HYATT REPORTS THIRD QUARTER 2015 RESULTS

CHICAGO (November 3, 2015) - Hyatt Hotels Corporation ("Hyatt" or the "Company") (NYSE: H) today reported third quarter 2015 financial results.

Mark S. Hoplamazian, president and chief executive officer of Hyatt Hotels Corporation, said, "Our RevPAR growth was strong due to greater transient business and increased market share. These positive results drove solid fee growth across our system."

Third quarter 2015 financial results are as follows:

- Adjusted EBITDA was \$172 million in the third quarter of 2015 compared to \$179 million in the third quarter of 2014 , a decrease of 3.9% . Adjusted EBITDA in the third quarter of 2015 was negatively impacted by \$17 million due to net dispositions and \$7 million due to net unfavorable currency impacts, compared to the third quarter of 2014 .
 - Adjusted for special items, net income attributable to Hyatt was \$42 million , or \$0.30 per share, during the third quarter of 2015 compared to net income attributable to Hyatt of \$30 million , or \$0.20 per share, during the third quarter of 2014 .
 - Net income attributable to Hyatt was \$25 million , or \$0.18 per share, during the third quarter of 2015 compared to net income attributable to Hyatt of \$32 million , or \$0.21 per share, in the third quarter of 2014 .
 - Comparable owned and leased hotels RevPAR increased 2.5% (5.9% excluding the effect of currency) in the third quarter of 2015 compared to the third quarter of 2014 .
 - Comparable owned and leased hotels operating margins decreased 60 basis points in the third quarter of 2015 compared to the third quarter of 2014 . Owned and leased hotels operating margins decreased 100 basis points in the third quarter of 2015 compared to the third quarter of 2014 .
 - Comparable systemwide RevPAR increased 1.6% (5.4% excluding the effect of currency) in the third quarter of 2015 compared to the third quarter of 2014 .
 - Comparable U.S. full service hotel RevPAR increased 5.2% in the third quarter of 2015 compared to the third quarter of 2014 . Comparable U.S. select service hotel RevPAR increased 7.1% in the third quarter of 2015 compared to the third quarter of 2014 .
 - Nine hotels were opened during the third quarter of 2015 . As of September 30, 2015 , the Company's executed contract base consisted of approximately 260 hotels or approximately 56,000 rooms.
 - The Company repurchased 3,735,460 shares of common stock at a weighted average price of \$52.11 per share, for an aggregate purchase price of approximately \$195 million .
-

Mr. Hoplamazian continued, "Adjusted EBITDA grew nearly 10% in the third quarter, excluding the impact of foreign exchange and dispositions of hotels last year. This level of growth is a testament to the strength of our business model and reflects strong ongoing performance in our existing hotels and the positive effects of significant net growth in our hotel and rooms base around the world.

"Year-to-date through the third quarter, we added 37 hotels to our system, 28% more than the same period last year, and expect to open approximately 13 more hotels by year-end. Our base of executed contracts for new hotels increased to approximately 260 hotels or 56,000 rooms in the third quarter, reflecting a significant potential increase relative to our existing size. We remain focused on opening new hotels across multiple geographies to expand our differentiated offering in new and attractive markets.

"Our growth profile is expected to yield greater management and franchise fees in the years ahead. Total fees grew nearly 12% year-to-date through the third quarter, or 16% excluding the impact of foreign exchange. We expect this strong fee growth profile to progress as we continue to realize meaningful net hotel and net rooms growth.

"Looking ahead, we expect overall operating performance at our hotels in the U.S. to remain strong, based on continued economic growth and positive group and transient trends."

DEFINITIONS

Adjusted EBITDA

We use the term Adjusted EBITDA throughout this earnings release. Adjusted EBITDA, as we define it, is a non-GAAP measure. We define consolidated Adjusted EBITDA as net income attributable to Hyatt Hotels Corporation plus our pro rata share of unconsolidated hospitality ventures Adjusted EBITDA based on our ownership percentage of each venture, adjusted to exclude the following items:

- equity earnings (losses) from unconsolidated hospitality ventures;
- asset impairments;
- gains on sales of real estate;
- other income (loss), net;
- net income attributable to noncontrolling interests;
- depreciation and amortization;
- interest expense; and
- provision for income taxes.

We calculate consolidated Adjusted EBITDA by adding the Adjusted EBITDA of each of our reportable segments to corporate and other Adjusted EBITDA.

Our board of directors and executive management team focus on Adjusted EBITDA as a key performance and compensation measure both on a segment and on a consolidated basis. Adjusted EBITDA assists us in comparing our performance over various reporting periods on a consistent basis because it removes from our operating results the impact of items that do not reflect our core operating performance both on a segment and on a consolidated basis. Our president and chief executive officer, who is our chief operating decision maker, also evaluates the performance of each of our reportable segments and determines how to allocate resources to those segments, in significant part, by assessing the Adjusted EBITDA of each segment. In addition, the compensation committee of our board of directors determines the annual variable compensation for certain members of our management based in part on consolidated Adjusted EBITDA, segment Adjusted EBITDA or some combination of both.

We believe Adjusted EBITDA is useful to investors because it provides investors the same information that we use internally for purposes of assessing our operating performance and making selected compensation decisions.

