News Release

October 12, 2004

LAKEMOUNT PHASE 3 DRILL PROGRAM CONFIRMS CONTINUITY OF NICKEL COPPER PLATINUM AND PALLADIUM ZONES

Platinum Group Metals Ltd. (PTM-TSXV) reports that Phase 3 drilling at the Lakemount Project near Wawa, Ontario has confirmed the overall continuity of existing 10 to 15 metre mineralized zones and highlighted the potential for additional higher-grade nickel-copper, platinum, and palladium ("PGE") zones with 3 to 5 metre thicknesses. Drill intercepts from Phase 3 include Hole 18 with 0.76% nickel, 0.50% copper, and 0.88 g/t PGEs over 7.0 metres and Hole 20 with 1.0 % nickel, 0.38% copper, 0.59 g/t PGEs over 5.0 metres.

Platinum Group Metals Ltd. President R. Michael Jones said "We are very pleased to see the Lakemount project advance quickly during a time when copper, nickel and platinum prices are doing so well. As we move into resource estimation we will be looking closely at potential engineering approaches to the project that short cut the typical mining project timelines with the idea of taking advantage of strong markets. Lakemount is only about 350 kilometres on pavement from Sudbury, so there are several ways to execute this project. We continue to follow our dual approach of Canadian and South African projects focussed on platinum and palladium with associated nickel and copper".

Hole 20 from Lakemount has short intervals of semi massive nickel sulphide mineralization and alteration that may indicate close proximity to a feeder pipe for the mineralization, including 1 metre grading 2.50% nickel, 0.28% copper, and 1.02 g/t PGEs (see table below). These values confirm earlier calculations of the high nickel, copper, PGE content of the sulphides themselves within the host rocks and highlight the grade potential of zones with high sulphide concentrations. The area of Holes 18-20 will be a priority for upcoming exploration. PTM has drilled 4,700 metres in 23 holes along the 800-metre long zone of sulphides that is open to depth. The Phase 3 drilling did not successfully explain a down-hole UTEM conductor detected following Phase 2 drilling. Determining the source of this feature will be the subject of further modelling work, and future drill testing.

Historical drilling of 146 holes up until 1957 provided a broad outline of the mineralization at Lakemount, however the details of the grade/thickness profiles were not available and PGEs were not systematically assayed for and as a result a PGE credit could not be evaluated until the recent PTM drilling was conducted. PTM's drilling has successfully traced some of the better grade PGE zones and added significantly to the project's potential contained metals value.

The next phase of work at Lakemount will be to update the 3-dimensional geological and grade models with all available data and then complete a preliminary resource assessment. Roscoe Postle Associates Inc. of Toronto has been retained to complete a resource estimate.

The Lakemount Property is located 10 kilometres east of Wawa, Ontario along Highway 101 and covers an area approximately 4 by 6 kilometres. The highway and existing logging roads provide easy access to the known mineralized zones. Under an option agreement with Western Prospector Group Ltd., PTM can earn and purchase up to a 62% interest in the Lakemount Property from Western Prospector and the underlying property vendors.

Qualified Person ("QP") and Quality Assurance and Control

Dennis Gorc, P.Geol., Manager of Research and Acquisitions, is acting as the QP for Platinum Group Metals Ltd., for this release. He is registered with the Professional Engineers and Geoscientist of British Columbia and the Association of Professional Geoscientists of Ontario. He also directed this drilling program. Drill core was sawn with half being retained for future study. The samples collected from the second half of the drill core were placed in containers sealed on site and tagged with a secure chain-of-custody security seal before being transported to the ALS Chemex (Thunder Bay) sample preparation facility. ALS Chemex assayed the samples under standard procedures including 4 acid digestion as previously announced. PTM has inserted standards blanks and blind duplicates in the sample stream as part of the Company procedures.

About Platinum Group Metals Ltd. - PTM-TSX.V

PTM was founded in 2000 with a vision of tight markets for platinum and palladium and associated metals by 2005. The Company is based in Vancouver Canada with an office in Johannesburg South Africa. The Company sees additional opportunity in South Africa as a result of the new initiatives of the government to encourage active mineral rights and black economic empowerment through new mining law and charter that will come into full effect in May 2005.

News Release

October 27, 2004

PLATINUM GROUP METALS LTD, ANGLO PLATINUM, AND AFRICA WIDE FORM PLATINUM EXPLORATION JOINT VENTURE IN SOUTH AFRICA'S "WESTERN BUSHVELD" REGION

Platinum Group Metals Ltd. (PTM-TSX.V), announces today the formation of a Joint Venture ("JV") with, **Anglo American Platinum Corporation Limited ("Anglo Platinum") (AMS-JSE) and Africa Wide Mineral Prospecting and Exploration (Pty) Limited** in compliance with South Africa's recently enacted minerals legislation, that will pursue platinum exploration and development on combined mineral rights covering 67 square kilometres on the platinum-rich Western Bushveld Complex of South Africa.

