FORM 10-Q/A

Amendment No. 2

- QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2006

OR

- TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number 1-12284

GOLDEN STAR RESOURCES LTD.

(Exact Name of Registrant as Specified in Its Charter)

Canada

(State or other Jurisdiction of Incorporation or Organization)

98-0101955

(I.R.S. Employer Identification No.)

10901 West Toller Drive, Suite 300

Littleton, Colorado

(Address of Principal Executive Office)

80127-6312

(Zip Code)

Registrant's telephone number, including area code (303) 830-9000

Securities registered or to be registered pursuant to Section 12 (b) of the Act:

Title of Each Class

Common Shares

Name of each exchange on which registered

American Stock Exchange

Securities registered or to be registered pursuant to Section 12(g) of the Act:

Warrants Issued February 2003

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 (the "Act") during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. (See definition of "accelerated filer" and "large accelerated filer" in Rule 12b-2 of the Exchange Act).

(Check one): Large accelerated filer: Accelerated filer: Non-accelerated filer:

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Number of Common Shares outstanding as at November 6, 2006: 207,845,758

Explanatory Note

This Form 10-Q/A is being filed to amend Golden Star Resources Ltd.'s Quarterly Report on Form 10-Q, for the quarter ended September 30, 2006 to correct errors discovered on March 11, 2007 related to the computation of ore stockpile and in-process inventory balances and the associated "Mining operations" costs as found on the statement of operations. The corrections also impacted the minority interest account and various tax accounts on the balance sheets and in the statement of operations as well as our non-GAAP measures cash operating costs per ounce and total cash cost per ounce.

The US GAAP Reconciliation note 24 was previously revised in February 2007 to correct the way in which we accounted in US GAAP for warrants to purchase common shares which have an exercise price denominated in Canadian dollars. This restatement arose from management's determination on February 22, 2007 that such warrants denominated in Canadian dollars, which had been treated as equity instruments, should have been treated as derivative instruments under US GAAP. As such the fair value of such warrants is required to be treated as a liability, and we are required to mark to market those warrants on a current basis, with the resulting gains or losses being included in the statement of operations under US GAAP.

Generally, no attempt has been made in this Form 10-Q/A to modify or update other disclosures presented in the original report on Form 10-Q except as otherwise required to reflect the effects of the inventory restatement, and the earlier warrant restatements in note 25. This Form 10-Q/A does not reflect events occurring after the filing of the original Form 10-Q or modify or update those disclosures. Information not affected by the restatement is unchanged and reflects the disclosure made at the time of the original filing of the Form 10-Q with the Securities and Exchange Commission on November 6, 2006.

REPORTING CURRENCY, FINANCIAL AND OTHER INFORMATION

All amounts in this report are expressed in United States (“US”) dollars, unless otherwise indicated. Canadian currency is denoted as “Cdn\$.” Euros are denoted as €.

Financial information is presented in accordance with accounting principles generally accepted in Canada (“Cdn GAAP” or “Canadian GAAP”). Differences between accounting principles generally accepted in the US (“US GAAP”) and those applied in Canada, as applicable to Golden Star Resources Ltd., are explained in Note 24 to the Consolidated Financial Statements.

References to “Golden Star,” the “Company,” “we,” “our,” and “us” mean Golden Star Resources Ltd., its predecessors and consolidated subsidiaries, or any one or more of them, as the context requires.

NON-GAAP FINANCIAL MEASURES

In this Form 10-Q, we use the terms “total cash cost per ounce” and “cash operating cost per ounce” which are considered Non-GAAP financial measures as defined in SEC Regulation S-K Item 10 and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. See Item 2 Management’s Discussion and Analysis of Financial Condition and Results of Operations for a definition of these measures as used in this Form 10-Q.

STATEMENTS REGARDING FORWARD-LOOKING INFORMATION

This Form 10-Q contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended, with respect to our financial condition, results of operations, business prospects, plans, objectives, goals, strategies, future events, capital expenditures, and exploration and development efforts. Words such as “anticipates,” “expects,” “intends,” “forecasts,” “plans,” “believes,” “seeks,” “estimates,” “may,” “will,” and similar expressions identify forward-looking statements.

Although we believe that our plans, intentions and expectations reflected in these forward-looking statements are reasonable, we cannot be certain that these plans, intentions or expectations will be achieved. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained in this Form 10-Q.

These statements include comments regarding: the establishment and estimates of mineral reserves and resources, recovery rates, production, production commencement dates, anticipated production rates in 2007, our plans to pursue alternative power sources, production costs, cash operating costs, total cash costs, grade, processing capacity, potential mine life, progress and completion of feasibility studies, permitting and licensing, development costs, expenditures, exploration activities and expenditures, equipment replacement, our plan to complete feasibility studies on the upper levels of the Prestea Underground and on the Hwini-Butre and Benso concessions, development and mining of the new Pampe project, our expansion plans for Bogoso/Prestea, anticipated completion of construction and commissioning of the Bogoso Sulfide Expansion Project and related permitting and capital costs, anticipated production, cash requirements and sources, progress of the second \$15 million debt facility, production capacity, operating costs and gold recoveries and estimated capital spending in 2006.

Table of Contents

The following, are among the factors that could cause actual results to differ materially from the forward-looking statements:

- unexpected changes in business and economic conditions;
- significant increases or decreases in gold prices;
- changes in interest and currency exchange rates;
- timing and amount of gold production;
- failure to realize the anticipated benefits from the St. Jude Properties;
- failure to develop reserves on the St. Jude Properties;
- unanticipated grade changes;
- unanticipated recovery or production problems;
- effects of illegal miners on our properties;
- changes in mining and processing costs including changes to costs of raw materials, supplies, services and labor;
- changes in material type that impacts mining and processing;
- availability and cost of skilled personnel, materials, equipment, supplies, power and water;
- changes in project parameters;
- costs and timing of development of new reserves;
- results of current and future exploration activities;
- results of pending and future feasibility studies;
- joint venture relationships;
- political or economic instability, either globally or in the countries in which we operate;
- local and community impacts and issues;
- timing of receipt of, and maintenance of, government approvals and permits;
- accidents and labor disputes;
- environmental costs and risks;
- marine transit and other shipping risks, including delays and losses;
- competitive factors, including competition for property acquisitions; and
- availability of capital at reasonable rates or at all.

These factors are not intended to represent a complete list of the general or specific factors that could affect us. Your attention is drawn to other risk factors disclosed and discussed in Item 1A of our 2005 Form 10-K. We undertake no obligation to update forward-looking statements.

**GOLDEN STAR RESOURCES LTD.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(All amounts in tables are in thousands of US dollars unless noted otherwise)
(Unaudited)**

These consolidated financial statements and the accompanying notes are unaudited and should be read in conjunction with the audited consolidated financial statements and related notes thereto included in our annual report on Form 10-K as amended for the year ended December 31, 2005, on file with Securities and Exchange Commission and with the Canadian securities commissions. Financial information is presented in accordance with accounting principles generally accepted in Canada.

In early 2006, it was determined that hedge accounting had been improperly applied by our subsidiary, EURO Resources S.A. (“EURO”) for their cash-settled forward gold price agreements during the first three quarters of 2005. As a result, our Form 10-Qs for the first three quarters of 2005 were amended to apply derivative accounting rather than hedge accounting to EURO’s derivatives. In this Form 10-Q, comparative amounts for the third quarter and for the first nine months of 2005 reflect the restatement.

In management’s opinion, the unaudited consolidated financial statements for the three and nine months ended September 30, 2006 and September 30, 2005 contained herein reflect all adjustments, consisting solely of normal recurring items, which are necessary for the fair presentation of financial position, results of operations and cash flows on a basis consistent with that of our prior audited consolidated financial statements.

In certain cases prior period amounts have been revised to reflect current period presentation.

1. Description of Business

Through our subsidiaries we own a controlling interest in four significant gold properties in southern Ghana in West Africa:

- Bogoso/Prestea property, which is comprised of the adjoining Bogoso and Prestea surface mining leases (“Bogoso/Prestea”),
- Prestea Underground property (“Prestea Underground”),
- Wassa property (“Wassa”), and
- Hwini-Butre and Benso concessions (“St. Jude Properties”).

In addition to these gold properties we hold various other exploration rights and interests and are actively exploring in a variety of locations in West Africa and South America.

Bogoso/Prestea is owned by our 90% owned subsidiary Golden Star (Bogoso/Prestea) Limited (“GSBPL”) (formerly Bogoso Gold Limited) which was acquired in 1999. Bogoso/Prestea produced and sold approximately 132,000 ounces of gold during 2005.

