiatives and proceedings, including those involving acquisitions, financings, rate cases (which address, among other things, allowed rates of return, rate design and retained gas), affiliate relationships, industry structure, franchise renewal, and environmental/safety requirements; unanticipated impacts of restructuring initiatives in the natural gas and electric industries; significant changes from expectations in actual capital expenditures and operating expenses and unanticipated project delays or changes in project costs or plans; the nature and projected profitability of pending and potential projects and other investments, and the ability to obtain necessary governmental approvals and permits; occurrences affecting the Company's ability to obtain funds from operations, from borrowings under our credit lines or other credit facilities or from issuances of other short-term notes or debt or equity securities to finance needed capital expenditures and other investments, including any downgrades in the Company's credit ratings; ability to successfully identify and finance acquisitions or other investments and ability to operate and integrate existing and any subsequently acquired business or properties; impairments under the SEC's full cost ceiling test for natural gas and oil reserves; significant changes in tax rates or policies or in rates of inflation or interest; significant changes in the Company's relationship with its employees or contractors and the potential adverse effects if labor disputes, grievances or shortages were to occur; changes in accounting principles or the application of such principles to the Company; the cost and effects of legal and administrative claims against the Company; changes in actuarial assumptions and the return on assets with respect to the Company's retirement plan and post-retirement benefit plans; increasing health care costs and the resulting effect on health insurance premiums and on the obligation to provide post-retirement benefits; or increasing costs of insurance, changes in coverage and the ability to obtain insurance. The Company disclaims any obligation to update any forward-looking statements to reflect events or circumstances after the date hereof.

716-857-6981**Release Date:** Immediate February 7, 2008**NATIONAL FUEL REPORTS RECORD FIRST QUARTER EARNINGS**

Williamsville, New York: National Fuel Gas Company (“National Fuel” or the “Company”) (NYSE:NFG) today announced record earnings for the first quarter of fiscal 2008 (the quarter ended December 31, 2007) of \$70.6 million or \$0.82 per share.

HIGHLIGHTS

- Quarterly operating results, before items impacting comparability, increased 41% to \$0.82 per share, an increase of \$0.24 per share. Increased earnings in the Exploration and Production segment provided the bulk of the increase. Higher average commodity prices realized and increased natural gas and crude oil production were the main drivers of the higher earnings.
- Production of crude oil and natural gas from continuing operations increased more than 7%, to 10.7 billion cubic feet equivalent (“Bcfe”). In Appalachia, production increased over 37% from the prior year’s first quarter. The Company’s expected total production for the entire 2008 fiscal year remains at the previously announced level of 38 to 44 Bcfe.
- The Company is increasing its earnings guidance range for fiscal 2008 by \$0.10 per share. The revised guidance range for fiscal 2008 is \$2.60 to \$2.80 per share.
- A conference call is scheduled for Friday, February 8, 2008, at 11:00 am Eastern Standard Time.

MANAGEMENT COMMENTS

Philip C. Ackerman, Chairman and Chief Executive Officer of National Fuel Gas Company stated: “This quarter’s record earnings once again add to my satisfaction with our business mix. Record oil prices fueled our growth in profits, while the stability of our regulated operations and our strong dividend history tempered somewhat our stock price performance when compared to other exploration companies during the stock market’s steep decline in the last half of January. Under certain market conditions one might wish to be more concentrated in the utility segment, while other market conditions favor more investments in oil and gas, but over the long term, our combination of regulated utility and pipeline operations, and a strong dividend, topped off with the opportunities presented by oil and gas investments has proven to be a winner. Our continued focus to build our Exploration and Production segment, especially in Appalachia, where a steady

-more-

stream of production and a solid base of reserves can be developed for the long term, should add to the stability of our consolidated structure.”

SUMMARY OF RESULTS

National Fuel had consolidated earnings for the quarter ended December 31, 2007 of \$70.6 million, or \$0.82 per share, an increase of \$16.1 million, or \$0.18 per share, from the prior year's first quarter earnings of \$54.5 million or \$0.64 per share. (note: all references to earnings per share are to diluted earnings per share and all amounts are stated in U.S. dollars).

