GOLDEN STAR RESOURCES LTD.

(Exact Name of Registrant as Specified in Its Charter)

Canada
(State or other Jurisdiction
of Incorporation or Organization)

98-0101955
(I.R.S. Employer
Identification No.)

10901 West Toller Drive, Suite 300
Littleton, Colorado
(Address of Principal Executive Office)

80127-6312
(Zip Code)

Registrant's telephone number, including area code (303) 830-9000

Securities registered or to be registered pursuant to Section 12 (b) of the Act:

Title of Each Class
Common Shares

Name of each exchange on which registered
American Stock Exchange

Securities registered or to be registered pursuant to Section 12(g) of the Act:
Warrants Issued February 2003

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 (the "Act") during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. (See definition of "accelerated filer" and "large accelerated filer" in Rule 12b-2 of the Exchange Act).

(Check one): Large accelerated filer:

Accelerated filer:

Non-accelerated filer:

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Number of Common Shares outstanding as at May 9, 2006: 207,513,758

Explanatory Note

This Form 10-Q/A is being filed to amend Golden Star Resources Ltd.'s Quarterly Report on Form 10-Q, for the quarter ended March 31, 2006 to correct errors discovered on March 11, 2007 related to the computation of ore stockpile and in-process inventory balances and the associated "Mining operations" costs as found on the statement of operations. The corrections also impacted the minority interest account and various tax accounts on the balance sheets and in the statement of operations as well as our non-GAAP measures cash operating costs per ounce and total cash cost per ounce.

The US GAAP Reconciliation note 24 was previously revised in February 2007 to correct the way in which we accounted in US GAAP for warrants to purchase common shares which have an exercise price denominated in Canadian dollars. This restatement arose from management's determination on February 22, 2007 that such warrants denominated in Canadian dollars, which had been treated as equity instruments, should have been treated as derivative instruments under US GAAP. As such the fair value of such warrants is required to be treated as a liability, and we are required to mark to market those warrants on a current basis, with the resulting gains or losses being included in the statement of operations under US GAAP.

Generally, no attempt has been made in this Form 10-Q/A to modify or update other disclosures presented in the original report on Form 10-Q except as otherwise required to reflect the effects of the inventory restatement, and the earlier warrant restatements in note 24. This Form 10-Q/A does not reflect events occurring after the filing of the original Form 10-Q or modify or update those disclosures. Information not affected by the restatement is unchanged and reflects the disclosure made at the time of the original filing of the Form 10-Q with the Securities and Exchange Commission on May 11, 2006.

Table of Contents

REPORTING CURRENCY, FINANCIAL AND OTHER INFORMATION

All amounts in this report are expressed in United States (“US”) dollars, unless otherwise indicated. Canadian currency is denoted as “Cdn\$.” Euros are denoted as “(euro)”.

Financial information is presented in accordance with accounting principles generally accepted in Canada (“Cdn GAAP” or “Canadian GAAP”). Differences between accounting principles generally accepted in the US (“US GAAP”) and those applied in Canada, as applicable to Golden Star Resources Ltd., are explained in Note 24 to the Consolidated Financial Statements.

References to “Golden Star,” the “Company,” “we,” “our,” and “us” mean Golden Star Resources Ltd., its predecessors and consolidated subsidiaries, or any one or more of them, as the context requires.

NON-GAAP FINANCIAL MEASURES

In this Form 10-Q, we use the terms “total cash cost per ounce” and “cash operating cost per ounce” which are considered Non-GAAP financial measures as defined in SEC Regulation S-K Item 10 and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. See Item 2 Management’s Discussion and Analysis of Financial Condition and Results of Operations for a definition of these measures as used in this Form 10-Q.

STATEMENTS REGARDING FORWARD-LOOKING INFORMATION

This Form 10-Q contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended, with respect to our financial condition, results of operations, business prospects, plans, objectives, goals, strategies, future events, capital expenditures, and exploration and development efforts. Words such as “anticipates,” “expects,” “intends,” “forecasts,” “plans,” “believes,” “seeks,” “estimates,” “may,” “will,” and similar expressions identify forward-looking statements.

Although we believe that our plans, intentions and expectations reflected in these forward-looking statements are reasonable, we cannot be certain that these plans, intentions or expectations will be achieved. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained in this Form 10-Q.

These statements include comments regarding: the establishment and estimates of mineral reserves and resources, recovery rates, production, production commencement dates, production costs, cash operating costs, total cash costs, grade, processing capacity, potential mine life, feasibility studies, permitting and licensing, development costs, expenditures, exploration activities and expenditures, recovery of deferred stripping charges at the Bogoso and Prestea mining leases (“Bogoso/Prestea”), equipment replacement, anticipated benefits of the acquisition of St. Jude Resources Ltd. (“St. Jude”), our plan to carry out feasibility studies on the Hwini-Butre and Benso concessions (“St. Jude Properties”) in 2006, our expansion plans for Bogoso/Prestea, related permitting and capital costs and anticipated production and other estimates at Bogoso/Prestea in 2006 and 2007, cash requirements and sources, production capacity, operating costs and gold recoveries and estimated capital spending in 2006.

The following, are among the factors that could cause actual results to differ materially from the forward-looking statements:

- unexpected changes in business and economic conditions;
- significant increases or decreases in gold prices;
- changes in interest and currency exchange rates;
- timing and amount of gold production;
- failure to realize the anticipated benefits of the acquisition of the St. Jude Properties;
- failure to develop reserves on the St. Jude Properties;

Table of Contents

- unanticipated grade changes;
- unanticipated recovery or production problems;
- effects of illegal miners on our properties;
- changes in mining and processing costs including changes to costs of raw materials, supplies, services and personnel;
- changes in material type that impacts mining and processing;
- availability of skilled personnel, materials, equipment, supplies and water;
- changes in project parameters;
- costs and timing of development of new reserves;
- results of current and future exploration activities;
- results of pending and future feasibility studies;
- joint venture relationships;
- political or economic instability, either globally or in the countries in which we operate;
- local and community impacts and issues;
- timing of receipt of, and maintenance of, government approvals and permits;
- accidents and labor disputes;
- environmental costs and risks;
- marine transit and other shipping risks, including delays and losses;
- competitive factors, including competition for property acquisitions; and
- availability of capital at reasonable rates or at all.

These factors are not intended to represent a complete list of the general or specific factors that could affect us. Your attention is drawn to other risk factors disclosed and discussed in Item 1A of our 2005 Form 10-K. We undertake no obligation to update forward-looking statements.

GOLDEN STAR RESOURCES LTD.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(All amounts in tables are in thousands of US dollars unless noted otherwise)
(Unaudited)

These consolidated financial statements and the accompanying notes are unaudited and should be read in conjunction with the audited consolidated financial statements and related notes thereto included in our annual report on Form 10-K as amended for the year ended December 31, 2005, on file with Securities and Exchange Commission and with the Canadian securities commissions. Financial information is presented in accordance with accounting principles generally accepted in Canada.

In early 2006, it was determined that hedge accounting had been improperly applied by our subsidiary, EURO Ressources S.A. (“EURO”) for their cash-settled forward gold price agreements during the first three quarters of 2005. As a result, our Forms 10-Q for the first three quarters of 2005 have been amended to apply derivative accounting rather than hedge accounting to EURO’s derivatives. In this Form 10-Q, comparative amounts from the first quarter of 2005 reflect this restatement.

In management’s opinion, the unaudited consolidated financial statements for the three months ended March 31, 2006 and March 31, 2005 contained herein reflect all adjustments, consisting solely of normal recurring items, which are necessary for the fair presentation of financial position, results of operations and cash flows on a basis consistent with that of our prior audited consolidated financial statements.

In certain cases prior period amounts have been revised to reflect current period presentation.

1. Description of Business

Through our subsidiaries we own a controlling interest in four significant gold properties in southern Ghana in West Africa: the Bogoso/Pretea property, which is comprised of the adjoining Bogoso and Pretea surface mining leases (“Bogoso/Pretea”), the Pretea Underground property (“Pretea Underground”), the Wassa property (“Wassa”), and the Hwini-Butre and Benso concessions (“St. Jude Properties”). In addition to these gold properties we hold various other exploration rights and interests and are actively exploring in a variety of locations in West Africa and South America.

Bogoso/Pretea is owned by our 90% owned subsidiary Bogoso Gold Limited (“BGL”). BGL was acquired in 1999. Bogoso/Pretea produced and sold 131,898 ounces of gold during 2005.

Through another 90% owned subsidiary, Wexford Goldfields Limited (“WGL”), we own the Wassa gold mine located some 35 kilometers east of Bogoso/Pretea. Construction and commissioning of Wassa’s new processing plant and open pit mine was completed at the end of March 2005 and the project was placed in service on April 1, 2005. Wassa produced and sold 24,205 ounces of gold in the quarter ending March 31, 2006 and 93,275 ounces since its April 2005 in-service date.

The Pretea Underground is located on the Pretea property and consists of a currently inactive underground gold mine and associated support facilities. BGL owns a 90% operating interest in the Pretea Underground. We are currently conducting exploration and engineering studies to determine if the underground mine can be reactivated on a profitable basis.

Through our 100% owned subsidiary, St. Jude Resources Ltd. (“St. Jude”), we own the St. Jude Properties in southwest Ghana. The St. Jude Properties cover an area of 201 square kilometers. Both concessions contain undeveloped zones of gold mineralization. These two concessions are located between 40 and 80 kilometers south of Wassa. The mineralized zones have been delineated through the efforts of the prior owner who conducted extensive exploration work from the mid-1990s to 2005.

We hold interests in several gold exploration projects in Ghana and elsewhere in West Africa including Sierra Leone, Ghana, Burkina Faso, Niger and Cote d’Ivoire. We also hold and manage exploration properties in Suriname and French Guiana in South America. We hold indirect interests in gold exploration properties in Peru and Chile through a 17% shareholding investment in Goldmin Consolidated Holdings. We also own a 53% interest in EURO a French registered, publicly-traded royalty holding company (formerly known as Guyanor Ressources S.A.) which owns a royalty interest based on gold production at Cambior Inc.’s Rosebel gold mine in Suriname.

Table of Contents

Our corporate headquarters is located in Littleton, Colorado. Our accounting records are kept in compliance with Canadian GAAP and all of our operations, except for certain exploration projects, transact business and keep financial records in US dollars.

2. Inventories

	As of March 31, 2006	As of December 31, 2005
	(Restated-Note 25)	
Stockpiled ore	\$ 7,312	\$ 5,753
In-process	3,410	3,106
Materials and supplies	16,061	14,322
Total inventories	\$26,783	\$23,181

3. Deposits

Represents cash advances for equipment and materials purchases at WGL and BGL.