Through another 90% owned subsidiary, Golden Star (Wassa) Limited (“GSWL”) (formerly Wexford Goldfields Limited), we own the Wassa gold mine located some 35 kilometers east of Bogoso/Prestea. Construction and commissioning of Wassa’s new processing plant and open pit mine was completed at the end of March 2005 and the project was placed in service on April 1, 2005. Wassa produced and sold approximately 69,000 ounces of gold in 2005 following its April 2005 in-service date.

The Prestea Underground is located on the Prestea property and consists of a currently inactive underground gold mine and associated support facilities. GSBPL owns a 90% operating interest in the

Table of Contents

Prestea Underground. We are currently conducting exploration and engineering studies to determine if the underground mine can be reactivated on a profitable basis.

Through our 100% owned subsidiary, St. Jude Resources Ltd. (“St. Jude”), we own the St. Jude Properties in southwest Ghana. The St. Jude Properties consist of the Hwini–Butre and Benso concessions which together cover an area of 201 square kilometers. Both concessions contain undeveloped zones of gold mineralization. The Hwini–Butre and Benso concessions are located approximately 75 and 45 kilometers south of Wassa, respectively based on the proposed haulage route. The mineralized zones have been delineated through the efforts of the prior owner who conducted extensive exploration work from the mid–1990s to 2005.

We hold interests in several gold exploration projects in Ghana and elsewhere in West Africa including Sierra Leone, Burkina Faso, Niger and Cote d’Ivoire. We also hold and manage exploration properties in Suriname and French Guiana in South America. We hold indirect interests in gold exploration properties in Peru and Chile through a 16.5% shareholding investment in Goldmin Consolidated Holdings. Golden Star also own a 43% interest in EURO Resources S.A. (“EURO”), a French publicly–traded royalty holding company which owns a royalty interest based on gold production at Cambior Inc.’s Rosebel gold mine in Suriname.

Our corporate headquarters are located in Littleton, Colorado, USA and we also maintain a regional corporate office in Accra, Ghana. Our accounting records are kept in compliance with Canadian GAAP. All of our operations, except for certain exploration projects keep financial records in US dollars.

2. Inventories

	As of September 30, 2006	As of December 31, 2005
	(Restated-Note 25)	
Stockpiled ore	\$ 14,338	\$ 5,753
In–process	3,101	3,106
Materials and supplies	22,690	14,322
Total	\$ 40,129	\$ 23,181

3. Deposits

Represents cash advances and payments for equipment and materials purchases by GSWL and GSBPL which are not yet delivered on-site.

4. Long Term Investments

We hold a 16.5% interest in Goldmin Consolidated Holdings, a privately held gold exploration company which operates in South America. In the year ended December 31, 2005 we accounted for our investment as an equity investment, but by March 31, 2006 our investment was diluted to less than 20%, and we now account for the investment on the cost basis at \$1.5 million.

At December 31, 2005 we held approximately 11% of the outstanding common shares of Moto Goldmines Limited (“Moto”), a gold exploration and development company publicly traded in Canada, with a focus on gold exploration and development in the Democratic Republic of Congo. In March 2006 we exercised our remaining one million warrants increasing our total ownership to six million common shares, and immediately afterward sold all six million common shares in a “bought–deal” transaction in Canada for Cdn\$7.50 per share. The sale of the six million shares resulted in net proceeds to Golden Star of \$39.0 million (Cdn\$45.0 million) yielding a pre–tax capital gain of \$30.3 million.

5. Investment in EURO

EURO's most significant asset is its royalty from the Rosebel mine in Suriname, owned and operated by Cambior Inc. Additionally, EURO holds certain gold exploration and development mineral rights in French Guiana, which are the subject of joint venture arrangements. At March 31, 2006 we owned 53% of EURO's outstanding common shares and as such consolidated EURO's financial results with our own.

During the second quarter of 2006 we sold 362,029 of our EURO shares in open market transactions realizing approximately \$0.7 million of cash. On June 19, 2006 we sold an additional four million EURO shares in a private transaction receiving \$2.5 million of cash. The purchasers of the four million shares have agreed to pay additional consideration to Golden Star if they sell the shares at a gain.

The combined share sales during the second quarter diluted our holding in EURO's common shares to approximately 43%. In response to our reduced ownership position, the equity method of accounting was adopted on June 20, 2006 for our remaining interest in EURO. Under the equity accounting method, our consolidated financial statements no longer include EURO's assets and liabilities which at March 31, 2006 included \$3.2 million of net current assets, \$5.6 million of tax assets, \$7.0 million of bank loans and \$14.9 million of derivative liabilities. The net effect of the change in accounting method resulted in recognition of \$17.7 million of non-cash gains in the second quarter of 2006. The total gain from the change in our EURO ownership position, consisting of \$3.2 million in cash received from sale of shares and \$17.7 million from the change in accounting method, is \$20.9 million.

Under the equity method accounting rules, Golden Star will recognize a share of EURO's future earnings/losses in proportion to Golden Star's ownership position at the end of each period (currently 43%). Golden Star has a zero carrying value for its investment in EURO, and future gains and losses will not be recognized until such time as EURO's future income offsets accumulated deficits. The value of our remaining 21.4 million EURO common shares was \$33.9 million based on EURO's closing share price on September 30, 2006.

6. Deferred Exploration and Development Costs

Consolidated property expenditures on our exploration projects for the nine months ended September 30, 2006 were as follows:

	Deferred Exploration & Development Costs as of 12/31/05	Capitalized Exploration Expenditures	Acquisition Costs	Impairments	Transfer to mining properties	Deferred Exploration & Development Costs as of 9/30/06
AFRICAN PROJECTS						
Akropong trend and other Ghana	\$ 4,947	\$ 80	\$ —	\$ —	\$ (4,209)	\$ 818
Prestea property – Ghana	2,074	25	—	—	(2,099)	—
Hwini–Butre and Benso – Ghana	135,832	3,194	1,897	—	—	140,923
Mano River – Sierra Leone	1,285	555	—	(197)	—	1,643

Total	\$ 105,594	\$ 18,194	\$ 87,400	\$ 96,318	\$ 11,791	\$ 84,527

8. Mining Properties

	As of September 30, 2006			As of December 31, 2005		
	Mining Properties at Cost	Accumulated Amortization	Mining Properties, Net Book Value	Mining Properties at Cost	Accumulated Amortization	Mining Properties, Net Book Value
Bogoso/Prestea	\$ 53,249	\$ 32,393	\$ 20,856	\$ 46,970	\$ 28,792	\$ 18,178
Prestea Underground	27,543	—	27,543	21,612	—	21,612
Bogoso Sulfide	13,065	—	13,065	13,065	—	13,065
Mampon	15,631	—	15,631	15,062	—	15,062
Wassa	54,760	9,425	45,335	50,810	5,104	45,706
Other	11,740	—	11,740	4,465	—	4,465
Total	\$ 175,988	\$ 41,818	\$ 134,170	\$ 151,984	\$ 33,896	\$ 118,088

9. Mine Construction-in-Progress

At September 30, 2006 and at December 31, 2005, mine construction-in-progress represents costs incurred for the Bogoso Sulfide Expansion Project since the beginning of 2005. Included in the total are costs of development drilling, plant equipment purchases, materials and construction costs, payments to the construction contractors, mining equipment costs, capitalized interest and pre-production stripping costs.

	As of September 30, 2006	As of December 31, 2005
Plant construction cost	\$ 107,983	\$ 34,871
Mining equipment cost	13,667	—
Pre-production stripping cost	13,019	—
Capitalized Interest	5,105	1,836
Total	\$ 139,774	\$ 36,707

10. Deferred Stripping

The amount of stripping costs to be capitalized in each period is calculated by determining the tonnes of waste moved in excess of the life-of-pit average strip ratio and valuing the excess tonnage of removed waste at the average mining cost per tonne during the period. Costs are recovered in periods when the actual tonnes of waste moved are less than the average life-of-pit rate, such tonnes being valued at the rolling average cost of the waste tonnage amounts capitalized.

Table of Contents

The capitalized component of waste rock removal costs is shown on our consolidated balance sheets in the line item titled “Deferred Stripping.” The cost impact is included in the Statements of Operations in the line item titled “Mining operations.”

During the quarter ended September 30, 2006 all the remaining deferred stripping cost of \$0.5 million was recovered.