	Three Months Ended December 31,	
	2007	2006
<i>(in thousands except per share amounts)</i>		
Reported GAAP earnings	\$ 70,604	\$ 54,520
Items impacting comparability ¹:		
Income from discontinued operations		(3,832)
Discontinuance of hedge accounting		(1,888)
Operating results	<u>\$ 70,604</u>	<u>\$ 48,800</u>
Reported GAAP earnings per share	\$ 0.82	\$ 0.64
Items impacting comparability ¹:		
Income from discontinued operations		(0.04)
Discontinuance of hedge accounting		(0.02)
Operating results	<u>\$ 0.82</u>	<u>\$ 0.58</u>

¹ See discussion of these items below.

As outlined in the table above, two items included in GAAP earnings in the first quarter of fiscal 2007 impacted the comparability of the Company's operating results when comparing the first quarters of fiscal 2008 and fiscal 2007. Excluding these items, operating results for the current first quarter of \$70.6 million or \$0.82 per share increased \$21.8 million, or \$0.24 per share, from the prior year's first quarter. Items impacting comparability will be discussed in more detail within the discussion of segment earnings below.

DISCUSSION OF RESULTS BY SEGMENT

The following discussion of the earnings of each segment is summarized in a tabular form at pages 8 and 9 of this report. It may be helpful to refer to those tables while reviewing this discussion.

-more-

Exploration and Production Segment

The Exploration and Production segment operations are carried out by Seneca Resources Corporation (“Seneca”). Seneca explores for, develops and purchases natural gas and oil reserves mainly in California, in the Appalachian region and in the Gulf Coast region of Texas, Louisiana and Alabama.

The Exploration and Production segment’s earnings in the first quarter of fiscal 2008 increased \$13.3 million, or \$0.15 per share, to \$34.0 million, or \$0.39 per share. On August 31, 2007, Seneca completed the sale of its Canadian subsidiary. As a result of this transaction, the Company has presented the Canadian operations as discontinued operations. Earnings in the first quarter of fiscal 2007 include earnings from discontinued operations of \$3.8 million. The results of discontinued operations are discussed later in this document and are excluded from the remaining discussion of the Exploration and Production segment’s quarterly results below.

Excluding discontinued operations, operating results in the Exploration and Production segment increased \$17.1 million, or \$0.19 per share. The increase was primarily due to higher natural gas and crude oil prices realized after hedging and was also significantly impacted by higher production. For the quarter ended December 31, 2007, the weighted average oil price received by Seneca (after hedging) was \$72.59 per barrel (“Bbl”), an increase of \$28.77 per Bbl, or 65.7 percent, from the prior year’s quarter. The weighted average natural gas price received by Seneca (after hedging) for the quarter ended December 31, 2007, was \$7.90 per thousand cubic feet (“Mcf”), an increase of \$0.78, or 11.0 percent. In addition, an increase of 0.7 Bcf, or 14 percent, in gas production and a slight increase in crude oil production contributed to the increase in operating results. Most of the production increase was in Appalachia where production increased 0.6 Bcfe, or 37 percent. Higher interest income and lower interest expense during the current quarter also contributed to the increase in operating results. Other items impacting operating results for the quarter were higher depletion expense, higher lease operating expenses and higher state income taxes. The increase in depletion expense, which on a per unit basis increased \$0.39 per thousand cubic feet equivalent (“Mcf”) to \$2.25 per Mcfe, was mainly due to a 9.8 percent (39.7 Bcfe) reduction in proved reserves in California, primarily in the Midway Sunset field. The fiscal 2007 audit by Netherland Sewell & Associates determined that reduced performance from certain wells in this field supported a reduction in proved reserves. The increase in lease operating expenses (“LOE”) is due to higher workover costs in the West, an increase in the number of producing properties, especially in Appalachia and generally escalating costs compared to the prior year’s quarter.