"This JV is a logical consolidation of mineral rights for potential mining development and creates one of the larger assembled land positions on the Western Bushveld Complex, the source of most of the world's platinum" said R. Michael Jones, President of PTM.

The JV will immediately provide for a 26% Black Economic Empowerment interest in satisfaction of the 10-year target set by the Mining Charter and newly enacted Minerals and Petroleum Resources Development Act. PTM and Anglo Platinum will each own an initial 37% working interest in the JV, while Africa Wide will own an initial 26% working interest. Africa Wide will work with local community groups in order to facilitate their inclusion in the economic benefits of the JV in areas such as training, job creation and procurement.

"North American venture capital companies with experience in mining are an ideal asset to assist Black Economic Empowerment companies in capitalizing on mining opportunities in this time of transition" said Mlibo Mgudlwa, President of Africa Wide.

PTM will be required to operate and fully fund the JV's exploration program in the amount of Rand 35 million (approx. US\$ 5.3 M; C\$7.0 million) over the next five years. Minimum expenditures in year one in the amount of Rand 5 million are a firm commitment by PTM. Optional expenditures to maintain the JV in years two and three are also Rand 5 million and in years four and five amount to Rand 10 million in each year. After Rand 35 million in expenditures have been funded by PTM, the parties will fund their portion of further expenditures pro-rata based upon their working interest in the JV.

Once the JV completes a bankable feasibility study the respective interest of the parties will be adjusted to reflect their relative contribution of measured, indicated and inferred ounces determined in accordance with the South African SAMREC code. Each party will have the opportunity to contribute capital necessary, if so desired, to maintain their respective initial working interest in the JV. The JV agreement also provides a mechanism whereby Anglo Platinum may elect to become a "non-contributory participant" to the JV and by doing so would be subject to dilution.

The targets for exploration on the JV properties will be the Merensky and UG2 reefs of the Bushveld Complex. The potential to increase the size and confidence level of an estimated 3.72 million ounce inferred resource (9.1 million tonnes grading 5.69 grams per tonne 4 E's platinum, palladium, rhodium, gold on the Merensky Reef and 15.0 million tonnes grading 4.25 g/t 4E, on the UG2 reef, SAMREC Code, Anglo Platinum Annual report 2003- to be confirmed by PTM under Canadian NI 43-101) on the combined JV properties is considered excellent by all members of the JV. The inferred resource calculation already includes estimated 30% to 50% geological losses. The exploration areas on the JV properties

are adjacent to the separate BRPM joint venture, which incorporates an existing mine, formerly Anglo Platinum's BRPM platinum mine, and the Styldrift property, contributed to the BRPM JV by the Royal Bafokeng Nation.

The Merensky and UG2 reefs have been intercepted on the JV properties in a number of drill holes outside of areas where resources have been defined to date. These areas require immediate follow-up drilling. Prospecting permits have been issued and drilling can commence immediately. The contributed properties offer areas likely to increase the size and confidence of the resource as they include the untested projected surface trace of the reefs.

PTM will contribute all of its interests in portions of the farms Onderstepoort 98JQ and Elandsfontein 102JQ. Anglo Platinum will contribute its interests in portions of the farms Koedoesfontein 94JQ, Elandsfontein 102JQ and Frischgewaagd 96JQ. A map of the new JV area is available on the PTM website www.platinumgroupmetals.net.

The JV Agreement described above has been approved by each of the parties, but remains subject to final due diligence by the parties and regulatory approval by stock exchange authorities in Canada and South Africa as well as the Competition Commissions of both South Africa and the European Union.

QUALIFIED PERSON

R. Michael Jones, P.Eng is acting as the Qualified Person, "QP" for Platinum Group Metals RSA Pty Ltd., a wholly owned subsidiary of PTM. He is registered with the Professional Engineers of Ontario, Canada. The Information included in this release is subject to due diligence and review for compliance with Canadian NI 43-101 standards.

ABOUT PTM

PTM is based in Vancouver, B.C., Canada and has active exploration programs in Canada and South Africa. PTM holds significant mineral rights in the Northern and Western Bushveld Complex of South Africa. PTM is supportive of the initiatives of the government of South Africa in the Mineral Resources and Petroleum Development Act and Mining Charter.

PTM is the largest mineral rights holders in the area surrounding Canada's only primary platinum and palladium mine near Thunder Bay, Ontario. PTM also has a separate active joint venture with Anglo Platinum at Agnew Lake, near Sudbury, Ontario, Canada.