11. Debt

	As of September 30, 2006	As of December 31, 2005
Current debt:		
Bank loan – EURO Resources (Note a)	\$ –	\$ 2,667
Equipment financing loans (Note b)	5,812	4,188
Total current debt	\$ 5,812	\$ 6,855
Long term debt:		
Bank loan – EURO Ressources (Note a)	\$ –	\$ 5,000
Equipment financing loans (Note b)	18,722	11,632
Convertible notes (Note c)	48,195	47,666
Total long term debt	\$ 66,917	\$ 64,298

- (a) Bank debt – As a result of the sale of the EURO shares in June 2006 (see Note 5), Golden Star no longer consolidates the financial statements of EURO. Therefore the EURO bank loan is not included within consolidated debt as of September 30, 2006.
- (b) Equipment financing credit facility – We have established an equipment financing facility between Caterpillar Financial Services Corporation, GSBPL and GSWL, with Golden Star as the guarantor of all amounts borrowed. The facility provides credit for a mixture of new and used mining equipment. This facility is reviewed annually. Amounts drawn under this facility are repayable over five years for new equipment and over two years for used equipment. The interest rate for each draw-down is fixed at the date of the draw-down using the Federal Reserve Bank 2-year or 5-year swap rate or LIBOR plus 2.38%. As of September 30, 2006, \$24.5 million was outstanding under this facility. The average interest rate on the outstanding loans is approximately 6.7%. We estimate the fair value of the equipment financing facility to be approximately \$24.0 million at September 30, 2006.
- (c) Convertible notes – We sold \$50 million of senior unsecured convertible notes to a private investment fund on April 15, 2005. These notes were issued at par and bear interest at 6.85% with a conversion price of \$4.50 per common share. At the maturity date, April 15, 2009, we have the option, to repay the outstanding notes with i.) cash, ii.) by issuing common shares to the note holders or iii.) a combination of cash and common shares. For any notes repaid in common shares the number of shares will be determined by dividing the loan balance by an amount equal to 95% of the average price of the 20 trading day period ended five days before the notes are due. Due to the beneficial conversion feature, approximately \$47.1 million of the note balance was initially classified as a liability and \$2.9 million was classified as equity. Periodic accretion will increase the liability to the full \$50 million amount due (after adjustments, if any, for converted notes) by the end of the note term. The periodic accretion is included in interest expense. A total of \$5.1 million of interest on the convertible notes has been capitalized

Table of Contents

as Bogoso sulfide expansion project costs. We estimate the fair value of the convertible notes to be approximately \$39.2 million at September 30, 2006.

- (d) Debt facility – In October 2006 we finalized a debt facility of \$15 million with two Ghanaian banks. See Note 25 – Subsequent events for further detail of this transaction.

12. Derivatives

EURO – In January 2005, EURO, then a majority owned subsidiary, entered into a series of derivative contracts in conjunction with a \$6.0 million loan agreement. EURO's derivatives are tied to a future stream of gold royalty payments EURO expects to receive from Cambior Inc., which purchased a mining property interest from Golden Star in 2002. Golden Star originally owned the royalty but sold the royalty to EURO in 2004. In September 2005, EURO entered into a second set of derivative contracts related to a further \$3.0 million debt facility.

During 2005, we recorded a realized derivative loss of \$0.5 million for cash settlement of the first four quarterly tranches and we recorded \$9.6 million of unrealized, non-cash, mark-to-market losses as of December 31, 2005. At June 30, 2006 we recorded \$0.8 million payments to EURO's counterparties for expiring positions and an additional \$4.1 million mark-to-market loss for the period ended June 19, 2006.

As a result of the sale of the EURO shares in June 2006 (see Note 5), Golden Star no longer consolidates the financial statements of EURO. Therefore the EURO derivative contract liability is not included in our consolidated balance sheet as of September 30, 2006.

Gold Derivatives – To provide gold price protection during the 2005/2006 construction phase of the Bogoso Sulfide Expansion Project, we purchased a series of gold puts. The first purchase occurred in the second quarter of 2005 when we purchased put options on 140,000 ounces of gold at an average floor price of \$409.75, paying approximately \$1.0 million in cash for the options.

We purchased an additional 90,000 put options in the third quarter of 2005 locking in a \$400 per ounce floor for each of the 90,000 ounces. Increases in gold price during the first nine months of 2006 resulted in a nil value for our remaining puts at September 30, 2006. This was \$0.1 million less than the value at December 31, 2005 and approximately \$1.0 million less than the initial purchase cost. We have 75,000 ounces of put options with an average strike price of \$404 per ounce remaining at September 30, 2006.

To acquire the put options in the third quarter of 2005, we sold 90,000 ounces of call options with a strike price of \$525 per ounce. The revenue from the sale of the call options exactly offset the cost of the put options bought in the same quarter. At the beginning of 2006 there were 65,000 call options outstanding. During the second quarter of 2006 we bought back 30,000 ounces of call options for \$2.6 million. The lower number of call options held by the Company at September 30, 2006 resulted in a \$1.2 million decrease in settlement costs of the calls and accordingly we recorded a \$1.2 million mark-to-market gain on the calls. In addition, call options for 23,000 ounces were exercised during the first nine months of 2006 requiring a \$2.0 million payment to the counterparty. The payment is included in derivative loss in the Statement of Operations. At September 30, 2006 our gold call obligation consists of 12,000 ounces at \$525 per ounce.

Foreign Currency Forward Positions – To help control the potential adverse impact of fluctuations in foreign currency exchange rates on the cost of equipment and materials we expect to purchase during the 2006 construction phase of the Bogoso Sulfide Expansion Project, we entered into Rand forward contracts. These contracts, established without cost, had a fair value of nil and \$1.0 million at September 30, 2006 and December 31, 2005, respectively.

Table of Contents

The following table summarizes our derivative contracts at September 30, 2006:

<u>At September 30, 2006</u>	<u>2006</u>	<u>2007</u>	<u>Total/ Average</u>
Gold put options			
Ounces (thousands)	37.5	37.5	75
Average price per ounce (\$)	404	404	404
Gold call options			
Ounces (thousands)	6	6	12
Average price per ounce (\$)	525	525	525

The puts, calls and foreign exchange forward contracts are comprised of numerous individual contracts each with a different settlement date.

<u>Fair Value of Derivatives</u>	<u>September 30, 2006</u>	<u>Fair value of EURO derivative on June 19, 2006</u>	<u>December 31, 2005</u>	<u>Nine months (Expense)/ Gain</u>
Cash-settled forward gold price agreements	\$ —	\$ (13,707)	\$ (9,560)	\$ (4,147)
Puts	—	—	74	(74)
Calls	(1,016)	—	(2,250)	1,234
Rand forward purchases	—	—	1,146	(1,146)
Euro forward purchases	—	—	(162)	162
Unrealized loss	\$ (1,016)	\$ (13,707)	\$ (10,752)	\$ (3,971)
Realized losses:				
Cash-settled forward gold price agreements				(757)
Calls				(4,618)
Total gains/(losses)				\$ (9,346)

13. Asset Retirement Obligations

Our Asset Retirement Obligations (“ARO”) are equal to the present value of all estimated future closure costs associated with reclamation, demolition and stabilization of our Bogoso/Prestea and Wassa mining and ore processing properties. Included in this liability are the costs of mine closure and reclamation, processing plant and infrastructure demolition, tailings pond stabilization and reclamation and environmental monitoring costs. While the majority of these costs will be incurred near the end of the mines’ lives, it is expected that certain on-going reclamation costs will be incurred prior to mine closure. These costs are recorded against the current ARO provision as incurred.

The changes in the carrying amount of the ARO were as follows:

Balance at December 31, 2005	\$ 11,393
Accretion expense	544
Cost of reclamation work performed	(957)
New AROs incurred during the period	6,597
Balance at September 30, 2006	\$ 17,577
Current portion	\$ 3,661
Long term portion	\$ 13,916

Table of Contents

During the quarter we increased our estimate of the asset retirement obligation at Bogoso/Prestea and Wassa as a result of the greater reclamation liability associated with the Bogoso Sulfide Expansion Project and the mining of the SAK pits at Wassa. The increased liability relates to the reclamation associated with the removal of the plant, the expanded tailings facility and the increased size of the pits and dumps. We also completed a reclamation study for bonding purposes with the Ghana Environmental Protection Agency (“EPA”) and updated our cost estimates based on the results of the study.