4. Long Term Investments

We hold a 17% interest in Goldmin Consolidated Holdings, a privately held gold exploration company which operates in South America. In the year ended December 31, 2005 we accounted for our investment as an equity investment but during the quarter ended March 31, 2006 our investment was diluted to less than 20% and we now account for the investment on the cost basis at \$1.2 million.

As of December 31, 2005 we held approximately 11% of the outstanding common shares of Moto Goldmines Limited ("Moto"), a gold exploration and development company publicly traded in Canada, with a focus on gold exploration and development in the Democratic Republic of Congo. In March 2006 we exercised our remaining one million warrants increasing our total ownership to six million common shares, and immediately afterward sold all six million common shares in a bought-deal transaction in Canada for Cdn\$7.50 per share. The sale of the six million shares resulted in net proceeds to Golden Star of \$39.0 million (Cdn\$45.0 million) yielding a pre-tax capital gain of \$30.3 million. A \$4.9 million non-cash tax expense was recognized on the gain.

5. Deferred Exploration and Development Costs

Consolidated property expenditures on our exploration projects for the three months ended March 31, 2006 were as follows:

	Deferred Exploration & Development Costs as of 12/31/05	Capitalized Exploration Expenditures	Acquisition Costs	Transfer to mining properties	Deferred Exploration & Development Costs as of 3/31/06

8. Mine Construction-in-Progress

At March 31, 2006 and at December 31, 2005, mine construction-in-progress represents costs incurred for the Bogoso sulfide expansion project since the beginning of 2005. Included in the total are costs of development drilling, plant equipment purchases, materials and construction costs, including payments to the construction contractors.

9. Deferred Stripping

In recent years, mining at the Plant-North pit at Prestea has trended toward a deeper pit with longer life and higher and more variable stripping ratios than in the past. Stripping ratios at the Plant-North pit increased from 2.3 to 1 in 2002, to 3.4 to 1 in 2003 and to 5.1 to 1 in 2004. In response to the changing stripping rate we initiated a deferred waste stripping policy at the Plant-North pit during 2004.

The amount of stripping costs to be capitalized in each period is calculated by determining the tonnes of waste moved in excess of the life-of-pit average strip ratio and valuing the excess tonnage of removed waste at the average mining cost per tonne during the period. Costs are recovered in periods when the actual tonnes of waste moved are less than what would have been moved at the average life-of-pit rate, such tonnes being valued at the rolling average cost of the waste tonnage amounts capitalized.

The capitalized component of waste rock removal costs is shown on our consolidated balance sheets in the line item titled "Deferred Stripping." The cost impact is included in the Statements of Operations in the line item titled "Mining operations." In periods when the strip ratio exceeds the pit average, the costs of the excess stripping are excluded from our cost per ounce calculations. In periods when the strip ratio is less than the pit average, capitalized waste costs are added back to operating costs and included in cost per ounce calculations.

Table of Contents

Based on actual results from 2004 and our January 1, 2005 mine plan, we expected to move 3.7 million tonnes of ore and 18.0 million tonnes of waste during the overall life of the Plant-North pit and thus the expected strip ratio was 4.8 to 1.

In January 2006, we completed a new mine plan which extended the life of Plant-North Pit to late in 2006. The new plan also added significant amounts of unanticipated waste tonnage, and projections of the life-of-mine strip ratio indicated that \$3.4 million of deferred stripping costs accrued as of December 31, 2005 would not be recovered and was consequently written off in December 2005. During the quarter ended March 31, 2006, \$0.5 million of deferred stripping costs were recovered and we expect the remaining deferred stripping cost will be recovered by the third quarter of 2006.

10. Debt

	As of March 31, 2006	As of December 31, 2005
Current debt:		
Bank loan — at EURO Ressources (Note a)	\$ 2,667	\$ 2,667
CAT equipment financing loans (Note b)	4,918	4,188
Total current debt	\$ 7,585	\$ 6,855
Long term debt:		
Bank loan — at EURO Ressources (Note a)	\$ 4,333	\$ 5,000
CAT equipment financing loans (Note b)	15,300	11,632
Convertible notes (Note c)	47,842	47,666
Total long term debt	\$67,475	\$64,298

- (a) Bank debt — In January 2005, EURO Ressources S.A. (“EURO”) drew down \$6.0 million under a credit facility from a bank and paid the funds to Golden Star as the first installment on its purchase of the Rosebel royalty. The loan is repayable in nine equal payments of \$666,667 beginning July 29, 2005. Accrued interest is added to each quarterly payment. The interest rate for each period is set at LIBOR plus 2.5% and EURO may choose a 1, 2 or 3 month interest period. The loan is collateralized by the assets of EURO, including the Rosebel royalty. The lender has no recourse to Golden Star. The fair value of the outstanding balance of this debt at March 31, 2006 is essentially equal to its carrying value.

In September 2005 EURO borrowed an additional \$3.0 million from the same commercial bank and forwarded the proceeds to Golden Star. The interest rate on this debt is set at LIBOR plus 2.5% and EURO may choose a 1, 2 or 3 month interest period. The \$3.0 million is to be repaid by five quarterly payments of \$0.6 million each, commencing October 31, 2007. The fair value of the outstanding balance of this debt at March 31, 2006 is essentially equal to its carrying value.

- (b) Equipment financing credit facility — We have established a \$25 million equipment financing facility between Caterpillar Financial Services Corporation, BGL and WGL, with Golden Star as the guarantor of all amounts borrowed. The facility provides credit for a mixture of new and used mining equipment. This facility is reviewed annually. Amounts drawn under this facility are repayable over five years for new equipment and over two years for used equipment. The interest rate for each draw-down is fixed at the date of the draw-down using the Federal Reserve Bank 2-year or 5-year swap rate plus 2.38% or a floating interest rate of LIBOR plus 2.38%. As of March 31, 2006, \$20.2 million was outstanding under this facility. The average interest rate on the outstanding loans is approximately 6.2%. We estimate the fair value of the Caterpillar debt to be approximately \$18.5 million at March 31, 2006.
- (c) Convertible notes — We sold \$50 million of senior unsecured convertible notes to a private investment fund on April 15, 2005. These notes, maturing on April 15, 2009, were issued at par and bear interest at 6.85% with a conversion price of \$4.50 per common share. At the maturity date, we have the option, at our discretion and assuming the market price of our common shares exceeds \$4.50 per share, to pay the outstanding notes with cash or by issuing common shares to the note holders. If the notes are paid in common shares the number of shares will be determined by dividing the loan balance by an amount equal to 95% of the average price of the 20 trading day period ended five days before the notes are due. Due to the beneficial conversion feature, approximately \$47.1 million of the note balance was initially classified as a liability and \$2.9 million was classified as equity. Periodic accretion will increase the liability to the full \$50 million amount due (after adjustments for converted notes) by the end of the note term. The periodic accretion is classified as interest expense. A total of \$2.9 million of interest on the convertible notes was capitalized as Bogoso sulfide expansion project costs. We estimate the fair value of the convertible debentures to be essentially equal to its carrying value at March 31, 2006.

11. Loan Acquisition Costs

In the second quarter of 2005 approximately \$0.9 million of loan acquisition fees were incurred in obtaining the \$50 million convertible notes. This amount was capitalized and is being amortized to interest expense over the term of the notes based on the effective interest rate method. In addition, we recorded loan acquisition costs at EURO related to its January 2005 and September 2005 borrowings. As with the convertible notes, the balance is being amortized to interest expense over the term of the loan. We did not incur any additional loan acquisition costs during the quarter ending March 31, 2006.

12. Derivatives

EURO — In January 2005, EURO, a majority owned subsidiary, entered into a series of contracts that qualify as derivatives as part of a \$6.0 million loan agreement (see note 10a). EURO's derivatives are tied to a future stream of gold royalty payments EURO expects to receive from a Canadian mining company that purchased a mining property interest from Golden Star in 2002. Golden Star originally owned the royalty but sold the royalty to EURO in 2004. The derivative provides that (a) when the average gold price for a quarter exceeds \$421 per ounce, EURO will pay to the counter party cash equal to the difference between the quarter's average gold price per ounce and \$421 per ounce, times 5,700 ounces, and (b) when the average quarterly gold price is below \$421 per ounce, EURO will receive a cash payment from the counterparty equal to the difference between \$421 per ounce and the average gold price per ounce times 5,700 ounces. The \$421 per ounce figure was the spot gold price on the date EURO entered into the derivative. The derivative agreement established 10 tranches of 5,700 ounces each which settle quarterly over ten quarters beginning in the first quarter of 2005.

In September 2005, EURO entered into a second set of derivative contracts related to a \$3.0 million debt facility. These contracts are spread over ten quarters beginning in the last quarter of 2007 and have a fixed price of \$458.50 per ounce which was approximately \$18 per ounce over the spot price on the date of the agreement. The quarterly cash payments are determined exactly as with the first derivative describe above except \$458.50 per ounce is the reference price for calculating the quarterly payments.

During 2005, we recorded a realized derivative loss of \$0.5 million for the cash settlement of the first four quarterly tranches and we recorded \$9.6 million of unrealized, non-cash mark-to-market losses as of December 31, 2005. At March 31, 2006 we recorded an additional \$5.3 million mark-to-market loss for the first quarter of 2006.

Gold Derivatives — To provide gold price protection during the 2005/2006 construction phase of the Bogoso sulfide expansion project, we purchased a series of gold puts. The first purchase occurred in the second quarter of 2005 when we purchased put options on 140,000 ounces of gold at an average floor price of \$409.75, paying approximately \$1.0 million in cash for the options.

We purchased an additional 90,000 put options in the third quarter of 2005 locking in a \$400 per ounce floor for each of the 90,000 ounces. Continuing increases in the gold prices during the first quarter of 2006 resulted in a nil value for the puts at March 31, 2006. This was \$0.1 million less than the value at December 31, 2005 and approximately \$1.0 million less than the initial purchase cost. We have 150,000 ounces of put options with an average strike price of \$406 per ounce remaining at March 31, 2006.

To acquire the put options in the third quarter of 2005, we sold 90,000 ounces of call options with a strike price of \$525 per ounce. The revenues from the sale of the call options exactly offset the cost of the put options bought in the same quarter. Increasing gold prices in the first quarter of 2006 added \$2.2 million to the settlement costs of the calls and accordingly we recorded a \$2.2 million mark-to-market loss on the calls. In addition a 5,000 ounce tranche was exercised in March 2006 requiring a \$0.2 million payment to the counterparty. The payment is included in derivative loss in the Statement of Operations. We have 60,000 ounces of call options with an average strike price of \$525 per ounce remaining at March 31, 2006.

