Eldorado Update

VANCOUVER, BC – Paul N. Wright, President and Chief Executive Officer of Eldorado Gold Corporation (“Eldorado” the “Company” or “we”) is pleased to provide an update on activities at the Company’s Kisladag Mine in Turkey, the Tanjianshan Project in China and recent Board and senior management appointments.

Kisladag Mine

Subsequent to second quarter reporting the Company has successfully resolved initial mechanical problems in the crushing circuit and with a water supply pump.

Due to the well fractured nature of the oxide ore, the mine continues to place both crushed and run of mine ore on the leach pad. Production and costs of production in July and August exhibit the expected positive trend and will continue to improve as solution inventory increases to steady state levels allowing increased utilization of the process plant capacity.

Month	Gold Produced (oz)	Cash Operating Cost (\$/oz)	Ore Mined (t)	Ore Grade (g/t)
July	7,502	239	597,625	1.24
August	9,781	235	658,714	1.14

The mine commenced commercial production on July 1, 2006 and is planned to produce 70,000 ounces of gold in 2006 at a cash operating cost of \$219 per ounce.

Tanjianshan Project

At the Tanjianshan Project in Qinghai Province, China, construction continues to be on schedule for October start-up. The crushing, grinding and floatation circuits are complete except for electrical and process control work. The power line has been completed to site and is presently being tied in to the site substation. Earthworks on the tailings dam are complete and the portion of the dam used for Phase 1 tailings has been lined with high density polyethelene (HDPE). Mining continues in the Qinlongtan pit area, where both ore and waste are being removed by Qinghai Dachaidan Mining Limited (‘QDML’) mining fleet, and being assisted by a local contractor. As of the end of August, 96,000 tons of ore has been stockpiled in preparation for the start up in October.