Adjusted EBITDA is not a substitute for net income attributable to Hyatt Hotels Corporation, net income, cash flows from operating activities or any other measure prescribed by GAAP. There are limitations to using non-GAAP measures such as Adjusted EBITDA. Although we believe that Adjusted EBITDA can make an evaluation of our operating performance more consistent because it removes items that do not reflect our core operations, other companies in our industry may define Adjusted EBITDA differently than we do. As a result, it may be difficult to use Adjusted EBITDA or similarly named non-GAAP measures that other companies may use to compare the performance of those companies to our performance. Because of these limitations, Adjusted EBITDA should not be considered as a measure of the income generated by our business or discretionary cash available to us to invest in the growth of our business. Our management compensates for these limitations by reference to our GAAP results and using Adjusted EBITDA supplementally.

Adjusted Selling, General, and Administrative Expenses

Adjusted selling, general, and administrative expenses exclude the impact of expenses related to benefit programs funded through rabbi trusts.

Comparable Owned and Leased Hotels Operating Margin

We define Comparable Owned and Leased Hotels Operating Margin as the difference between comparable owned and leased hotels revenues and comparable owned and leased hotels expenses. Comparable owned and leased hotels revenues is calculated by removing non-comparable hotels revenues from owned and leased hotels revenues as reported in our condensed consolidated statements of income. Comparable owned and leased hotels expenses is calculated by removing both non-comparable owned and leased hotels expenses and the impact of expenses funded through rabbi trusts from owned and leased hotels expenses as reported in our condensed consolidated statements of income.

Comparable Hotels

Comparable systemwide hotels represents all properties we manage or franchise (including owned and leased properties) and that are operated for the entirety of the periods being compared and that have not sustained substantial damage, business interruption or undergone large scale renovations during the periods being compared or for which comparable results are not available. We may use variations of comparable systemwide hotels to specifically refer to comparable systemwide Americas full service or select service hotels for those properties that we manage or franchise within the Americas management and franchising segment, comparable systemwide ASPAC full service hotels for those properties that we manage or franchise within the ASPAC management and franchising segment, or comparable systemwide EAME/SW Asia full service or select service hotels for those properties that we manage within the EAME/SW Asia management segment. Comparable operated hotels is defined the same as Comparable systemwide hotels with the exception that it is limited to only those hotels we manage or operate and excludes hotels we franchise. "Comparable owned and leased hotels" represents all properties we own or lease and that are operated and consolidated for the entirety of the periods being compared and have not sustained substantial damage, business interruption or undergone large scale renovations during the periods being compared or for which comparable results are not available. Comparable systemwide hotels and comparable owned and leased hotels are commonly used as a basis of measurement in the industry. Non-comparable systemwide hotels or Non-comparable owned and leased hotels represent all hotels that do not meet the respective definition of comparable as defined above.

Revenue per Available Room (RevPAR)

RevPAR is the product of the average daily rate and the average daily occupancy percentage. RevPAR does not include non-room revenues, which consist of ancillary revenues generated by a hotel property, such as food and beverage, parking, telephone and other guest service revenues. Our management uses RevPAR to identify trend information with respect to room revenues from comparable properties and to evaluate hotel performance on a regional and segment basis. RevPAR is a commonly used performance measure in the industry.

RevPAR changes that are driven predominantly by changes in occupancy have different implications for overall revenue levels and incremental profitability than do changes that are driven predominantly by changes in average room rates. For example, increases in occupancy at a hotel would lead to increases in room revenues and additional variable operating costs (including housekeeping services, utilities and room amenity costs), and could also result in increased ancillary revenues (including food and beverage).

In contrast, changes in average room rates typically have a greater impact on margins and profitability as there is no substantial effect on variable costs.

Average Daily Rate (ADR)

ADR represents hotel room revenues, divided by total number of rooms sold in a given period. ADR measures average room price attained by a hotel and ADR trends provide useful information concerning the pricing environment and the nature of the customer base of a hotel or group of hotels. ADR is a commonly used performance measure in the industry, and we use ADR to assess the pricing levels that we are able to generate by customer group, as changes in rates have a different effect on overall revenues and incremental profitability than changes in occupancy, as described above.

Occupancy

Occupancy represents the total number of rooms sold divided by the total number of rooms available at a hotel or group of hotels. Occupancy measures the utilization of our hotels' available capacity. Management uses occupancy to gauge demand at a specific hotel or group of hotels in a given period. Occupancy levels also help us determine achievable ADR levels as demand for hotel rooms increases or decreases.

Net Gains (Losses) and Interest Income From Marketable Securities Held to Fund Operating Programs

The table below provides a reconciliation of net gains (losses) and interest income from marketable securities held to fund operating programs, all of which are completely offset within other line items of our condensed consolidated statements of income, thus having no net impact to our earnings. The gains or losses on securities held in rabbi trusts are offset to our owned and leased hotels expense for our hotel staff and to selling, general, and administrative expenses for our corporate staff and personnel supporting our business segments. The gains or losses on securities held to fund our Gold Passport program for our owned and leased hotels are offset by corresponding changes to our owned and leased hotels revenues. The table below shows the amounts recorded to the respective offsetting account.