Foreign Currency Forward Positions — To help control the potential adverse impact of fluctuations in foreign currency exchange rates on the cost of equipment and materials we expect to purchase during the 2006 construction phase of the Bogoso sulfide expansion project, we entered into Rand and Euro forward contracts. These contracts, established without cost, had a positive fair value of \$1.0 million at December 31, 2005 and \$0.9 million at March 31, 2006. The \$0.1 million loss was recognized in our statement of operations at March 31, 2006.

Table of Contents

The following table summarizes our derivative contracts at March 31, 2006:

At March 31, 2006	Amount Outstanding/ Average Price			Total / Average
	2006	2007	Thereafter	
Cash-settled Forward Price Contracts (EURO Ressources)				
Ounces (thousands)	22.8	17.1	51.3	91.2
Average price per ounce (\$)	421	430	459	443
Gold Put Options (Golden Star)				
Ounces (thousands)	112.5	37.5	—	150
Average price per ounce (\$)	407	405	—	406
Gold Call Options (Golden Star)				
Ounces (thousands)	45	15	—	60
Average price per ounce (\$)	525	525	—	525
Foreign Exchange Forward Contracts (Golden Star)				
South African Rand (millions)	67.3	—	—	67.3
Average Rate (ZAR/\$)	6.8	—	—	6.8
Euros (EUR millions)				
Average Rate (EUR /\$)	1.0	—	—	1.0
	0.80	—	—	0.80

The puts, calls and foreign exchange forward contracts are comprised of numerous individual contracts each with a different settlement date.

Fair Value of Derivatives	March 31, 2006	December 31, 2005	(Expense)/ Gain
Cash-settled forward gold price agreements	\$(14,859)	\$ (9,560)	\$(5,299)
Puts	6	74	(69)
Calls	(4,441)	(2,250)	(2,190)
Rand forward purchases	878	1,146	(268)
Euros forward purchases	(39)	(162)	123
Unrealized loss	\$(18,455)	\$(10,752)	\$(7,703)
Realized losses:			
Cash-settled forward gold price agreements			(757)
Calls			(210)
Total gains/(losses)			\$(8,670)

13. Asset Retirement Obligations

Our Asset Retirement Obligations (“ARO”) are equal to the present value of all estimated future closure costs associated with reclamation, demolition and stabilization of our Bogoso/Prestea and Wassa mining and ore processing properties. Included in this liability are the costs of mine closure and reclamation, processing plant and infrastructure demolition, tailings pond stabilization and reclamation and environmental monitoring costs. While the majority of these costs will be incurred near the end of the mines’ lives, it is expected on-going reclamation costs will be incurred prior to mine closure. These costs are recorded against the current ARO provision.

The changes in the carrying amount of the ARO during the first quarter of 2006 were as follows:

Balance at December 31, 2005	\$11,393
Accretion expense	168
Cost of reclamation work performed	(185)
New AROs incurred during the period	750
Balance at March 31, 2006	\$12,126
Current portion	\$ 2,855
Long term portion	\$ 9,271

Table of Contents

14. Commitments and Contingencies

Our commitments and contingencies include the following items:

- (a) **Environmental Regulations** — The Company's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and are generally becoming more restrictive as such we cannot predict the full amount of our future expenditure to comply with these laws and regulations. We conduct our operations so as to protect the environment and believe our operations are in compliance with applicable laws and regulations in all material respects.
- (b) **Environmental Bonding in Ghana** — In 2005, pursuant to a reclamation bonding agreement between the Ghana Environmental Protection Agency ("EPA") and WGL, we bonded \$3.0 million to cover future reclamation obligations at Wassa. To meet the bonding requirements we established a \$2.85 million letter of credit and deposited \$0.15 million of cash with the EPA. In addition, pursuant to a bonding agreement between the EPA and BGL we bonded \$9.5 million in early 2006 to cover our future obligations at Bogoso/Prestea. To meet these requirements we deposited \$0.9 million of cash with the EPA with the balance covered by a letter of credit.
- (c) **Cash Restricted for Environmental Rehabilitation Liabilities** — In 1999, we were required, according to the acquisition agreement with the sellers of BGL, to restrict \$6.0 million of cash to be used for the ongoing and final reclamation and closure costs at Bogoso. Between 1999 and 2001 we withdrew \$2.6 million of the restricted cash to cover our out-of-pocket cash reclamation costs. There have been no disbursements of the restricted cash since 2001. Now that BGL has met the EPA's environmental bonding requirements, we will seek to amend the agreement with the original sellers of BGL and obtain their consent to allow us to withdraw the remaining \$3.4 million of restricted cash.
- (d) **Royalties** -
 - (i) **Dunkwa Properties:** As part of the acquisition of the Dunkwa properties in August 2003, we agreed to pay the seller a net smelter return royalty on future gold production from the Mansiso and Asikuma properties. Per the acquisition agreement, there will be no royalty due on the first 200,000 ounces produced from Mampon which is located on the Asikuma property. The amount of the royalty is based on a sliding scale which ranges from 2% of net smelter return at gold prices at or below \$300 per ounce up to 3.5% for gold prices in excess of \$400 per ounce.
 - (ii) **Government of Ghana:** Under the laws of Ghana, a holder of a mining lease is required to pay an annual royalty of not less than 3% and not more than 6% of the total revenues earned from the lease area. The royalty is payable on a quarterly basis. We currently pay a 3% annual royalty on gold production from Bogoso/Prestea and Wassa production.
 - (iii) **Benso:** Benso is subject a 1.5% smelter return royalty and a \$1.00 per ounce gold production royalty. The smelter return royalty may be purchased for \$4.0 million (or \$6.0 million if a feasibility study indicates more than 3.5 million ounces of recoverable gold) and the gold production royalty may be purchased for \$0.5 million.
 - (iv) **Prestea Underground** — The Prestea Underground is subject to a 2.5% net profits interest on future income. Ownership of the 2.5% net profit interest is currently held by the bankruptcy trustee overseeing liquidation of Prestea Gold Resources, our former joint venture partner in the Prestea Underground.
- (e) **Afema Project** — On March 29, 2005 we entered into an agreement with Societe d'Etat pour le Developpement Minier de la Cote d'Ivoire ("SO.DE.MI."), the Cote d'Ivoire state mining and exploration company, to acquire their 90% interest in the Afema gold property in south-east Cote d'Ivoire. A \$0.1 million initial payment to SO.DE.MI. provided us the right to carry out a six month detailed technical due diligence program which was essentially completed by September of 2005. We now have the right to acquire 100% of SO.DE.MI.'s rights in the Afema property for an additional \$1.5 million. A six month extension to March 2006 was subsequently granted by SO.DE.MI. to allow Golden Star to carry out further due diligence work and to analyze the large quantity of data collected during 2005 before exercising our

Table of Contents

right to acquire. Prior to the expiry of the option, we contacted SO.DE.MI. indicating our desire to exercise the option subject to SO.DE.MI. clarifying that (i) Golden Star will be indemnified in respect of the past environmental degradation at Afema, and (ii) that no other claims against the property exist. In addition to the acquisition payments, we agreed to pay SO.DE.MI. a royalty on any future gold production from the Afema property. The royalty is indexed to the gold price and ranges from 2% of net smelter returns at gold prices below \$300 per ounce to 3.5% of net smelter returns for gold prices exceeding \$525 per ounce. If we proceed with the \$1.5 million payment to acquire full rights to the property, the purchase agreement requires us to spend an additional \$3.5 million on exploration work at Afema, subject to exploration success, over the following three and a half years.

- (f) We are engaged in routine litigation incidental to our business. No material legal proceedings, involving us or our business are pending, or, to our knowledge, contemplated, by any governmental authority. We are not aware of any material events of non-compliance with environmental laws and regulations.

15. Share Capital

Changes in share capital during the three months ended March 31, 2006 were:

	Shares	Amount
Balance as of December 31, 2005	205,954,582	\$522,510
Common shares issued:		
Option exercises	1,307,176	3,259
Reclassification of warrants to capital surplus	—	(2,575)
Bonus shares and other	4,000	(134)
Balance as of March 31, 2006	207,265,758	\$523,060

16. Warrants

The following warrants were outstanding as of March 31, 2006:

Issued with:	Date issued	Warrants outstanding	Exercise price	Expiration date
Equity Offering	February 14, 2003	8,448,334	Cdn\$4.60	February 14, 2007
St. Jude Acquisition	December 21, 2005	3,240,000	Cdn\$4.17	November 20, 2008
Total		11,688,334		

The 8.4 million warrants expiring February 14, 2007 are traded on the Toronto Stock Exchange under the symbol GSC.WT.A. No warrants were exercised during the quarters ended March 31, 2005 and 2006.

17. Stock Based Compensation

Stock Options — We have one stock option plan, the 1997 Stock Option Plan, as amended (the “GSR Plan”) and options are granted under this plan from time to time at the discretion of the Compensation Committee. Options granted are non-assignable and are exercisable for a period of ten years or such other period as stipulated in a stock option agreement between Golden Star and the optionee. Under the GSR Plan, we may grant options to employees, consultants and directors of the Company or its subsidiaries for up to 15,000,000 shares of common stock. Options take the form of non-qualified stock options, and the exercise price of each option is not less than the market price of our stock on the date of grant. Options typically vest over periods ranging from immediately to four years from the date of grant. Vesting periods are determined at the discretion of the Compensation Committee.

In addition to options issued under the GSR Plan, there were 2,533,176 options issued to various employees of St. Jude of which 1,332,000 remain unexercised as of March 31, 2006. All of the remaining unexercised shares issued to St. Jude employees are rested. All figures shown below include the options issued to St. Jude employees.

Table of Contents

Amounts recognized in the statements of operations with respect to our stock option plan are as follows:

	Three Months ended March 31,	
	2006	2005
Total cost of share-based payment plan during the quarter	\$882	\$558
Amount of related income tax benefit recognized to income	—	—

We granted 746,000 and 514,000 options during the quarters ended March 31, 2006 and March 31, 2005, respectively. The Company recognized \$0.9 million and \$0.6 million of non-cash compensation expense in the quarters ended March 31, 2006 and 2005, respectively.