14. Commitments and Contingencies

Our commitments and contingencies include the following items:

- (e) **Environmental Regulations** – The Company’s mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and are generally becoming more restrictive. As such we cannot predict the full amount of our future expenditure to comply with these laws and regulations. We conduct our operations so as to protect the environment and believe our operations are in compliance with applicable laws and regulations in all material respects.
- (f) **Environmental Bonding in Ghana** – In 2005, pursuant to a reclamation bonding agreement between the EPA and GSWL, we bonded \$3.0 million to cover future reclamation obligations at Wassa. To meet the bonding requirements we established a \$2.85 million letter of credit and deposited \$0.15 million of cash with the EPA. In addition, pursuant to a bonding agreement between the EPA and GSBPL we bonded \$9.5 million in early 2006 to cover our future obligations at Bogoso/Prestea. To meet these requirements we deposited \$0.9 million of cash with the EPA with the balance covered by a letter of credit.
- (g) **Cash Restricted for Environmental Rehabilitation Liabilities** – In 1999, we were required, according to the acquisition agreement with the sellers of GSBPL, to restrict \$6.0 million of cash to be used for the ongoing and final reclamation and closure costs at Bogoso. Between 1999 and 2001 we withdrew \$2.6 million of the restricted cash to cover our out-of-pocket cash reclamation costs. In early 2006 GSBPL met the EPA’s bonding requirements and as a result the sellers of GSBPL released the remaining \$3.5 million during September 2006.
- (h) **Royalties** –
 - (i) **Dunkwa Properties:** As part of the acquisition of the Dunkwa properties in August 2003, we agreed to pay the seller a net smelter return royalty on future gold production from the Mansiso and Asikuma properties. Per the acquisition agreement, there will be no royalty due on the first 200,000 ounces produced from Mampon which is located on the Asikuma property. The amount of the royalty is based on a sliding scale which ranges from 2% of net smelter return at gold prices at or below \$300 per ounce up to 3.5% for gold prices in excess of \$400 per ounce.
 - (ii) **Government of Ghana:** Under the laws of Ghana, a holder of a mining lease is required to pay an annual royalty of not less than 3% and not more than 6% of

the total revenues earned from the lease area. The royalty is payable on a quarterly basis. We currently pay a 3% annual royalty on gold production from Bogoso/Prestea and Wassa.

- (iii) Benso: Benso is subject to a 1.5% net smelter return royalty and a \$1.00 per ounce gold production royalty. The smelter return royalty may be purchased for \$4.0 million (or \$6.0 million if a feasibility study indicates more than 3.5 million ounces of recoverable gold) and the gold production royalty may be purchased for \$0.5 million.
- (iv) Prestea Underground – The Prestea Underground is subject to a 2.5% net profits interest on future income. Ownership of the 2.5% net profit interest is currently held by the bankruptcy trustee overseeing liquidation of Prestea Gold Resources Limited, our former joint venture partner in the Prestea Underground.
- (i) **Afema Project** – On March 29, 2005 we entered into an agreement with Societe d’Etat pour le Development Minier de la Cote d’Ivoire (“SO.DE.MI.”), the Cote d’Ivoire state mining and exploration company, to acquire their 90% interest in the Afema gold property in south–east Cote d’Ivoire. A \$0.1 million initial payment to SO.DE.MI. provided us the right to carry out a six month detailed technical due diligence program. On September 30, 2005 a six month extension to March 29, 2006 was granted by SO.DE.MI. to allow Golden Star to carry out further due diligence work and to analyze the large quantity of data collected during 2005, after which Golden Star has the right to complete the transaction to acquire 100% of SO.DE.MI.’s rights in the Afema property for \$1.5 million. On March 14, 2006, we contacted SO.DE.MI. to clarify that (i) Golden Star will be indemnified in respect of the past environmental degradation at Afema, and (ii) that no other claims against the property exist. SO.DE.MI. is still considering its response to the latter question and hence the option remains unexercised pending their decision. In addition to the acquisition payments, we agreed to pay SO.DE.MI. a royalty on any future gold production from the Afema property. The royalty is indexed to the gold price and ranges from 2% of net smelter returns at gold prices below \$300 per ounce to 3.5% of net smelter returns for gold prices exceeding \$525 per ounce. If we proceed with the \$1.5 million payment to acquire full rights to the property, the purchase agreement requires us to spend an additional \$3.5 million on exploration work at Afema, subject to exploration success, over the following three and a half years.
- (j) **Stock based compensation** – On September 9, 2006 GSBPL and GSWL entered into an agreement with the Ghana Mine Workers Union whereby GSBPL and GSWL agreed to grant each union employee in employment on August 31, 2006 Golden Star options or at our election, Share Appreciation Rights (“SAR’s”). The union employees will receive 100 options (or SAR’s) for each year of service up to a maximum of 500 options (or SAR’s). While the grant of these options (or SAR’s) have been approved they still have not been granted to the union employees as of September 30, 2006.
- (k) We are engaged in routine litigation incidental to our business. No material legal proceedings, involving us or our business are pending, or, to our knowledge, contemplated, by any governmental authority. We are not aware of any material events of non–compliance with environmental laws and regulations.

15. Share Capital

Changes in share capital during the nine months ended September 30, 2006 were:

Table of Contents

	<u>Shares</u>	<u>Amount</u>
Balance as of December 31, 2005	205,954,582	\$522,510
Common shares issued:		
Option exercises	1,887,176	4,680
Reclassification of warrants to capital surplus	—	(2,575)
Bonus shares and other	4,000	(134)
Balance as of September 30, 2006	207,845,758	\$524,481

16. Warrants

The following warrants were outstanding as of September 30, 2006:

<u>Issued with:</u>	<u>Date issued</u>	<u>Warrants outstanding</u>	<u>Exercise price</u>	<u>Expiration date</u>
Equity offering	February 14, 2003	8,448,334	Cdn\$4.60	February 14, 2007
St. Jude acquisition	December 21, 2005	3,240,000	Cdn\$4.17	November 20, 2008
Total		11,688,334		

The 8.4 million warrants expiring February 14, 2007 are traded on the Toronto Stock Exchange under the symbol GSC.WT.A. No warrants were exercised during the nine months ended September 30, 2005 and 2006.

17. Stock Based Compensation

Stock Options – We have one stock option plan, the Second Amended and Restated 1997 Stock Option Plan (the “Plan”) and options are granted under this plan from time to time at the discretion of the Compensation Committee. Options granted are non-assignable and are exercisable for a period of ten years or such other period as stipulated in a stock option agreement between Golden Star and the optionee. Under the GSR Plan, we may grant options to employees, consultants and directors of the Company or its subsidiaries for up to 15,000,000 shares of common stock. Under the plan we reserved an aggregate of 15,000,000 shares of common stock for issuance pursuant to the exercise of options of which 11,456,351 is available at September 30, 2006. Options take the form of non-qualified stock options, and the exercise price of each option is not less than the market price of our stock on the date of grant. Options typically vest over periods ranging from immediately to four years from the date of grant. Vesting periods are determined at the discretion of the Compensation Committee.

In addition to options issued under the Plan, 2,533,176 options were issued to various employees of St. Jude in exchange for St. Jude options of which 864,000 remain unexercised as of September 30, 2006. All of the remaining unexercised options held by St. Jude employees are vested. All figures shown below include the options issued to St. Jude employees.

Amounts recognized in the statements of operations with respect to the Plan are as follows:

	<u>Nine months ended September 30,</u>	
	<u>2006</u>	<u>2005</u>
Total cost during the period	\$1,568	\$900

We granted 850,650 and 514,000 options during the nine months ended September 30, 2006 and September 30, 2005, respectively. The Company recognized \$1.6 million and \$0.9 million of non-cash compensation expense in the nine months ended September 30, 2006 and 2005, respectively. Golden Star does not receive a tax deduction for the issuance of options. As a result we did not recognize any income tax benefit related to the stock compensation expense during the nine months ended September 30, 2006 and 2005.

Table of Contents

The fair value of options granted during the first nine months of 2006 and 2005 were estimated at the grant dates using the Black–Scholes option–pricing model based on the assumptions noted in the following table:

	Nine months ended September 30,	
	2006	2005
Expected volatility	63.7% to 103.4%	34.9%
Risk–free interest rate	4.00% to 4.09%	3.15% to 3.52%
Expected lives	4 to 7 years	3.5 to 5 years
Dividend yield	0%	0%

In 2006 expected volatilities are based on the historical volatility of Golden Star’s shares. Golden Star uses historical data to estimate share option exercise and employee departure behavior used in the Black–Scholes model; groups of employees that have dissimilar historical behavior are considered separately for valuation purposes. The expected term of the options granted represents the period of time that the option granted are expected to be outstanding; the range given above results from certain groups of employees exhibiting different post–vesting behaviors. The risk–free rate for periods within the contractual term of the option is based on the Canadian Chartered Bank Administered Interest rates in effect at the time of the grant.