Seneca’s increase in production and operating results reflect the success of the Company’s Appalachian growth plan and other strategic initiatives. During the last six months, 146 new wells were brought on line in the East Division, boosting daily Appalachian gas production from approximately 15 million cubic feet (“MMcf”) per day to approximately 21 MMcf per day. In addition, results for the first quarter of fiscal 2008 reflect new production in the Gulf of Mexico from the High Island 24L field, which is producing 70 MMcf per day (19 MMcf per day net to Seneca).

-more-

Pipeline and Storage Segment

The Pipeline and Storage segment operations are carried out by National Fuel Gas Supply Corporation (“Supply Corporation”) and Empire State Pipeline (“Empire”). These companies provide natural gas transportation and storage services to affiliated and non-affiliated companies through an integrated system of pipelines and underground natural gas storage fields in western New York and western Pennsylvania.

The Pipeline and Storage segment’s earnings of \$12.8 million, or \$0.15 per share, for the quarter ended December 31, 2007, decreased \$0.9 million, or \$0.01 per share, when compared with the same period in the prior fiscal year. The comparability of the results for the quarter is impacted by a \$1.9 million gain associated with the prepayment in the first quarter of fiscal 2007 of the project financing debt for the Empire State Pipeline. Upon the repayment of that debt, the corresponding interest rate collar no longer qualified for hedge accounting, and a gain that had been deferred on the balance sheet was recognized when the repayment was made.

Excluding that 2007 gain, operating results increased \$1.0 million. The increase is mainly the result of higher transportation and storage revenues offset by lower efficiency gas revenues. The higher transportation and storage revenues were largely due to favorable market conditions that allowed Supply Corporation to renew expiring storage contracts at higher rates. Substantially all of Supply’s firm storage contracts are now at maximum tariff rates. The lower efficiency gas revenues were the result of a FERC-approved settlement involving Supply Corporation, which was generally effective as of December 1, 2006, and lowered the percentages of transported gas which Supply Corporation retains for fuel, company use, and surface operating losses.

Utility Segment

The Utility segment operations are carried out by National Fuel Gas Distribution Corporation (“Distribution”), which sells or transports natural gas to customers located in western New York and northwestern Pennsylvania. The Utility segment’s earnings of approximately \$20.2 million, or \$0.24 per share, for the quarter ended December 31, 2007, increased \$3.0 million, or \$0.04 per share, compared to the prior year’s first quarter.

Earnings increased \$2.1 million in the Pennsylvania Division, primarily due to an increase in base rates and higher usage per customer. On January 1, 2007, Distribution implemented a Settlement Agreement approved by the Pennsylvania Public Utility Commission, which, among other things, provided for a \$14.3 million (before tax) annual base rate increase. The impact of the rate increase was partially offset by weather that was warmer than in the prior year.

In the New York Division, earnings increased \$0.9 million mainly due to an increase in usage per customer during the quarter.

Energy Marketing

National Fuel Resources, Inc. (“NFR”) comprises the Company’s Energy Marketing segment. NFR markets natural gas to industrial, commercial, public authority and residential

-more-

Page 5.

customers in western and central New York and northwestern Pennsylvania, offering competitively priced energy and energy management services to its customers.

The Energy Marketing segment's earnings for the quarter of \$1.0 million increased \$0.5 million from the first quarter last year. This increase is mainly due to higher margins.

Timber Segment

The Timber segment operations are carried out by Highland Forest Resources, Inc. ("Highland") and Seneca's Northeast Division. This segment markets high quality hardwoods from its New York and Pennsylvania land holdings and owns two sawmill/dry kiln operations in northwestern Pennsylvania.

The Timber segment's first quarter earnings were \$0.4 million versus \$0.2 million in the prior year's first quarter due to increased volumes of lumber and log sales.

Corporate and All Other

Other active, wholly owned subsidiaries of the Company include Horizon LFG, Inc., a corporation engaged, through subsidiaries, in the purchase, processing, transportation and sale of landfill gas, and Horizon Power, Inc., a corporation that develops and owns independent electric generation facilities which are fueled by natural gas or landfill gas.