The fair value of options granted during the first quarters of 2006 and 2005 were estimated at the grant dates using the Black-Scholes option-pricing model based on the assumptions noted in the following table:

	Three months ended March 31,	
	2006	2005
Expected volatility	62.5% to 96.1%	34.9%
Risk-free interest rate	2.44% to 2.78%	3.15% to 3.52%
Expected lives	3.5 to 5 years	3.5 to 5 years
Dividend yield	0%	0%

Expected volatilities are based on the historical volatility of Golden Star's shares. Golden Star uses historical data to estimate share option exercise and employee departure behavior used in the Black-Scholes model; groups of employees that have similar historical behavior are considered separately for valuation purposes. The expected term of the options granted is derived from the output of the option pricing model and represents the period of time that the option granted are expected to be outstanding; the range given below results from certain groups of employees exhibiting different post-vesting behaviors. The risk-free rate for periods within the contractual term of the option is based on the Chartered Bank Administered Interest rates in effect at the time of the grant.

A summary of option activity under the Plan as of March 31, 2006 and changes during the quarter the ended is presented below:

	Options (000')	Weighted- Average Exercise price (Cdn\$)	Weighted- Average Remaining Contractual Term (Years)	Aggregate intrinsic value (\$000)
Outstanding as of December 31, 2005	7,390	2.75	—	—
Granted	746	3.94	—	—
Exercised	(1,307)	1.90	—	—
Forfeited	(120)	7.08	—	—
Outstanding as of March 31, 2006	6,709	2.97	5.8	4,534
Exercisable at March 31, 2006	5,598	2.51	4.3	4,534

The weighted-average grant date fair value of share options granted during the quarters ended March 31, 2006 and March 31, 2005 was Cdn\$2.50 and Cdn\$1.58, respectively. The intrinsic value of options exercised during the quarters ended March 31, 2006 and 2005 was \$1.7 million and \$0.1 million, respectively.

Table of Contents

A summary of the status of Golden Star's non-vested options as March 31, 2006 and changes during the quarter ended March 31, 2006, is presented below:

	Number of options ('000)	Weighted-Average grant date fair value (Cdn\$)
Nonvested at January 1, 2006	1,062	1.64
Granted	746	1.84
Vested	(629)	1.49
Forfeited	(68)	2.12
Nonvested at March 31, 2006	1,111	1.89

As of March 31, 2006 there was a total unrecognized compensation cost of \$2.4 million related to non-vested share-based compensation arrangement granted under the GSR Plan. That cost is expected to be recognized over a weighted-average period of 2.8 years. The total fair value of shares vested during the quarters ended March 31, 2006 and March 2005 was Cdn\$1.0 million and Cdn\$0.4 million, respectively.

Stock Bonus Plan — In December 1992, we established an Employees' Stock Bonus Plan (the "Bonus Plan") for any full-time or part-time employee (whether or not a director) of the Company or any of our subsidiaries who has rendered meritorious services which contributed to the success of the Company or any of its subsidiaries. The Bonus Plan provides that a specifically designated committee of the Board of Directors may grant bonus common shares on terms that it might determine, within the limitations of the Bonus Plan and subject to the rules of applicable regulatory authorities. The Bonus Plan, as amended, provided for the issuance of 900,000 common shares of bonus stock of which 499,162 common shares have been issued as of March 31, 2006.

During the quarters ended March 31, 2006 and 2005 we issued 4,000 and 45,342 common shares, respectively, to employees under the Bonus Plan.

18. Income Taxes

Income tax (expense) benefit attributable to net income before income taxes consists of:

	Three months ended March 31,	
	2006	2005
	(Restated-Note 25)	
Current		
Canada	\$(4,926)	\$—
Foreign	—	—
Future		
Canada	—	—
Foreign	6,137	54
Total	\$ 1,211	\$54

The current tax expense recorded for the quarter ended March 31, 2006 is for the gain on sale of the Moto shares. The future tax benefit recorded in the quarter ended March 31, 2006 relates primarily to the EURO derivative loss and the decrease in the Ghanaian tax rate. Golden Star records a valuation allowance against any portion of its remaining future income tax assets that it believes will, more likely than not, fail to be realized.

Table of Contents

19. Earnings per Common Share

The following table provides a reconciliation between basic and diluted earnings per common share:

	Three months ended March 31,	
	2006	2005
	(Restated-Note 25)	
Net income/(loss)	\$19,323	\$(2,223)
Shares (in millions)		
Weighted average number of common shares	206.8	142.3
Impact of Dilutive Securities:		
Options	2.3	1.9
Warrants	—	0.2
Weighted average number of dilutive common shares	209.1	144.4
Basic Income/(Loss) per Common Share	\$ 0.093	\$(0.016)
Diluted Income/(Loss) per Common Share	\$ 0.092	\$(0.016)

20. Supplemental Cash Flow Information

There was no cash paid for income taxes during the quarters ended March 31, 2006 and 2005. Cash paid for interest was \$0.5 million and \$0.1 million for March 31, 2006 and 2005, respectively. A total of \$12,000 and nil of depreciation was included in general and administrative costs or was capitalized into projects for the quarters ended March 31, 2006 and 2005 respectively.

21. Operations by Segment and Geographic Area

The following segment and geographic data includes revenues based on product shipment origin and long-lived assets based on physical location. The corporate entity is incorporated in Canada and domiciled in the United States.

As of and for the three months ended March 31	Africa - Ghana			South America	Corporate	Total
	Bogoso/ Prestea	Wassa	Other			
	(Restated-Note 25)					(Restated-Note 25)
2006						
Revenues	\$ 11,554	\$ 13,428	\$ 15	\$ 1,865	\$ 530	\$ 27,392
Net Income/(Loss)	(882)	(2,137)	3,623	(3,072)	21,791	19,323
Total Assets	174,379	105,130	207,263	12,464	102,748	601,984
2005						
Revenues	\$ 16,717	\$ —	\$ —	\$ 1,072	\$ 262	\$ 18,051
Net Income/(Loss)	1,826	(49)	—	(62)	(3,938)	(2,223)
Total Assets	94,974	78,845	32,040	2,560	50,735	259,154

22. Related Parties

During the first quarter of 2006 we obtained legal services from a legal firm to which our Chairman is counsel. Total value of all services purchased from this law firm during the first quarter was \$0.4 million. Our Chairman did not personally perform any legal services for us during the first quarter nor did he benefit directly or indirectly from payments for the services performed by the firm.

During the first quarter of 2006, a corporation controlled by Michael A. Terrell, a director of Golden Star, provided management services to St. Jude for which it was paid Cdn\$0.13 million. Mr. Terrell became a director of Golden Star following our acquisition of St. Jude in December 2005. Mr. Terrell's company ceased doing business with St. Jude at the end of March 2006.

Table of Contents

23. Financial Instruments

Fair Value — Our financial instruments are comprised of cash, short-term investments, accounts receivable, restricted cash, accounts payable, accrued liabilities, accrued wages, payroll taxes, derivatives and debt. The fair value of cash and short-term investments, derivatives, accounts receivable, accounts payable, accrued liabilities and accrued wages, payroll taxes and current debt equals their carrying value due to the short-term nature of these items. The fair value of restricted cash is equal to the carrying value as the cash is invested in short-term, high-quality instruments. The fair value of the debt is essentially equal to its carrying value.

24. Generally Accepted Accounting Principles in the United States

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in Canada, which differ from US GAAP. The effect of applying US GAAP to our financial statements is shown below.

(a) Consolidated Balance Sheets Under US GAAP

	March 31, 2006 (Restated— Notes d1 and d9)	December 31, 2005 (Restated— Notes d1 and d9)
ASSETS		
Current assets:		
Cash and cash equivalents	\$ 86,873	\$ 89,709
Accounts receivable	7,891	6,560
Inventories (Note d1)	26,783	23,181
Future tax assets	2,002	6,248
Fair value of derivatives	884	1,220
Deposits	15,490	5,185
Other current assets	809	686
Total current assets	140,732	132,789
Restricted cash	5,258	3,865
Long term investments (Notes d2 and d3)	—	15,182
Deferred exploration and development costs (Notes d4 and d5)	—	—
Property, plant and equipment (Note d6)	88,081	83,813
Mine construction in progress	61,770	36,707
Mining properties (Notes d4, d5 and d6)	238,038	237,153
Deferred stripping (Note d7)	—	1,548
Loan acquisition costs	955	1,020
Future tax asset	13,681	8,223
Other assets	509	2,144
Total assets	\$ 549,024	\$ 522,443
LIABILITIES		
Current liabilities	\$ 47,159	\$ 40,815
Long term debt (Note d8)	69,635	66,632
Asset retirement obligations	9,271	8,286
Future tax liability	45,380	45,072
Fair value of long term derivatives (Note d9)	20,979	15,842
Total liabilities	192,424	176,647
Minority interest	1,630	1,964
Commitments and contingencies	—	—
SHAREHOLDERS' EQUITY		
Share capital (Note d10)	524,246	523,696
Contributed surplus (Notes d9 and d11)	6,772	4,419
Accumulated comprehensive income and other (Note d3)	1,316	9,495
Deficit	(177,364)	(193,778)
Total shareholders' equity	354,970	343,832
Total liabilities and shareholders' equity	\$ 549,024	\$ 522,443

Table of Contents

(b) Consolidated Statements of Operations under

US GAAP	Three months ended March 31,	
	2006 (Restated- Notes d1 and d9)	2005 (Restated- Notes d1 and d9)
Net income/(loss) under Cdn GAAP	\$19,323	\$(2,223)
Deferred exploration expenditures expensed per US GAAP (Note d4)	(2,886)	(4,574)
Depreciation and amortization differences — Wassa (Note d6)	1,475	(4,654)
Write-off of deferred exploration properties (Note d4)	—	1,083
Derivative loss (Note d9)	(621)	5,430
Other (Notes d4 and d8)	(4)	40
Net income/(loss) under US GAAP before minority interest	17,287	(4,898)
Minority interest, as adjusted	158	2
Net Income/(loss) under US GAAP	17,445	(4,896)
Other comprehensive income — gain on marketable securities (Note d3)	—	1,049
Comprehensive income/(loss)	\$17,445	\$(3,847)
Basic net income/(loss) per share under US GAAP before cumulative effect of change in accounting method	\$ 0.084	\$(0.034)
Diluted net income/(loss) per share under US GAAP before cumulative effect of change in accounting method	\$ 0.083	\$(0.034)

(c) Consolidated Statements of Cash Flows under

US GAAP	Three months ended March 31,	
	2006	2005
Cash provided by (used in):		
Operating Activities	\$ (8,423)	\$ (7,041)
Investing activities	(240)	4,434
Financing activities	5,737	6,749
Increase/(Decrease) in cash and cash equivalents	(2,926)	4,142
Cash and cash equivalent beginning of period	89,709	12,877
Cash and cash equivalents end of period	\$86,873	\$17,019

