Dear IAMGold Shareholder:

The enclosed proxy materials are being sent to you by Golden Star Resources Ltd. Golden Star is recommending that IAMGold shareholders vote **AGAINST** the proposed arrangement involving IAMGold Corporation and Wheaton River Minerals Ltd. at the annual and special meeting of IAMGold's shareholders scheduled to be held on June 29, 2004.

On June 10, 2004, Golden Star mailed to the shareholders of IAMGold an offer to purchase all of the outstanding common shares of IAMGold. Shareholders depositing their IAMGold common shares under the offer will receive 1.15 common shares of Golden Star for each IAMGold common share deposited and purchased by Golden Star. The offer represents a premium of 12.8% to IAMGold shareholders based on the closing price of the common shares of each of IAMGold and Golden Star on the Toronto Stock Exchange on May 27, 2004, the date on which Golden Star announced the proposed business combination with IAMGold.

You should be aware that the offer made by Golden Star for IAMGold common shares is conditional on the resolutions in respect of the IAMGold/Wheaton River arrangement not being approved by IAMGold shareholders. Accordingly, Golden Star may not complete its offer if the resolutions in respect of the arrangement are approved. We are convinced that our proposed offer is superior to the IAMGold/Wheaton River arrangement and we urge you to vote AGAINST the IAMGold/Wheaton River arrangement by signing, dating and returning the enclosed GREEN form today. Tendering to Golden Star's offer will **NOT** count as a vote against the proposed arrangement.

We believe that the combination of Golden Star and IAMGold is a unique opportunity to create an intermediate gold producer with a portfolio of profitable gold mining operations, development projects and exploration properties in West Africa, host to one of the world's most geologically prospective areas for future gold discoveries and development of large, low cost mining operations. We believe that the combination of Golden Star and IAMGold will produce the following valuable benefits:

A leading intermediate gold producer . The combined company would have gold production of approximately 800,000 ounces per year commencing in 2005 and annual revenues of approximately \$300 million at a gold price of \$375 per ounce. Commencing in 2006, following completion of current development projects, the combined company would have estimated net free cash flow (after capital expenditures and exploration expense) in excess of \$100 million per year. The combined company would have the largest reserve and resource base among

Table of Contents

intermediate producers, with approximately 7.3 million ounces of gold reserves and an additional 90 million tonnes of measured and indicated resources at an average grade of 1.6 grams per tonne. The new company would have significant potential to increase its resources and convert resources to reserves, particularly in our properties in Ghana.

Substantial cost savings. We estimate that the combined company would achieve annual savings of approximately \$8 million per year commencing in 2005, primarily through a combination of corporate overhead cost reductions and rationalization of the two companies' exploration programs.

Financial strength. On a pro forma basis, the combined company would have a strong, liquid balance sheet, with approximately \$185 million (assuming a break-fee of \$23 million is paid to Wheaton River in connection with the termination of the proposed IAMGold-Wheaton River arrangement) in cash, cash equivalents and bullion, with total long-term debt of approximately \$12 million and sufficient cash flow to fund currently planned development activities. The combined company's financial strength would provide excellent access to capital and an enhanced ability to expand the company's portfolio of gold mines, development projects and exploration properties.

Portfolio of West African gold mines. Golden Star and IAMGold are both gold producing companies focused on West Africa. Our Bogoso/Prestea operation and Wassa development project, expected to commence production in the third quarter of 2004, are both in Ghana. IAMGold is also an established gold producer with mature production and cash flows from its minority interests in four large mines in West Africa, including the world-class Tarkwa and Sadiola mines in Ghana and Mali, respectively.

Management strength. The Golden Star management team would bring to the combined company many years of hands-on operating and project development experience in Ghana and other parts of West Africa and Africa, with strong credibility in the capital markets.

Stronger presence in West Africa. As a result of the proposed combination, we would emerge as the predominant intermediate gold mining company active in West Africa. With our extensive operating, project development and exploration experience and financial strength, we would have the opportunity to increase our portfolio by acquiring additional properties and by becoming the partner of choice for junior gold explorers in the region. We believe we would have greater flexibility than the senior gold companies active in West Africa in the pursuit of growth opportunities.

Increased geological understanding. The knowledge base established by IAMGold's past activity in West Africa, combined with Golden Star's own ongoing and active exploration program, is expected to result in a widespread geological understanding in West Africa. We believe that this will provide unique potential for organic growth that we can capitalize on with our in-house project development and operational skills.