A summary of option activity under the Plan as of September 30, 2006 and changes during the nine months then ended is presented below:

	Options (’000’)	Weighted– Average Exercise price (Cdn\$)	Weighted– Average Remaining Contractual Term (Years)	Aggregate intrinsic value (\$’000)
Outstanding as of December 31, 2005	7,390	2.75	5.2	\$9,554
Granted	851	3.88	9.4	—
Exercised	(1,887)	1.97	—	2,209
Forfeited	(136)	7.07	—	—
Outstanding as of September 30, 2006	<u>6,218</u>	<u>3.02</u>	<u>5.6</u>	<u>7,073</u>
Exercisable at September 30, 2006	3,954	1.78	4.0	\$7,073

The weighted–average grant date fair value of share options granted during the nine months ended September 30, 2006 and September 30, 2005 was Cdn\$2.70 and Cdn\$1.67, respectively. The intrinsic value of options exercised during the nine months ended September 30, 2006 and 2005 was \$2.2 million and \$0.2 million, respectively.

A summary of the status of non–vested options at September 30, 2006 and changes during the nine months ended September 30, 2006, is presented below:

	Number of options (’000)	Weighted average grant date fair value (Cdn\$)
Nonvested at January 1, 2006	155	2.03
Granted	851	2.74
Vested	(466)	2.61
Forfeited	(71)	2.09
Nonvested at September 30, 2006	469	2.74

Table of Contents

As of September 30, 2006 there was a total unrecognized compensation cost of Cdn\$1.2 million related to non-vested share-based compensation granted under the Plan. That cost is expected to be recognized over a weighted-average period of 2.3 years. The total fair values of shares vested during the nine months ended September 30, 2006 and 2005 were Cdn\$1.2 million and Cdn\$0.4 million, respectively.

Stock Bonus Plan – In December 1992, we established an Employees’ Stock Bonus Plan (the “Bonus Plan”) for any full-time or part-time employee (whether or not a director) of the Company or any of our subsidiaries who has rendered meritorious services which contributed to the success of the Company or any of its subsidiaries. The Bonus Plan provides that a specifically designated committee of the Board of Directors may grant bonus common shares on terms that it might determine, within the limitations of the Bonus Plan and subject to the rules of applicable regulatory authorities. The Bonus Plan, as amended, provides for the issuance of 900,000 common shares of bonus stock of which 495,162 common shares had been issued as of September 30, 2006.

During the nine months ended September 30, 2006 and 2005 we issued 4,000 and 45,342 common shares, respectively, to employees under the Bonus Plan.

18. Income Taxes

Income tax (expense)/benefit attributable to net income before income taxes consists of:

	Three months ended September 30,		Nine months ended September 30,	
	2006 (Restated-Note 25)	2005	2006 (Restated-Note 25)	2005
Current				
Canada	\$ —	\$ —	\$ (4,926)	\$ —
Foreign	—	—	—	—
Future				
Canada	61	—	3,179	—
Foreign	(138)	1,689	(4,916)	1,710
Total	\$ (77)	\$ 1,689	\$ (6,663)	\$ 1,710

The current tax expense recorded for the nine months ended September 30, 2006 relates to the gain on sale of the Moto shares. The Canadian future tax benefit recorded relates primarily to exploration expenditures incurred by St. Jude. The foreign future tax expense recorded for the nine months ended September 30, 2006 relates primarily to the sale of EURO (see Note 5) and the decrease in the Ghanaian tax rate, which is offset by derivative losses incurred. Golden Star records a valuation allowance against any portion of its remaining future income tax assets that it believes will, more likely than not, fail to be realized.

19. Earnings per Common Share

The following table provides a reconciliation between basic and diluted earnings per common share:

Table of Contents

	Three months ended September 30,		Nine months ended September 30,	
	2006	2005	2006	2005
	(Restated-Note 25)		(Restated-Note 25)	
Net income/(loss)	\$ 1,533	\$ (6,657)	\$ 33,940	\$ (12,575)
Weighted average number of common shares (millions)	207.3	142.8	207.4	142.5
Dilutive securities:				
Options	1.9	1.8	2.0	1.9
Warrants	—	—	—	—
Weighted average number of diluted shares	209.2	144.6	209.4	144.4
Basic earnings/(loss) per share	\$ 0.007	\$ (0.047)	\$ 0.164	\$ (0.088)
Diluted earnings/(loss) per share	\$ 0.007	\$ (0.047)	\$ 0.162	\$ (0.088)

20. Supplemental Cash Flow Information

No cash income taxes were paid during the nine months ended September 30, 2006 and 2005. Cash paid for interest was \$2.9 million and \$1.1 million for September 30, 2006 and 2005, respectively. A total of \$53,000 and nil of depreciation was included in general and administrative costs, or was capitalized into projects, for the quarters ended September 30, 2006 and 2005, respectively.

	Nine months ended September 30,	
	2006	2005
Supplemental disclosure of non-cash transactions		
De-consolidation of EURO (see Note 5):		
- Accounts receivable	\$2,341	—
- Capitalized loan fees	91	—
- Accounts Payable	754	—
- Derivative liability	6,333	—

21. Operations by Segment and Geographic Area

The following segment and geographic data includes revenues based on product shipment origin and long-lived assets based on physical location. The corporate entity is incorporated in Canada.

As of and for the three months ended September 30,	Africa – Ghana			South America	Corporate	Total (Restated-Note 25)
	Bogoso/ Prestea (Restated-Note 25)	Wassa	Other

22. Related Parties

We obtained legal services from a legal firm to which our Chairman is counsel. Total value of all services purchased from this law firm during the first nine months was \$0.6 million. Our Chairman did not personally perform any legal services for us during the period nor did he benefit directly or indirectly from payments for the services performed by the firm.

During the first quarter of 2006, a corporation controlled by Michael A. Terrell, a director of Golden Star, provided management services to St. Jude for which it was paid Cdn\$0.13 million. Mr. Terrell became a director of Golden Star following our acquisition of St. Jude in December 2005. Mr. Terrell's company ceased providing services to St. Jude at March 31, 2006.

23. Financial Instruments

Fair Value – Our financial instruments are comprised of cash, short term investments, accounts receivable, restricted cash, accounts payable, accrued liabilities, accrued wages, payroll taxes, derivatives and debt. The fair value of cash and short term investments, derivatives, accounts receivable, accounts payable, accrued liabilities and accrued wages, payroll taxes and current debt equals their carrying value due to the short term nature of these items. The fair value of restricted cash is equal to the carrying value as the cash is invested in short term, high-quality instruments.

24. Generally Accepted Accounting Principles in the United States

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in Canada, which differ from US GAAP. The effect of applying US GAAP to our financial statements is shown below.

Table of Contents

(a) Consolidated Balance Sheets in US GAAP

	As of September 30, 2006 (Restated - Notes d1 and d9)	As of December 31, 2005 (Restated - Notes d1 and d9)
ASSETS		
Current assets:		
Cash and cash equivalents	\$ 10,043	\$ 89,709

Diluted net income per share	0.082	0.083	0.132	0.127	0.152	0.140

- (2) Minority investments in private entities whose major business is mineral exploration are deemed for US GAAP to be equivalent to exploration spending and are expensed as incurred.
- (3) Under US GAAP, investments in marketable equity securities are marked to fair value at the end of each period with gains and losses recognized in Other comprehensive income. Under Cdn GAAP gains and losses on marketable equity securities are noted in the foot notes and recognized in the statement of operations only when the investment is sold.
- (4) Under US GAAP, exploration, acquisition (except for purchase costs) and general and administrative costs related to exploration projects are charged to expense as incurred. Under Cdn GAAP, exploration, acquisition and direct general and administrative costs related to exploration projects are capitalized. In each subsequent period, the exploration, engineering, financial and market information for each exploration project is reviewed by management to determine if any of the capitalized costs are impaired. If found impaired, the asset's cost basis is reduced in accordance with Cdn GAAP provisions.