(d) Notes:

- (1) Inventories have been restated to correct errors in computations of ore stockpile values and in-process inventories. The following table shows the changes to accounts effected by the corrections:

(In millions of dollars except per share data)	Quarter ended March 31, 2006		Quarter ended June 30, 2006		Quarter ended September 30, 2006

Diluted net income per share	0.082	0.083	0.132	0.127	0.152	0.140

- (2) Minority investments in entities whose major business is mineral exploration are deemed for US GAAP to be equivalent to exploration spending and are expensed as incurred.
- (3) Under US GAAP, investments in marketable equity securities are marked to fair value at the end of each period with gains and losses recognized in the statement of operations. Under Cdn GAAP gains and losses on marketable equity securities are noted in the foot notes and recognized in the statement of operations only when the investment is sold.
- (4) Under US GAAP, exploration, acquisition and general and administrative costs related to exploration projects are charged to expense as incurred. Under Cdn GAAP, exploration, acquisition and direct general and administrative costs related to exploration projects are capitalized. In each subsequent period, the exploration, engineering, financial and market information for each exploration project is reviewed by management to determine if any of the capitalized costs are impaired. If found impaired, the asset's cost basis is reduced in accordance with Cdn GAAP provisions.
- (5) Under US GAAP, the initial purchase cost of mining properties is capitalized. Pre-acquisition costs and subsequent development costs incurred, until such time as a final feasibility study is completed, are expensed in the period incurred. Under Cdn GAAP, the purchase costs of new mining properties as well as all development costs incurred after acquisition are capitalized and subsequently reviewed each period for impairment. If found impaired, the asset's cost basis is reduced in accordance with Cdn GAAP provisions.
- (6) Under US GAAP new production facilities are placed in service once the facility has been constructed and fully tested to the point where it can be shown that it is capable of producing its intended product. Under Cdn GAAP new production facilities are placed in service when output reaches a significant portion of the facility's design capacity. As such, the new Wassa mine and processing operation was placed in service on January 1, 2005 for US GAAP purposes and was

Table of Contents

placed in service on April 1, 2005 for Cdn GAAP purposes. All operating expenses, including ARO accretion, depreciation, depletion and amortization and work in process inventory adjustments were recognized in the statement of operations for US GAAP during the first quarter of 2005 while such costs were capitalized net of revenues generated for Cdn GAAP.

- (7) In March 2005, the Emerging Issues Task Force of the Financial Accounting Standards Board issued statement 04-6 “Accounting for Stripping Costs Incurred During Production in the Mining Industry” (“EITF 04-6”) which precludes deferral of stripping costs during a mine’s production phase. EITF 04-6 requires that deferred stripping costs be considered a variable production cost. The new pronouncement is effective January 1, 2006 and transition provisions allow any remaining balances in deferred stripping asset accounts to be closed directly to retained earnings on January 1, 2006. In Canada the Emerging Issues Committee (“EIC”) has issued EIC 160 “Stripping Costs Incurred in the Production Phase of the Mining Operation” which concludes that deferred stripping costs during the production phase of a mine’s life should generally be considered a variable production cost and included in the cost of inventory unless it can be shown the stripping costs represent a betterment to the mineral property.
- (8) For US GAAP purposes, 100% of the \$50.0 million of convertible notes issued in the second quarter of 2005 was classified as a liability. Under Cdn GAAP, the fair value of the conversion feature is classified as equity and the balance is classified as a liability. Under Cdn GAAP, the liability portion is accreted each period in amounts which will increase the liability to its full amount as of the maturity date and the accretion is recorded as interest expense.
- (9) Under US GAAP the fair value of warrants denominated in currencies other than the company’s functional currency are treated as a derivative liability. The derivative liability of such warrants is market to market at the end of each period and the change in fair value is recorded in the statement of operations. Under Cdn GAAP the issue-date fair value of all warrants is treated as a component of shareholders’ equity and are recorded as contributed surplus and are not marked to their fair value. This US GAAP reconciliation has been restated to take effect of the differences between Cdn and US GAAP as described in this note.
- (10) Numerous transactions since the Company’s organization in 1992 have contributed to the difference in share capital versus the Cdn GAAP balance, including: (i) under US GAAP, compensation expense was recorded for the difference between quoted market prices and the strike price of options granted to employees and directors under stock option plans while under Cdn GAAP, recognition of compensation expense was not required; (ii) in May 1992 our accumulated deficit was eliminated through an amalgamation (defined as a quasi-reorganization under US GAAP); — under US GAAP the cumulative deficit was greater than the deficit under Cdn GAAP due to the past write-offs of certain deferred exploration costs; and (iii) gains recognized in Cdn GAAP upon issuances of subsidiaries’ shares are not allowed under US GAAP; (iv) when warrants denominated in currencies other than the company’s functional currency are exercised, the difference between the fair value and the strike price of the warrant is recorded as share capital for US GAAP purposes, but under Cdn GAAP only the strike price is recorded as share capital on exercise.
- (11) In December 2004, the FASB finalized SFAS No. 123R Share-Based Payment, amending SFAS No. 123, effective beginning our first quarter of fiscal 2006. SFAS 123R requires the Company to expense stock options based on grant date fair value in its financial statements. Further, the SFAS 123R requires additional accounting related to the income tax effects and additional disclosure regarding the cash flow effects resulting from share-based payment arrangements. In March 2005, the U.S. Securities and Exchange Commission (the “SEC”) issued Staff Accounting Bulletin (“SAB”) No. 107, which expresses views of the SEC staff regarding the interaction between SFAS 123R and certain SEC rules and regulations, and provides the staff’s views regarding the valuation of share-based payment arrangements for public companies. We adopted the optional provisions of FAS 123 in 2003 and have expensed share based payments since that time. We have expanded share-based payment disclosures as required by of SFAS No. 123R at March 31, 2006.

25. Restatement

This Form 10-Q/A has been amended to reflect correction of errors related to the computation of ore stockpile and in-process inventory balances and mining operation costs. The impact of the restatement on the first, second and third quarters of 2006 is shown in the table below.

(In millions of dollars except for per share data)	March 31, 2006		June 30, 2006		September 30, 2006	
	Originally	Restated	Originally	Restated	Originally	Restated

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the accompanying unaudited consolidated financial statements and related notes. The financial statements have been prepared in accordance with accounting principles generally accepted in Canada ("Cdn GAAP"). For a reconciliation to accounting principles generally accepted in the United States ("US GAAP"), see Note 24 to the consolidated financial statements. This Management's Discussion and Analysis of Financial Condition and Results of Operations includes information available to May 9, 2006.

OUR BUSINESS

Through our subsidiaries we own a controlling interest in four significant gold properties in southern Ghana in West Africa: the Bogoso/Prestea property, which is comprised of the adjoining Bogoso and Prestea surface mining leases ("Bogoso/Prestea"), the Prestea Underground property ("Prestea Underground"), the Wassa property ("Wassa"), and the Hwini-Butre and Benso concessions ("St. Jude Properties"). In addition to these gold properties we hold various other exploration rights and interests and are actively exploring in a variety of locations in West Africa and South America.

Bogoso/Prestea is owned by our 90% owned subsidiary Bogoso Gold Limited ("BGL"). BGL was acquired in 1999. Bogoso/Prestea produced and sold 131,898 ounces of gold during 2005.

Through another 90% owned subsidiary, Wexford Goldfields Limited ("WGL"), we own the Wassa gold mine located some 35 kilometers east of Bogoso/Prestea. Construction and commissioning of Wassa's new processing plant and open pit mine was completed at the end of March 2005 and the project was placed in service on April 1, 2005. Wassa produced and sold 24,205 ounces of gold in the quarter ending March 31, 2006 and 93,275 ounces since its April 2005 in-service date.

The Prestea Underground is located on the Prestea property and consists of a currently inactive underground gold mine and associated support facilities. BGL owns a 90% operating interest in the Prestea Underground. We are currently conducting exploration and engineering studies to determine if the underground mine can be reactivated on a profitable basis.

Through our 100% owned subsidiary, St. Jude Resources Ltd. ("St. Jude"), we own the St. Jude Properties in southwest Ghana. The St. Jude Properties consist of the Hwini-Butre and Benso concessions which together cover an area of 201 square kilometers. Both concessions contain undeveloped zones of gold mineralization. These two concessions are located between 40 and 80 kilometers south of Wassa. The mineralized zones have been delineated through the efforts of the prior owner who conducted extensive exploration work from the mid-1990s to 2005.

We hold interests in several gold exploration projects in Ghana and elsewhere in West Africa including Sierra Leone, Ghana, Burkina Faso, Niger and Cote d'Ivoire. We also hold and manage exploration properties in Suriname and French Guiana in South America. We hold indirect interests in gold exploration properties in Peru and Chile through a 17% shareholding investment in Goldmin Consolidated Holdings. We also own a 53% interest in EURO a French registered, publicly-traded royalty holding company (formerly known as Guyanor Ressources S.A.) which owns a royalty interest based on gold production at Cambior Inc.'s Rosebel gold mine in Suriname.

Our corporate headquarters is located in Littleton, Colorado. Our accounting records are kept in compliance with Canadian GAAP and all of our operations, except for certain exploration projects, transact business and keep financial records in US dollars.

NON-GAAP FINANCIAL MEASURES

In this Form 10-Q, we use the terms "total operating cost per ounce," "total cash cost per ounce" and "cash operating cost per ounce."

Total operating cost per ounce for a period is equal to "Total mine operating costs" for the period, as found on our consolidated statements of operations divided by the ounces of gold sold in the period. Total mine operating costs include all mine-site operating costs, including the costs of mining, processing, maintenance, work in process inventory changes, mine-site overhead, production taxes and royalties, mine site depreciation, depletion, amortization,

Table of Contents

asset retirement obligations and by-product credits, but do not include exploration costs, corporate general and administrative expenses, impairment charges, corporate business development costs, gains and losses on asset sales, interest expense, mark-to-market gains and losses on derivatives, foreign currency gains and losses, gains and losses on investments and income tax.

Total cash cost per ounce for a period is equal to “Mining operations” costs for the period, as found on our consolidated statements of operations divided by the number of ounces of gold sold during the period.

Cash operating cost per ounce for a period is equal to “total cash costs” for the period less production royalties and production taxes, divided by the number of ounces of gold sold during the period.