Table of Contents

Increased competitiveness. With its financial and management strength, enhanced geological understanding and significant presence in West Africa, the combined company would have increased ability to compete for world-class gold projects in the region.

Increased market profile. The combined company would have a market capitalization of approximately \$1.4 billion based on the last trading prices of our respective shares on June 8, 2004. Due to the increased market capitalization, the shares of the combined company would be eligible investments for additional potential institutional investors in the U.S. and Canada. Most of Golden Star's trading activity is on the AMEX, and most of IAMGold's trading activity is on the TSX. The combined company should achieve an excellent balance of capital markets participation across the U.S.-Canadian border, with anticipated daily trading volumes of from \$25 to \$30 million per day.

In addition to the arrangement with Wheaton River not being approved, our offer is conditional upon, among other things, at least 66 2/3% of the common shares of IAMGold (on a fully diluted basis) being validly deposited under the offer and not withdrawn, Golden Star being permitted to review non-public information relating to IAMGold and the receipt of all necessary regulatory approvals.

We urge you to review the attached materials for information regarding how you may vote against the proposed arrangement. You may do so even if you have previously deposited a proxy or given voting instructions in support of the arrangement.

We strongly urge you to vote **AGAINST** the IAMGold/Wheaton River arrangement in order to take advantage of Golden Star's superior offer.

Yours truly,

Peter Bradford
President and Chief Executive Officer

PROXY CIRCULAR

This proxy circular (the “Circular”) and the accompanying **GREEN** form of proxy are furnished in connection with the solicitation by and on behalf of Golden Star Resources Ltd. (“Golden Star”) of proxies to be used at the annual and special meeting of shareholders of IAMGold Corporation (“IAMGold”), scheduled to be held on Tuesday June 29, 2004 at 9:00 a.m. (Toronto time) and at any and all adjournments or postponements thereof (the “IAMGold Meeting”).

You recently received a management proxy circular dated April 30, 2004 (the “IAMGold Circular”) from the management of IAMGold and Wheaton River Minerals Ltd. (“Wheaton River”) soliciting proxies in respect of the resolutions set out therein, including the following resolutions in connection with the proposed business combination (the “IAMGold/Wheaton River Arrangement”) of IAMGold and Wheaton River:

- a resolution authorizing the issue of up to approximately 422,849,250 common shares of IAMGold to be issued to the security holders of Wheaton River (the “Share Issue Resolution”);
- if the Share Issue Resolution is approved, a special resolution authorizing an amendment to IAMGold’s articles to increase the maximum number of directors of IAMGold from 10 to 16 and to change IAMGold’s name to “Axiom Gold Corporation” (the “Amendment Resolution”); and
- if the Share Issue Resolution is approved, an ordinary resolution increasing the number of shares which may be issued under IAMGold’s share incentive plan (the “Share Incentive Plan Resolution”).

Each of the resolutions to be voted on at the IAMGold Meeting, including the Share Issue Resolution, the Amendment Resolution and the Share Incentive Plan Resolution (collectively, the “Arrangement Resolutions”) is described in more detail in the IAMGold Circular. The IAMGold Circular is available at www.sedar.com and also at www.sec.gov.

Golden Star is soliciting proxies from the holders (the “Shareholders”) of IAMGold common shares (“IAMGold Shares”) to “**VOTE AGAINST**” the Arrangement Resolutions.

You should be aware that the offer made by Golden Star for IAMGold Shares which was mailed to Shareholders on June 10, 2004 (the “Golden Star Offer”) is conditional on, among other things, the Share Issue Resolution not being approved at the IAMGold Meeting. Accordingly, Golden Star may not complete the Golden Star Offer if the Arrangement Resolutions are approved.

Golden Star strongly recommends that you “VOTE AGAINST” the Arrangement Resolutions because Golden Star believes that the Golden Star Offer, pursuant to which you would receive 1.15 common shares of Golden Star (a “Golden Star Share”) for each IAMGold Share that you hold, is superior to the IAMGold/Wheaton River Arrangement. The Golden Star Offer represents a premium of 12.8% to the IAMGold Shareholders based on the closing prices of the IAMGold Shares and Golden Star Shares on the Toronto Stock Exchange on