Table of Contents

- (5) Under US GAAP, the initial purchase cost of mining properties is capitalized. Pre-acquisition costs and subsequent development costs incurred, until such time as a final feasibility study is completed, are expensed in the period incurred. Under Cdn GAAP, the purchase costs of new mining properties as well as all development costs incurred after acquisition are capitalized and subsequently reviewed each period for impairment. If found impaired, the asset's cost basis is reduced in accordance with Cdn GAAP provisions.
- (6) Under US GAAP new production facilities are placed in service once the facility has been constructed and fully tested to the point where it can be shown that it is capable of producing its designed product as intended. Under Cdn GAAP new production facilities are placed in service when output reaches a significant portion of the facility's design capacity.
- (7) In March 2005, the Emerging Issues Task Force of the Financial Accounting Standards Board issued statement 04-6 "Accounting for Stripping Costs Incurred During Production in the Mining Industry" ("EITF 04-6") which precludes deferral of stripping costs during a mine's production phase. EITF 04-6 requires that deferred stripping costs be considered a variable production cost. The new pronouncement is effective January 1, 2006 and transition provisions allow any remaining balances in deferred stripping asset accounts to be closed directly to retained earnings on January 1, 2006. In Canada the Emerging Issues Committee ("EIC") has issued EIC 160 "Stripping Costs Incurred in the Production Phase of the Mining Operation" which concludes that deferred stripping costs during the production phase of a mine's life should generally be considered a variable production cost and included in the cost of inventory unless it can be shown that the stripping costs represent a betterment to the mineral property.
- (8) For US GAAP purposes, 100% of the \$50.0 million of convertible notes issued in the second quarter of 2005 was classified as a liability. Under Cdn GAAP, the fair value of the conversion feature is classified as equity and the balance is classified as a liability. Under Cdn GAAP, the liability portion is accreted each period in amounts which will increase the liability to its full amount as of the maturity date and the accretion is recorded as interest expense.
- (9) Under US GAAP the fair value of warrants denominated in currencies other than the company's functional currency are treated as a derivative liability. The derivative liability of such warrants is market to market at the end of each period and the change in fair value is recorded in the statement of operations. Under Cdn GAAP the issue-date fair value of all warrants is treated as a component of shareholders' equity and are recorded as contributed surplus and are not marked to their fair value. This US GAAP reconciliation has been restated to take effect of the differences between Cdn and US GAAP as described in this note.
- (10) Numerous transactions since the Company's organization in 1992 have contributed to the difference in share capital versus the Cdn GAAP balance, including: (i) under US GAAP, compensation expense was recorded for the difference between quoted market prices and the strike price of options granted to employees and directors under stock option plans while under Cdn GAAP, recognition of compensation expense was not required; (ii) in May 1992 our accumulated deficit was eliminated through an amalgamation (defined as a quasi-reorganization under US GAAP) — under US GAAP the cumulative deficit was greater than the deficit under Cdn GAAP due to the past write-offs of certain deferred exploration costs; and (iii) gains recognized in Cdn GAAP upon issuances of subsidiaries' shares are not allowed under US GAAP.
- (11) In December 2004, the Financial Accounting Standards Board ("FASB") finalized SFAS No. 123R "Share-Based Payment, amending SFAS No. 123" ("SFAS 123R"), effective beginning our first quarter of fiscal 2006. SFAS 123R requires the Company to expense stock options based on grant date fair value in its financial statements. Further, the SFAS 123R requires additional accounting related to the income tax effects and additional disclosure regarding the cash flow effects resulting from share-based payment arrangements. In March 2005, the U.S. Securities and Exchange Commission (the "SEC") issued Staff Accounting Bulletin ("SAB") No. 107, which expresses views of the SEC staff regarding the interaction between SFAS 123R and certain SEC rules and regulations, and provides the

Table of Contents

staff's views regarding the valuation of share-based payment arrangements for public companies. We adopted the optional provisions of SFAS No. 123 in 2003 and have expensed share based payments since that time. We have expanded share-based payment disclosures as required by SFAS 123R at March 31, 2006.

- (12) While tax accounting rules are essentially the same under both US and Cdn GAAP, tax account differences can arise from differing treatment of various assets and liabilities. For example, most exploration expenditures and certain mine developments cost are capitalized under Cdn GAAP and expensed under US GAAP, as explained in notes 3 and 4 above. An analysis of these differences indicates that there are larger potential tax benefits under US GAAP than under Cdn GAAP. However due to the uncertainty of utilization of these tax assets, valuation allowances have been applied to offset them. As a result there are currently no differences in tax assets recognized on the US and Cdn balance sheets but future events, particularly those regarding expected future earnings from the new sulfide processing operation, could result in differing tax asset balances in the future.

25. Restatement

This Form 10-Q/A has been amended to reflect correction of errors related to the computation of ore stockpile and in-process inventory balances and mining operation costs. The impact of the restatement on the first, second and third quarters of 2006 is shown in the table below.

(In millions of dollars except for per share data)	March 31, 2006		June 30, 2006		September 30, 2006	
	Originally	Restated	Originally	Restated	Originally	Restated

26. Subsequent Event

On October 11th, 2006, Golden Star entered into an agreement for a \$15 million debt facility to be provided by Ecobank Ghana Limited and Cal Bank Limited. Both banks are active in Ghana. The funds are available immediately for a term of 27 months at an interest rate of US Prime (currently 8.25%) plus one percentage point. Loan fees total one percent of the facility amount. The amount drawn under the facility is repayable in 24 equal installments starting three months after receipt of the funds. The debt is secured by the non-mobile assets of the Bogoso/Prestea mine and proceeds are to be used as partial funding for the Bogoso Sulfide Expansion Project. There are no hedging requirements or equity-type incentives required under the facility. As of November 6, 2006 \$7.5 million has been drawn under this facility.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the accompanying unaudited consolidated financial statements and related notes. The financial statements have been prepared in accordance with accounting principles generally accepted in Canada (“Cdn GAAP”). For a reconciliation to accounting principles generally accepted in the United States (“US GAAP”), see Note 24 to the consolidated financial statements. This Management’s Discussion and Analysis of Financial Condition and Results of Operations includes information available to November 6, 2006.

OUR BUSINESS

Through our subsidiaries we own a controlling interest in four significant gold properties in southern Ghana in West Africa:

- Bogoso/Prestea property, which is comprised of the adjoining Bogoso and Prestea surface mining leases (“Bogoso/Prestea”),
- Prestea Underground property (“Prestea Underground”),
- Wassa property (“Wassa”), and
- Hwini–Butre and Benso concessions (“St. Jude Properties”).

In addition to these gold properties we hold various other exploration rights and interests and are actively exploring in a variety of locations in West Africa and South America.

Bogoso/Prestea is owned by our 90% owned subsidiary Golden Star (Bogoso/Prestea) Limited (“GSBPL”), (formerly Bogoso Gold Limited) which was acquired in 1999. Bogoso/Prestea produced and sold approximately 132,000 ounces of gold during 2005.

Through another 90% owned subsidiary, Golden Star (Wassa) Limited (“GSWL”), (formerly Wexford Goldfields Limited), we own the Wassa gold mine located some 35 kilometers east of Bogoso/Prestea. Construction and commissioning of Wassa’s new processing plant and open pit mine was completed at the end of March 2005 and the project was placed in service on April 1, 2005. Wassa produced and sold approximately 69,000 ounces of gold in 2005 following its April 2005 in–service date.

The Prestea Underground is located on the Prestea property and consists of a currently inactive underground gold mine and associated support facilities. GSBPL owns a 90% operating interest in the Prestea Underground. We are currently conducting exploration and engineering studies to determine if the underground mine can be reactivated on a profitable basis.

Through our 100% owned subsidiary, St. Jude Resources Ltd. (“St. Jude”), we own the St. Jude Properties in southwest Ghana. The St. Jude Properties consist of the Hwini–Butre and Benso concessions which together cover an area of 201 square kilometers. Both concessions contain undeveloped zones of gold mineralization. The Hwini–Butre and Benso concessions are located approximately 75 and 45 kilometers south of Wassa, respectively based on the proposed haulage route. The mineralized zones have been delineated through the efforts of the prior owner who conducted extensive exploration work from the mid–1990s to 2005.

We hold interests in several gold exploration projects in Ghana and elsewhere in West Africa including Sierra Leone, Burkina Faso, Niger and Cote d’Ivoire. We also hold and manage exploration properties in Suriname and French Guiana in South America. We hold indirect interests in gold exploration properties in Peru and Chile through a 16.5% shareholding investment in Goldmin Consolidated Holdings. Golden

Table of Contents

Star also own a 43% interest in EURO Resources S.A. (“EURO”), a French publicly-traded royalty holding company which owns a royalty interest based on gold production at Cambior Inc.’s Rosebel gold mine in Suriname.