Earnings in the Corporate and All Other category for the first quarter of fiscal 2008 were flat at \$2.2 million when compared to the prior year's first quarter. Higher income from unconsolidated subsidiaries, higher interest income and lower interest expense were offset by higher operating expenses related to the proxy contest initiated by a shareholder.

Discontinued Operations

On August 31, 2007, Seneca completed the sale of its Canadian subsidiary. As a result of this transaction, the Company has presented the Canadian operations as discontinued operations. Earnings in the first quarter of fiscal 2007 include earnings from discontinued operations of \$3.8 million. There were no earnings from discontinued operations in the first quarter of fiscal 2008.

EARNINGS GUIDANCE

The Company is increasing its consolidated earnings guidance for fiscal 2008 by \$0.10 per share to the range of \$2.60 to \$2.80 per share. This increase is a result of higher than forecast crude oil prices realized by Seneca during the three months ended December 31, 2007, combined with Seneca having entered into additional hedge contracts covering production for the remainder of the fiscal year at prices that are higher than the prices assumed for unhedged production in the previous guidance. This current guidance still utilizes the July 24, 2007 NYMEX commodity pricing incorporated in the Company's original guidance for unhedged production volumes. To the extent that actual pricing for unhedged volumes during the remainder of the fiscal year varies from those July 24, 2007 prices, the fiscal year earnings will be affected as detailed in the earnings sensitivity table on page 21 of this release.

EARNINGS TELECONFERENCE

The Company will host a conference call on Friday, February 8, 2008, at 11 a.m. (Eastern Time) to discuss this announcement. There are two ways to access this call. For those with Internet access, visit National Fuel's Web site at investor.nationalfuelgas.com. For those without Internet access, access is also provided by dialing (toll-free) 1-866-383-8009, and using the passcode "43320193." For those unable to listen to the live conference call, a replay will be available approximately one hour after the conclusion of the call at the same Web site link and by phone at (toll free) 1-888-286-8010 using passcode "59260259." Both the webcast and telephonic replay will be available until the close of business on Friday, February 15, 2008.

National Fuel is an integrated energy company with \$4.0 billion in assets comprised of the following five operating segments: Exploration and Production, Pipeline and Storage, Utility, Energy Marketing, and Timber. Additional information about National Fuel is available on its Internet Web site: <http://www.nationalfuelgas.com> or through its investor information service at 1-800-334-2188.

FISCAL 2008 EARNINGS GUIDANCE AND SENSITIVITIES**

<u>Fiscal 2008 (Diluted earnings per share guidance*)</u>	<u>Earnings per share sensitivity to changes from NYMEX prices used in guidance* ^</u>				
	<u>Range</u>	<u>\$1 change per MMBtu gas</u>		<u>\$5 change per Bbl oil</u>	
			<u>Increase</u>	<u>Decrease</u>	<u>Increase</u>
Consolidated Earnings	\$2.60- \$2.80	+ \$0.05	- \$0.05	+ \$0.04	- \$0.04

NYMEX Settlement Prices at July 24, 2007

	<u>Natural Gas (\$ per MMBtu)</u>	<u>Oil (\$ per Bbl)</u>
Jan-08	\$8.468	\$72.95
Feb-08	\$8.488	\$72.82
Mar-08	\$8.338	\$72.70
Apr-08	\$7.713	\$72.59
May-08	\$7.678	\$72.48
Jun-08	\$7.768	\$72.39
Jul-08	\$7.866	\$72.29
Aug-08	\$7.939	\$72.19
Sep-08	\$7.994	\$72.09
Average	\$8.028	\$72.50

* Please refer to forward looking statement footnote at page 6 of this document.

^ This sensitivity table is current as of February 1, 2008 and only considers revenue from the Exploration and Production segment's crude oil and natural gas sales. The sensitivities will become obsolete with the passage of time, changes in Seneca's production forecast, changes in basis differential, as additional hedging contracts are entered into, and with the settling of NYMEX hedge contracts at their maturity.