The calculations of total cash cost per ounce and cash operating cost per ounce are in compliance with an industry standard for such measures established in 1996 by the Gold Institute, a non-profit industry group.

The following table shows the derivation of these measures and a reconciliation of “total cash cost per ounce” and “cash operating cost per ounce.”

Derivation of Total Mine Operating Cost	For the three months ended March 31, 2006		
	Wassa (1)	Bogoso/Pretea (Restated-Note 25)	Total (Restated-Note 25)
Mining operations	\$12,199	\$10,819	\$23,018
Mining related depreciation, depletion & amortization	3,125	2,452	5,577
Accretion of asset retirement obligations	48	120	168
Total mine operating costs	\$15,372	\$13,391	\$28,763
Ounces sold	24,205	20,735	44,940
Derivation of Costs per Ounce:			
Total mine operating cost per ounce — GAAP (\$/oz)	635	646	640
Less mine depreciation, depletion & amortization (\$/oz)	129	118	124
Less accretion of asset retirement obligation (\$/oz)	2	6	4
Total cash cost per ounce (\$)	504	522	512
Less royalties and production taxes (\$/oz)	17	16	17
Cash operating cost per ounce (\$)	487	506	495

Table of Contents

Derivation of Total Mine Operating Cost	For the three months ended March 31, 2005		
	Wassa (1)	Bogoso/Prestea	Total
Mining operations	\$—	\$12,076	\$12,076
Mining related depreciation, depletion & amortization	—	2,172	2,172
Accretion of asset retirement obligations	—	187	187
Total mine operating costs	\$—	\$14,435	\$14,435
Ounces sold	—	39,164	39,164
Derivation of Costs per Ounce:			
Total mine operating cost per ounce — GAAP (\$/oz)	—	369	369
Less mine depreciation, depletion & amortization (\$/oz)	—	55	55
Less accretion of asset retirement obligation (\$/oz)	—	4	4
Total cash cost per ounce (\$)	—	309	309
Less royalties and production taxes (\$/oz)	—	12	12
Cash operating cost per ounce (\$)	—	297	297

(1) The Wassa mine did not commence commercial production until April 2005.

We use total cash cost per ounce and cash operating cost per ounce as key operating indicators. We monitor these measures monthly, comparing each period's values to prior period's values to detect trends that may indicate increases or decreases in operating efficiencies. These measures are also compared against budget to alert management to trends that may cause actual results to deviate from planned operational results. We provide these measures to our investors to allow them to also monitor operational efficiencies of our mines. We calculate these measures for both individual operating units and on a consolidated basis.

Total cash cost per ounce and cash operating cost per ounce should be considered as non-GAAP financial measures as defined in SEC Regulation S-K Item 10 and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. There are material limitations associated with the use of such non-GAAP measures. Since these measures do not incorporate revenues, changes in working capital and non-operating cash costs, they are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Changes in numerous factors including, but not limited to, mining rates, milling rates, gold grade, gold recovery, and the costs of labor, consumables and mine site general and administrative activities can cause these measures to increase or decrease. We believe that these measures are the same as, or similar to the measures of other gold mining companies, but may not be comparable to similarly titled measures in every instance.

Ownership — All figures and amounts in this Item 2 are shown on a 100% basis, which represents our current beneficial interest in gold production and revenues. Once all capital has been repaid, the Government of Ghana would receive 10% of the dividends distributed from the subsidiaries owning the Bogoso/Prestea and Wassa mines.

Restatement of Prior Periods — In early 2006, it was determined that hedge accounting had been improperly applied by our subsidiary, EURO Ressources S.A. ("EURO") for its cash-settled forward gold price agreements during the first three quarters of 2005. As a result, our Form 10-Qs for the first three quarters of 2005 have been amended to apply derivative accounting rather than hedge accounting to EURO's derivatives. In this Form 10-Q, comparative amounts from the first quarter of 2005 reflect this restatement. The initial loss of \$(1.4) million was restated to a loss of \$(2.2) million.

BUSINESS STRATEGY AND DEVELOPMENT

Since 1999, our business and development strategy has been focused primarily on the acquisition of producing and development stage gold properties in Ghana and on the exploration, development and operation of these properties. Since 1999, our exploration efforts have been focused on Ghana, other West African countries and South America.

Table of Contents

In line with our business strategy, we acquired Bogoso in 1999 and have operated the Bogoso processing plant since that time. In 2001, we acquired Prestea and have been mining at Prestea since late 2001. In late 2002, we acquired Wassa and following completion of a feasibility study, constructed a new CIL processing plant at Wassa which began commercial operation in April 2005. We are currently constructing a new BIOX(R) processing plant at Bogoso designed to expand annual production at Bogoso/Prestea from approximately 130,000 ounces in 2005 to approximately 370,000 ounces in 2007. Based on currently known reserves we expect a mine life of approximately seven years at Bogoso/Prestea. Achievement of this target is subject to numerous risks. See the discussion of Risk Factors in Item 1A of our 2005 Form 10-K.

In late 2005, we acquired the St. Jude Properties where we plan to carry out geological and engineering studies during 2006 to determine the economic feasibility of these undeveloped gold properties.

Our overall objective since 1999 has been to grow our business to become a mid-tier gold producer (which we understand to be a producer with annual production of approximately 500,000 ounces). Assuming the benefit of a full year's production from the Bogoso expansion project in 2007, we anticipate reaching this goal in 2007. We continue to actively investigate potential acquisition and merger candidates which could further increase our annual gold production, however we presently have no agreement or understanding with respect to any specific potential transaction.

SIGNIFICANT TRENDS AND EVENTS DURING THE FIRST QUARTER OF 2006

Sale of Shares of Moto Goldmines Limited

In March 2006, we exercised our remaining one million Moto Goldmines Limited ("Moto") warrants bringing our total ownership in Moto to six million common shares and immediately afterward sold all six million common shares in a bought-deal transaction in Canada for Cdn\$7.50 per share. The sale of the six million shares resulted in net proceeds to Golden Star of \$38.9 million (Cdn\$45.0 million). The sale realized approximately \$30.3 million of pre-tax capital gain for Golden Star, which was recognized in income in the first quarter. A \$4.9 million non-cash tax expense was recognized on the gain.

Gold Prices

Gold prices have generally trended upward during the last five years, from a low of just under \$260 per ounce in early 2001 to a high of \$700 per ounce in May 2006. Much of the price increase during this period appears to be related to the fall in the value of the US dollar versus other major foreign currencies, but in recent quarters prices appear to be responding to additional influences including an increased demand for gold as an investment with a resulting increase in the rate of increase. Our realized gold price for shipments during the first quarter of 2006 averaged \$554 per ounce compared to \$426 per ounce average price received in the first quarter of 2005.

Ore processing at Bogoso/Prestea

As has been the case since mid-2004, Bogoso/Prestea continues to deal with ores that are not well suited for processing in the existing Bogoso processing plant. The Bogoso plant was originally configured to process oxide and other non-refractory ores. Since mid-2004, when oxide ores were depleted on the north end of the Prestea property, the Bogoso plant has sought to process ore from the Plant-North pit at Prestea which were thought to be relatively non-refractory. The Plant-North ores have proven more difficult to treat than anticipated, and recovery and plant through-put has been lower than expected as a result. We are now stockpiling certain of the more refractory Plant-North ores as feed for the new BIOX(R) plant scheduled for start-up in the fourth quarter of 2006. Additional oxide and non-refractory ore from the sulfide pit pre-stripping will supplement feed to the existing Bogoso plant in the second and third quarters and in the second half of 2006 we expect to start mining oxide ores from the new Pampe project located 18 kilometers west of Bogoso.

RESULTS OF OPERATIONS

First quarter 2006 Compared to First quarter 2005

Summary — Net income totaled \$19.3 million or \$0.093 per share during the first quarter of 2006, versus a net loss of \$(2.2) million or \$(0.016) per share during the first quarter of 2005. The major factor contributing to the earnings in the first quarter of 2006 was a \$30.3 million gain on the sale of shares of Moto (see Trends and Events section above). Off-setting the gain on the sale of the Moto shares is an \$8.7 million loss on derivatives and a \$4.3 million operating loss. The derivative loss consists of an unrealized non-cash loss of \$7.7 million and a realized loss of \$1.0 million. The unrealized loss on the derivatives included a \$5.3 million loss on the cash-settled forward gold price agreements at EURO. As gold prices continued to increase during the first

Table of Contents

quarter of 2006, the amount EURO now expects to pay to the counter-party on the cash-settled forward gold price agreements increased, resulting in current period recognition of the potential future payments. We also recorded an additional \$2.2 million unrealized expected future loss on call options. This loss is an opportunity costs based on current gold prices and assume that gold prices will remain at current levels during the remaining 12 month life of the call option lives. Derivative mark-to-market losses totaled \$1.3 million in the first quarter of 2005 when our only derivatives were EURO's cash-settled forward gold price agreements.

All of our puts, calls and forward currency agreements expire over the next 12 months. We do not plan to enter into any additional gold puts or calls nor to sell our gold forward in a rising gold market. The derivative agreements were scheduled to provide downside gold price and currency protection for an 18 month period coinciding with Bogoso sulfide plant construction and start-up period. In March 2007, all existing derivatives, except for EURO's cash-settled forward gold price agreements, will have expired.

First quarter consolidated gold revenues were up \$8.2 million from a year ago but the operating profit was lower. Increases in gold revenues and in mine operating costs are mostly related to the inclusion of Wassa's revenues and costs in the first quarter of 2006. Wassa was not in-service in the first quarter of 2005. Higher gold prices (\$554 per ounce in the first quarter of 2006 versus \$426 per ounce in the same quarter of 2005) also contributed to the increased revenues.

Bogoso's and Wassa's combined operations yielded a \$4.3 million mine pre-tax operating loss (gold revenues less mine operating costs) in the first quarter of 2006 compared to a pre-tax operating income of \$2.3 million on Bogoso operations in the first quarter of 2005. The major factors responsible for the consolidated mine operating loss were lower gold output at Bogoso versus a year ago and an operating loss at Wassa in the first quarter of 2006.

Increases in interest expense from higher debt balances were partially offset by a \$1.1 million foreign exchange gain on foreign currency accounts in the US and Canada.