Our finance and administrative group is located in Littleton, Colorado, USA and we also maintain a regional corporate office in Accra, Ghana. Our accounting records are kept in compliance with Canadian GAAP and all of our operations, except for certain exploration projects keep financial records in US dollars.

NON-GAAP FINANCIAL MEASURES

In this Form 10-Q, we use the terms “total operating cost per ounce,” “total cash cost per ounce” and “cash operating cost per ounce.”

Total operating cost per ounce is equal to “Total mine operating costs” for the period, as found on our consolidated statements of operations, divided by the ounces of gold sold in the period. Total mine operating costs include all mine-site operating costs, including the costs of mining, processing, maintenance, work-in-process inventory changes, mine-site overhead, production taxes and royalties, mine site depreciation, depletion, amortization, asset retirement obligations and by-product credits but does not include exploration costs, corporate general and administrative expenses, impairment charges, corporate business development costs, gains and losses on asset sales, interest expense, mark-to-market gains and losses on derivatives, foreign currency gains and losses, gains and losses on investments and income tax.

Total cash cost per ounce for a period is equal to “Mining operations” costs for the period, as found on our consolidated statements of operations, divided by the number of ounces of gold sold during the period.

Cash operating cost per ounce for a period is equal to “total cash costs” for the period less production royalties and production taxes, divided by the number of ounces of gold sold during the period.

The calculations of total cash cost per ounce and cash operating cost per ounce are in compliance with an industry standard for such measures established in 1996 by the Gold Institute, a non-profit industry group.

The following table shows the derivation of these measures and a reconciliation of “total cash cost per ounce” and “cash operating cost per ounce.”

Derivation of Total Mine Operating Cost

	Wassa	For the nine months ended September 30, 2006	
		Bogoso/Pretea	Combined
		(Restated-Note 25)	(Restated-Note 25)
Mining operations	\$34,406	\$36,410	\$ 70,816
Mining related depreciation and amortization	8,539	7,407	15,946
Accretion of asset retirement obligations	160	384	544
Total mine operating costs	\$43,105	\$44,201	\$ 87,306
Ounces sold	69,262	78,739	148,001

Derivation of cost per ounce:

Total operating costs – GAAP (\$/oz)	\$ 622	\$ 561	\$ 590
Less depreciation and amortization (\$/oz)	123	94	108
Less accretion of asset retirement obligations (\$/oz)	2	5	4
Total cash cost (\$/oz)	497	462	478
Less royalties and production taxes (\$/oz)	18	18	17
Cash operating cost per ounce (\$/oz)	479	444	461

Table of Contents

Derivation of Total Mine Operating Cost

	For the nine months ended September 30, 2005		
	Wassa	Bogoso/Prestea	Combined
Mining operations	\$21,566	\$ 30,460	\$ 52,026
Mining related depreciation and amortization	4,128	6,424	10,552
Accretion of asset retirement obligations	142	398	540
Total mine operating costs	\$25,836	\$ 37,282	\$ 63,118
Ounces sold	45,063	101,709	146,772

Derivation of cost per ounce:

Total operating costs – GAAP (\$/oz)	\$ 573	\$ 367	\$ 430
Less depreciation and amortization (\$/oz)	92	63	72
Less accretion of asset retirement obligations (\$/oz)	3	4	4
Total cash cost (\$/oz)	478	300	354
Less royalties and production taxes (\$/oz)	13	12	13
Cash operating cost per ounce (\$/oz)	465	288	341

Derivation of Total Mine Operating Cost

	For the three months ended September 30, 2006		
	Wassa	Bogoso/Prestea (Restated-Note 25)	Combined (Restated-Note 25)
Mining operations	\$11,225	\$13,499	\$24,724
Mining related depreciation and amortization	2,764	2,378	5,142
Accretion of asset retirement obligations	58	132	190
Total mine operating costs	\$14,047	\$16,009	\$30,056
Ounces sold	23,244	34,611	57,855

Derivation of cost per ounce:

Total operating costs – GAAP (\$/oz)	\$ 604	\$ 463	\$ 520
Less depreciation and amortization (\$/oz)	119	69	89
Less accretion of asset retirement obligations (\$/oz)	2	4	3
Total cash cost (\$/oz)	483	390	428
Less royalties and production taxes (\$/oz)	19	18	18
Cash operating cost per ounce (\$/oz)	464	372	410

Derivation of Total Mine Operating Cost

	For the three months ended September 30, 2005		
	Wassa	Bogoso/Prestea	Combined
Mining operations	\$11,461	\$ 8,599	\$20,060
Mining related depreciation and amortization	2,429	2,210	4,639

Ounces sold	24,312	29,346	53,658

Derivation of cost per ounce:

Total operating costs – GAAP (\$/oz)	\$ 573	\$ 372	\$ 464
Less depreciation and amortization (\$/oz)	100	75	86
Less accretion of asset retirement obligations (\$/oz)	2	4	3
Total cash cost (\$/oz)	471	293	375
Less royalties and production taxes (\$/oz)	11	13	12
Cash operating cost per ounce (\$/oz)	460	280	363

Table of Contents

Total cash cost per ounce and cash operating cost per ounce should be considered as non-GAAP financial measures as defined in SEC Regulation S-K Item 10 and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. There are material limitations associated with the use of such non-GAAP measures. Since these measures do not incorporate revenues, changes in working capital and non-operating cash costs, they are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Changes in numerous factors including, but not limited to, mining rates, milling rates, gold grade, gold recovery, costs of labor, consumables and mine site general and administrative activities can cause these measures to increase or decrease. We believe that these measures are the same as, or similar to the measures of other gold mining companies, but may not be comparable to similarly titled measures in every instance.

Ownership – All figures and amounts in this Item 2 are shown on a 100% basis, which represents our current beneficial interest in gold production and revenues. Once all capital has been repaid, the Government of Ghana would receive 10% of the dividends distributed from the subsidiaries owning the Bogoso/Prestea and Wassa mines.

Restatement of Prior Periods – In early 2006, it was determined that hedge accounting had been improperly applied by our subsidiary EURO, for its cash-settled forward gold price agreements during the first three quarters of 2005. As a result, our Form 10-Qs for the first three quarters of 2005 have been amended to apply derivative accounting rather than hedge accounting to EURO's derivatives. In this Form 10-Q, comparative amounts from the quarter and nine months ended September 30, 2005 reflect this restatement.

BUSINESS STRATEGY AND DEVELOPMENT

Since 1999, our business and development strategy has been focused primarily on the acquisition of producing and development-stage gold properties in Ghana and on the exploration, development and operation of these properties. Since 1999, our exploration efforts have been focused on Ghana, other West African countries and South America.

In line with our business strategy, we acquired Bogoso in 1999 and have operated the Bogoso processing plant since that time. In 2001, we acquired Prestea and have been mining surface deposits at Prestea since late 2001. In late 2002, we acquired Wassa and following completion of a feasibility study, constructed a new CIL processing plant at Wassa which began commercial operation in April 2005. We are currently constructing a new BIOX[®] processing plant at Bogoso designed to expand annual processing through-put at Bogoso/Prestea from approximately 1.5 million tonnes per annum to approximately 5.0 million tonnes per annum. Based on currently known reserves we expect a mine life of approximately seven years at Bogoso/Prestea. Achievement of this target is subject to numerous risks. See the discussion of Risk Factors in Item 1A of our 2005 Form 10-K.

In late 2005, we acquired the St. Jude Properties where we are carrying out geological, environmental and engineering studies to determine the economic feasibility of these undeveloped gold properties.

Our overall objective since 1999 has been to grow our business to become a mid-tier gold producer with an annualized production rate of approximately 500,000 ounces. We anticipate reaching this during 2007. We continue to evaluate potential acquisition and merger opportunities that could further increase our annual gold production, however we presently have no agreement or understanding with respect to any specific potential transaction.

SIGNIFICANT TRENDS AND EVENTS DURING THE FIRST NINE MONTHS OF 2006

Power Restrictions in Ghana

In late August, the Ghana Government's subsidiary which controls Ghanaian power supply, Volta River Authority ("VRA"), instructed large industrial users in Ghana, including the mining sector, to reduce power usage by 25% to 50% due to a temporary country-wide power shortage. Ghana relies on power from three sources: (i.) the Akosombo and Kpong Hydroelectric Power Stations, (ii) the Aboadze Thermal Power Station; and (iii) imports from Côte d'Ivoire.