SUMMARY OF FINANCIAL RESULTS	For the three months ended March 31,	
	2006	2005
Gold sold (oz)	44,940	39,164
Average realized price (\$/oz)	554	426
Total revenues (in \$ thousands)	27,392	18,051
Cash flow provided by/(used in) operations (in \$ thousands)	(5,696)	3,634
Net income/(loss) (in \$ thousands)	19,323	(2,223)
Net income/(loss) per share — basic (\$)	0.093	(0.016)

Bogoso/Prestea Operations — Bogoso/Prestea generated a \$(2.0) million pre-tax operating loss during the first quarter of 2006 on sales of 20,735 ounces of gold, down from \$2.3 million of after-tax operating income on sales of 39,164 ounces in the first quarter of 2005. The major factors contributing to the loss were lower gold production and sales. First quarter gold sales were down 18,429 ounces versus the first quarter of 2005 due to a combination of lower plant throughput, lower ore grades and lower gold recovery. The lower plant throughput and recovery were caused by the metallurgical characteristics of the deeper, harder non-refractory sulfide Plant-North ores processed in the first quarter of 2006 versus the ores processed in the first quarter of 2005. The Bogoso processing plant processed an average of 3,729 tonnes per day in the first quarter of 2006 at an average grade of 3.45 grams per tonne, as compared to 4,348 tonnes per day at 4.56 grams per tonne in the same period in 2005. Gold recovery dropped to 57.3% from 61.5% in the first quarter of 2005. The drop in recovery was related to increasing metallurgical complexity of the deeper ores in the Plant-North pit at Prestea. We expect gold production to increase marginally in each of the next two quarters and to increase significantly in the fourth quarter as a result of the start up of the new sulfide processing plant at Bogoso and higher recoveries from the new Pampe oxide ore body.

Table of Contents

BOGOSO/PRESTEA

OPERATING RESULTS	For the three months ended March 31,	
	2006	2005
Ore mined (t)	397,416	400,144
Waste mined (t)	3,481,508	2,019,253
Ore processed (t)	335,581	391,294
Grade processed (g/t)	3.45	4.56
Recovery (%)	57.3	61.5
Gold sold (oz)	20,735	39,164
Cash operating cost (\$/oz)	506	297
Royalties (\$/oz)	16	12
Total cash cost (\$/oz)	522	309

While Bogoso's first quarter mine operating costs were down \$1.2 million from the same quarter of 2005, a decrease in gold output resulted in significantly higher costs per ounce. Cash operating costs came in at \$506 per ounce versus \$297 per ounce in the first quarter of 2005.

Wassa Operations — Wassa generated a \$1.9 million after-tax operating loss in the three months ended March 31, 2006 on sales of 24,205 ounces of gold. The Wassa processing plant processed an average of 10,859 tonnes per day at an average grade of 0.86 grams per tonne with a gold recovery of 86.7%. Cash operating costs averaged \$487 per ounce and total cash costs averaged \$504 per ounce.

WASSA

OPERATING RESULTS	For the three months ended March 31,	
	2006	2005(1)
Ore mined (t)	668,741	—
Waste mined (t)	3,449,355	—
Ore processed (t)	977,330	—
Grade processed (g/t)	0.86	—
Recovery (%)	86.7	—
Gold sold (oz)	24,205	—
Cash operating cost (\$/oz)	487	—
Royalties (\$/oz)	17	—
Total cash cost (\$/oz)	504	—

1) The Wassa mine did not commence commercial production until April 2005.

While Wassa's first quarter 2006 operating results were again short of expectations, plant throughput was higher than in any quarter of 2005 and we continue to anticipate higher ore grades in the pit as mining reaches deeper levels. On a monthly basis the operation at Wassa continues to improve as shown in the following table:

	Units	January	February	March
Throughput rate	tonnes/day	10,398	11,088	11,114
Total milled	tonnes	322,338	310,472	344,520
Average grade	g/t	0.75	0.88	0.94
Recovery	%	88.7	87.3	89.6
Gold sold	Ounces	6,841	7,609	9,755
Cash operating cost	\$/oz	\$ 608	\$ 459	\$ 425

The first quarter direct mine operating costs at Wassa are consistent with budget expectations. As mining reaches deeper levels in the pit we expect waste to ore strip ratios to decrease and an increase in ore grade which will result in higher gold output and lower cash operating cost per ounce.

DEVELOPMENT PROJECTS

Bogoso Sulfide Expansion Project

Nearly 75% of the remaining ore reserves at Bogoso/Prestea are refractory and cannot be efficiently processed at our existing processing plant. In 2005 a decision was made to construct a new 3.5 million tonne per annum processing facility at Bogoso alongside the existing non-refractory processing plant. The new plant, which is currently under construction, will utilize the proprietary BIOX(R) bio-oxidation technology to treat the refractory sulfide ore. When completed in late 2006, the new sulfide processing plant and the existing CIL plant are together expected to process a combined 5.0 million tonnes per year. The existing CIL mill will retain its current configuration and will continue to process non-refractory ores during the construction phase of the new BIOX(R) plant. After the new BIOX(R) plant comes on line, it is anticipated that the existing Bogoso CIL plant will process mostly oxide ores

Table of Contents

and the new BIOX(R) plant will process mostly refractory sulfide ores and mixed oxide-refractory ores. The two plants sitting side-by-side are expected to provide operational efficiencies since they will share common management, labor, reagent inventories, warehouse parts and maintenance efforts. And with the two plants and their differing technologies, we should be able to effectively process all of the ore types known to exist in the Bogoso/Prestea area.

Construction work is proceeding within schedule and budget. Design and engineering is essentially complete and most equipment items have been delivered to site or are in the final stages of supply and shipment. Concrete work and tankage is well progressed and the installation of structural steel and electrical equipment and wiring has commenced.

The design and construction of the expansion project is being managed by GRD Minproc in accordance with an engineering, procurement and construction management contract that was finalized and signed in April 2006.

Pre-stripping of the first two sulfide pits has commenced using mining equipment acquired in 2005 and 2006. The non-refractory plant will continue to process non-refractory ores from the Plant-North pit at Prestea until completion of mining in the fourth quarter of 2006. Thereafter we plan to feed the non-refractory plant with oxide ores from Pampe, Mampon and various areas on the south end of the Prestea property.

We estimate that the total capital cost of the new sulfide plant project, including the expansion of the mining fleet, to be approximately \$125 million, and expect construction to be completed by late 2006. At the end of March 31, 2006 approximately \$61.8 million of the total project costs had been spent. An additional \$25 million will be spent on pre-stripping and inventory build up.

In 2007, following completion of the BIOX(R) plant, we expect combined gold production from the two Bogoso plants to be approximately 370,000 ounces at an average cash operating cost of \$330 per ounce. Based on our metallurgical test work, gold recoveries from the BIOX(R) process are expected to average 86% and vary between 78% for near surface material and 88% for deeper, more refractory sulfides.

EXPLORATION PROJECTS

We have budgeted \$16.5 million for exploration in 2006, and intend to focus our efforts on core assets in Ghana, including the Prestea Underground and the newly acquired St Jude Properties at Hwini-Butre and Benso. Key areas where we plan to be active include:

- Mineralized areas around the operating mines;
- Prestea Underground, where we have intensified exploration to allow feasibility (upper levels) and scoping studies (deep levels) to be completed this year;
- Prestea South — Bondaye area, where we plan to resume drilling of the known oxide targets to allow feasibility and permitting to be progressed in 2006; and
- Hwini-Butre and Benso, where intensive drilling programs are planned to be undertaken to allow feasibility and permitting to be progressed in 2006.

By the end of 2005, dewatering efforts at the Prestea Underground had cleared the lowest sections of the old underground workings and an extensive underground drilling program has been initiated which will continue during most of 2006. We currently have three drills working between the 17 and 24 levels which accomplished 6,524 meters of drilling during the first quarter. Later in the year we plan to test extensions to mineralized zones in the deepest section of the mine between 30 and 35 level. We believe these deeper levels provide the best opportunities for significant new discoveries in the Prestea Underground. We intend to complete an initial feasibility study by the end of 2006, evaluating the economic potential of restarting production from the upper levels of the Prestea Underground mine.

Other opportunities include:

- Saramacca Anomaly M in Suriname, where we plan to follow up the encouraging 2005 drilling results;
- Cote d'Ivoire and Sierra Leone, where we plan to advance our interests to key decision points.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

At March 31, 2006 our cash, cash equivalents and short term investments totaled \$86.9 million, down marginally from \$89.7 million at December 31, 2005. While operating activities consumed \$5.7 million and capital spending used \$45.9 million during the first quarter, sale of the Moto shares contributed \$39.0 million of cash. Lower gold output and use of cash to reduce operating payables and to increase inventories were the major factors contributing to the operational consumption of cash during the first quarter.

Option exercises provided \$2.2 million of cash and \$5.5 million of new equipment loans contributed a total of \$7.6 million of cash, and \$1.7 million was used to repay various loans.

Of the \$45.9 million spent on new capital projects during the first quarter, approximately \$24.6 million of the total was spent on the Bogoso sulfide project and \$9.9 million was spent on other plant and equipment needs mostly at Bogoso/Prestea and at Wassa. A total of \$2.1 million was spent on capital exploration projects.

Liquidity Outlook

Capital expenditures plans for 2006 include the following projects:

Capital Spending	Amount (millions)
Development	
Bogoso Expansion Project	\$ 89.0
Bogoso/Prestea pre-stripping and inventory build up	25.0
Pampe	4.0
Mampon	1.2
St. Jude properties	1.0
Sustaining Capital	
Bogoso/Prestea	7.0
Prestea Underground care and maintenance	4.8
Wassa	6.2
Exploration	
Bogoso/Prestea	1.7
Prestea Underground	3.3
Wassa	0.9
St. Jude properties	4.6
Other	6.3
Total	<u>\$ 155.0</u>

Approximately 80% of the expected Bogoso sulfide expansion project spending is scheduled in the first half of 2006, while 90% of all capital spending is scheduled in the first three quarters of 2006.

At current gold prices (approximately \$700 per ounce) we expect both Bogoso/Prestea and Wassa to generate positive operating cash flows in 2006, but this source of funding along with the \$86.9 million of cash on hand at March 31, 2006 will not meet all of our growth needs during 2006.

In March 2006, we liquidated our share holdings in Moto yielding \$39.0 million of cash and we are currently negotiating with banks to set up a \$30 million revolving line of credit that could be drawn on if we find that cash from operations and cash on hand are not sufficient to meet our projected needs. We may also consider selling other non-key assets if necessary to complete our capital plans during 2006.

LOOKING AHEAD

Our main objectives for the remainder of 2006 include:

- completion of mining and commencement of reclamation at the Prestea Plant-North pit in late 2006;
- permitting and commencement of oxide mining from Pampe on the Akropong trend west of Bogoso, to provide oxide ore to the Bogoso plant following exhaustion of the Prestea Plant-North ores;

Table of Contents

- commencement of sulfide mining at Bogoso;
- completion of construction and commissioning of the Bogoso sulfide expansion project by the end of 2006;
- achievement of improved production rates and costs at Wassa;
- commencement of mining of the higher grade deposit at Wassa in the second half of 2006
- commencement of mining of the higher grade South Akyempim deposit at Wassa in the second half of 2006;
- a continued high level of exploration effort;
- continued evaluation of the Prestea Underground potential and progress of feasibility studies;
- assimilation and further exploration of the St. Jude Properties and progress of feasibility studies; and
- continuation of efforts to identify and pursue acquisition and growth opportunities in Ghana and elsewhere.

We expect gold production at Bogoso/Prestea during 2006 to total approximately 180,000 ounces at an average cash operating cost for the year of \$330 per ounce. Production is expected to increase gradually through the second and third quarter, and significantly in the fourth quarter when production from the new BIOX(R) facility is expected to commence and mining begins at the Pampe oxide deposit.

We expect 2006 gold production at Wassa to total approximately 120,000 ounces at an average cash operating cost of approximately \$340 per ounce. Cash operating costs should decrease significantly over the next three quarters due to a lower stripping ratio and expected higher grades resulting in increased gold production.

As more fully disclosed in the Risk Factors Item 1A in our 2005 Form 10-K, numerous factors could cause our estimates and expectations to be wrong or could lead to changes in our plans. Under any of these circumstances, the estimates described above could change materially.

RELATED PARTY TRANSACTIONS

During the first quarter of 2006 we obtained legal services from a legal firm to which our Chairman is counsel. Total value of all services purchased from the this law firm during the first quarter were \$0.4 million. Our Chairman did not personally perform any legal services for us during the first quarter nor did he benefit directly or indirectly from payments for the services performed by the firm.

During the first quarter of 2006 a corporation controlled by Michael A. Terrell, a director of Golden Star, provided management services to St. Jude for which it was paid Cdn\$0.13 million. Mr. Terrell became a director of Golden Star following our acquisition of St. Jude in December 2005. Mr. Terrell's company ceased doing business with St. Jude at the end of March 2006.

OFF BALANCE SHEET ARRANGEMENTS

We have no off balance sheet arrangements.

OUTSTANDING SHARE DATA

This MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION includes information available to May 9, 2006. As of May 9, 2006 we had outstanding 207,513,758 common shares, options to acquire 6,600,451 common shares, warrant to acquire 11,724,334 common shares and convertible notes which are convertible into 11,111,111 common shares.

TABLE OF CONTRACTUAL OBLIGATIONS

CONTRACTUAL OBLIGATIONS As of March 31, 2006	Payments due by period				
	Total	Less than 1 year	1 to 3 years	3 to five years	More than 5 years
Debt (1)	\$ 77,218	\$ 7,585	\$14,594	\$55,039	\$ —
Interest on long term debt	14,267	5,101	8,614	552	—
Operating lease obligations	405	143	262	—	—
Asset retirement obligations(2)	21,339	3,197	7,297	3,804	7,041
Total	\$113,229	\$16,026	\$30,767	\$59,395	\$7,041

- (1) Includes \$50.0 million of convertible notes maturing in 2009. Golden Star has the right to repay the \$50.0 million in cash or in common shares at the due date under certain circumstances. The presentation shown above assumes payment is made in cash and also assumes no conversions of the debt to common shares by the note holders prior to the maturity date.
- (2) Asset retirement obligations include several estimates about future reclamation costs, mining schedules, timing of the performance of reclamation work and the quantity of ore reserves which in turn determine the ultimate closure date, which in turn impacts the discounted amounts of future asset retirement liabilities. The discounted value of these projected cash flows is recorded as "Asset retirement obligations" on the balance sheet of \$12.1 million as of March 31, 2006. The amounts shown above are undiscounted to show full expected cash requirements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk includes, but is not limited to, the following risks: changes in interest rates on our investment portfolio and debt, changes in foreign currency exchange rates, commodity price fluctuations and equity price risk.

Interest Rate Risk

From time to time we invest excess cash in high quality short-term debt instruments. The rates received on such investments may fluctuate with changes in economic conditions. As a result, our investment income may fall short of expectations during periods of lower interest rates. We estimate that, given the cash balances expected during 2006, a 1% change in interest rates would result in a \$0.1 to \$0.3 million change in annual interest income.

We have both fixed rate and variable rate debt. At March 31, 2006 we had \$7.0 million of variable rate debt which carries an interest rate of LIBOR plus 2.5%. We estimate that a 1% increase in the interest rate on the variable rate debt would result in a \$0.1 million change in annual interest expense. We have not entered into any agreements to hedge against unfavorable changes in interest rates, but may in the future actively manage our exposure to interest rate risk.

Foreign Currency Exchange Rate Risk

While our major operating units transact most of their business in US dollars, many purchases of labor, operating supplies and capital assets are denominated in Euros, British pounds, Australian dollars, South African Rand and Ghanaian Cedis. As a result, currency exchange fluctuations may impact the costs incurred at our operations. Gold is sold throughout the world based principally on the US dollar price, but portions of our operating expenses and some of our capital purchases are incurred in currencies other than the US dollar. The appreciation of non-US dollar currencies against the US dollar increases production costs and the cost of capital assets in US dollar terms at mines located outside the US, which can adversely impact our net income and cash flows. Conversely, a depreciation of non-US dollar currencies usually decreases production costs and capital asset purchases in US dollar terms.

The value of cash and cash equivalent investments denominated in foreign currencies also fluctuates with changes in currency exchange rates. Appreciation of non-US dollar currencies results in a foreign currency gain on such investments and a decrease in non-US dollar currencies results in a loss.

While in the past we have not utilized market risk sensitive instruments to manage our exposure to foreign currency exchange rates, during 2005 we entered into forward purchase contracts for the South African Rand and the Euro to hedge expected future purchases of capital assets in South Africa and Europe associated mostly with the Bogoso sulfide expansion project. We also hold portions of our cash reserves in non-US dollar currencies.

Commodity Price Risk

Gold is our primary product and, as a result, changes in the price of gold could significantly affect our results of operations and cash flows. According to current estimates, a \$10 per ounce change in our average realized price of gold for 2006 would result in a \$2.5 to \$3 million change in 2006's expected pre-tax earnings and cash flows.

During 2005, to reduce the risk of unfavorable gold price fluctuations on our operating cash flows during the construction period of the Bogoso sulfide expansion project, we purchased puts to lock in minimum gold prices for portions of our expected gold sales in 2006 and early 2007. As of March 31, 2006 we have 150,000 put options remaining which establish an average minimum price of \$405 per ounce on 150,000 ounces of expected gold production spread monthly through 2006 and early 2007.

Table of Contents

We also sold calls during 2005 to offset a portion of the costs of purchasing the puts. At March 31, we had 60,000 call options remaining which expire in 2006 and early 2007, each carrying a strike price of \$525 per ounce.

Since the Rosebel Royalty revenues received by EURO fluctuate with gold prices, EURO's loan agreements required that EURO enter into a series of cash-settled forward gold price agreements with the lender designed to eliminate a portion of the potential impact of gold price fluctuations on expected future Rosebel royalty revenues. These cash-settled forward gold price agreements meet the definition of a derivative. See Note 12 above for additional details of these derivatives and their impact on gold price risk.

Equity Price Risk

We have in the past and may in the future seek to acquire additional funding by sale of common shares. Movements in the price of our common shares have been volatile in the past and may also be volatile in the future. As a result, there is a risk that we may not be able to sell new common shares at an acceptable price should the need for new equity funding arise.

ITEM 4. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

The principal executive officer and principal financial officer have evaluated the effectiveness of the Corporation's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of March 31, 2006. Based on the evaluation, the principal executive officer and the principal financial officer concluded that the disclosure controls and procedures in place are effective to ensure that information required to be disclosed by the Corporation, including consolidated subsidiaries, in reports that the Corporation files or submits under the Exchange Act, is recorded, processed, summarized and reported on a timely basis in accordance with applicable time periods specified by the Securities and Exchange Commission rules and forms. There has been no change in the Corporation's internal control over financial reporting during the quarter ended March 31, 2006, that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting other than disclosed in item (b) below.

(b) Change in Internal Control Over Financial Reporting

As discussed in the notes to the consolidated financial statements, it was determined that as of December 31, 2005 management did not maintain effective controls over the presentation and documentation of certain derivatives. Specifically, Golden Star did not prepare and maintain sufficient documentation to support the designation and effectiveness of hedges of certain gold future contracts entered into by its subsidiary, EURO Ressources S.A., during 2005. Because of the existence of the deficiency in question at year-end, management concluded that our internal control over financial reporting was ineffective as of December 31, 2005.

During the quarter ended March 31, 2006, management has undertaken remedial action to address the above described material weakness by revising its accounting procedures to record the derivative transaction in accordance with Canadian and United States Generally Accepted Accounting Principles (GAAP). The Company no longer applies hedge accounting to its derivatives.

Management believes it has completed these remediation efforts; however, management has not engaged its audit firm to perform a stand alone engagement to determine if the material weakness continues to exist.

In March 2007 management's review of internal controls found that management did not maintain effective controls over its accounting for inventories. Specifically, management did not maintain effective controls over the computation and review of ore stockpile and in-process inventory balances which resulted in material mis-statement of such balances for the periods ended March 31, June 30 and September 30, 2006. These mis-statements constituted a material weakness.

CERTIFICATION

I, Peter J. Bradford, certify that:

1. I have reviewed this report on Form 10-Q/A as amended of Golden Star Resources Ltd. (“Registrant”);
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this quarterly report;
4. The Registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the Registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the periods covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the Registrant’s internal control over financial reporting that occurred during the Registrant’s most recent fiscal quarter (the Registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant’s internal control over financial reporting.
5. The Registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant’s auditors and the audit committee of Registrant’s board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant’s ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant’s internal control over financial reporting.

CERTIFICATION

I, Tom Mair, certify that:

1. I have reviewed this report on Form 10-Q/A as amended of Golden Star Resources Ltd. (“Registrant”);
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this quarterly report;
4. The Registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the Registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the Registrant’s internal control over financial reporting that occurred during the Registrant’s most recent fiscal quarter (the Registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant’s internal control over financial reporting.
5. The Registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant’s auditors and the audit committee of Registrant’s board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant’s ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant’s internal control over financial reporting.