The Aboadze Thermal Power Station was operating at less than full capacity due to refurbishment of a major component of one of its turbines. This component has now been repaired and returned to Ghana and is being installed. The Aboadze plant is expected to return to full capacity in November 2006. In addition, unusually low rainfall in the catchment area in 2006 has led to the lowest recorded water levels at the Akosombo reservoir which provides water to the VRA's Akosombo Hydroelectric Power Station, resulting in decreased power output. While seasonal rains have recently resulted in an increase in the water level, it is still at a record low for this time of year.

We are currently curtailing power consumption to conform to the VRA's power rationing requirements. Our cuts have been achieved by (i) reducing plant through-put from 11,000 tonnes per day to approximately 8,000 tonnes per day at Wassa, (ii) limiting activities at the Prestea Underground mine, which has halted exploration, and (iii) operating some of our stand – by diesel generating capacity. By taking these actions we have been able to continue normal operations at the Bogoso/Prestea processing plant.

In October 2006, sufficient additional power to enable the commissioning of portions of the Bogoso Sulfide Expansion Project has been made available by the VRA.

As a result of the power rationing, third quarter plant through-put at Wassa was less than we would have expected with no power restrictions, however the impact was largely offset by higher grade ore from the SAK pit.

Recognizing that power restrictions are likely to continue well into 2007, the mining companies in Ghana have cooperated to identify additional power generating capacity that can be mobilized to Ghana and be operating in early 2007. A suitable 100 megawatt power station has been identified and discussions with the seller and the wholesale power producer are at an advanced stage and we expect a commitment to this power station in the near future. Golden Star's share of the power station would be 25 megawatts, sufficient to provide about half of our power requirements in 2007, and our share of the cost to purchase, ship and construct the power station, is expected to be approximately \$5.0 million. We expect that this, combined with our normal power supplies, will more than satisfy our power requirements.

Personnel changes

Vice President Operations: In June Golden Star appointed Colin Belshaw as Vice President Operations. Colin Belshaw is a British mining engineer with approximately 30 years experience in the mining sector in Africa, the Americas and Europe and a background in gold and copper mining in both open pit and underground mining situations. Initially, Mr. Belshaw will be based in Ghana.

Table of Contents

Vice President Ghana: Daniel Owiredu was appointed as Vice President Ghana. Mr. Owiredu is a Ghanaian engineer with more than 20 years experience in the mining sector in Ghana and West Africa. Most recently, Mr. Owiredu was Deputy Chief Operating Officer for AngloGold Ashanti Ltd. following the amalgamation of AngloGold Ltd. and Ashanti Goldfields Co. Ltd. Daniel will be based in Ghana.

Resignation of Chief Financial Officer: On October 13, 2006 Allan Marter resigned as Chief Financial Officer. A search for a permanent replacement is underway and until an appointment is made, Mr. Roger Palmer, Vice President Finance & Controller, will act as Chief Financial Officer, while Mr. Bruce Higson-Smith will take on the additional responsibility for investor relations.

Other Additions to Management: Golden Star expanded its management team by employing Mark Thorpe, Vice President Sustainability; Peter Bourke, Vice President Technical Services; David Partridge, General Manager Bogoso/Prestea and Ted Strickler Vice President Human Resources and Administration. Each of the new employees has extensive experience in their field of expertise. Golden Star hired these employees as part of its continued focus on the strategic growth of the Company to a mid-tier producer.

Sale of Shares of Moto Goldmines Limited

In March 2006, we exercised our remaining one million Moto Goldmines Limited (“Moto”) warrants bringing our total ownership in Moto to six million common shares and immediately afterward sold all six million common shares in a bought–deal transaction in Canada for Cdn\$7.50 per share. The sale of the six million shares resulted in net proceeds to Golden Star of \$38.9 million (Cdn\$45.0 million). The sale realized approximately \$30.3 million of pre–tax capital gain for Golden Star, which was recognized in income in the first quarter. A \$4.9 million non–cash tax expense was recognized on the gain.

Gold Prices

Gold prices have generally trended upward during the last five years, from a low of just under \$260 per ounce in early 2001 to a high of \$725 per ounce in May 2006. Much of the price increase during this period appears to be related to the fall in the value of the US dollar against other major foreign currencies, but in recent quarters prices appears to be responding to additional influences including an increased demand for gold as an investment and geo-political instability. The realized gold price for our shipments during the first nine months of 2006 averaged \$605 per ounce, as compared to \$431 per ounce in the same period of 2005.

Bogoso Sulfide Expansion Project

The Bogoso Sulfide Expansion Project (“BSEP”) is designed to significantly expand processing capacity at Bogoso/Prestea. Current production of 1.5 million tonnes per annum from the existing carbon-in-leach (“CIL”) plant will be increased to a projected total capacity of approximately 5.0 million tonnes per annum from the combined oxide and sulfide plants. The new BIOX[®] plant will utilize the BIOX[®] bio-oxidation process marketed by a subsidiary of Gold Fields Limited. Gold Field’s BIOX[®] technology is currently being used in eleven gold processing plants operating or under – development worldwide. Upon completion, the Bogoso/Prestea sulfide plant will be the largest operating BIOX[®] plant in the world.

Testing and commissioning of the crusher, ball mill, and the CIL circuit of the new plant, are now complete and this equipment is being used to process non-refractory ore.

Testing of the SAG mill is expected to commence in November. Also, the first inoculate is expected to be introduced to the BIOX[®] tanks in November. We expect that it will take to the end of December, to fill all BIOX[®] tanks. At that time we expect to stop processing oxides through

Table of Contents

the crushing and grinding circuits and to start crushing and grinding sulfide ore and commissioning the flotation circuit.

Pre-stripping of the sulfide pits to create a stockpile of transition and sulfide ore for the BIOX[®] plant is progressing well. Approximately 0.6 million tonnes of ore is currently exposed in the Buesichem pit and approximately 0.3 million tonnes has been moved to ore stockpiles.

Pampe Ore Body

Final approval of the Pampe environmental impact study is expected in November and pit development is scheduled to commence in the first quarter of 2007 once the mining license has been issued. The Pampe ore body will provide oxide ore feed to the existing Bogoso processing plant once mining is completed at the Plant-North pit at Prestea in early 2007.

Sale of EURO Shares and Change in Accounting for EURO

At March 31, 2006 we owned 53% of EURO's outstanding common shares and as such consolidated EURO's financial results with our own. During the second quarter of 2006 we sold 362,029 of our EURO shares in open market transactions realizing approximately \$0.7 million of cash. In addition, on June 19, 2006 we sold an additional four million EURO shares in a private transaction receiving \$2.5 million of cash. The purchasers of the four million shares have agreed to pay additional consideration to Golden Star if they sell the shares at a gain. Since our investment in EURO's shares was carried at zero value, a gain was recognized on sale of the shares in an amount essentially equal to the cash proceeds received.

The combined share sales during the second quarter diluted our holding in EURO's common shares to approximately 43%. In response to a reduced ownership position, the equity method of accounting was adopted on June 20, 2006 for our remaining interest in EURO. Under the equity accounting method our consolidated financial statements will no longer include EURO's assets and liabilities which at March 31, 2006 included \$3.2 million of net current assets, \$5.6 million of tax assets, \$7.0 million of bank loans and \$14.9 million of derivative liabilities. The net effect of the change in accounting method resulted in recognition of an additional \$17.7 million of gain. Total gain from the change in our EURO ownership position, consisting of \$3.2 million from the sale of shares and \$17.7 million from the change in accounting method, totaled \$20.9 million.

Under the equity method accounting rules, Golden Star will recognize a share of EURO's future earnings/losses in proportion to Golden Star's ownership position at the end of each period (currently 43%). Golden Star has a zero carrying value for its investment in EURO, and future gains and losses will not be recognized until such time as EURO's future income offsets accumulated deficits.

The sale of EURO shares was in line with the goals and objectives originally envisaged in the 2004 EURO restructuring plan. The goal of the restructuring plan was to establish EURO as an independent and economically viable entity that would not be dependent on Golden Star for funding and that would concurrently bring value to Golden Star's investment.

Reduced Gold Derivatives

In June 2006 we reduced our call option position by buying back call options on 30,000 ounces of gold for a total cost of \$2.6 million. During the third quarter an addition 6,000 contracts expired as scheduled, leaving 12,000 call options outstanding as of September 30, 2006. The remaining 12,000 call options are scheduled to expire at a rate of 2,000 ounce per month from October 2006 to March 2007. Each of the remaining outstanding call options has a \$525 strike price.

Table of Contents

As a result of the sale of EURO shares in June 2006 (see above), Golden Star is no longer required to consolidate the financial statements of EURO after June 19, 2006. Therefore the EURO derivative contract liabilities and associated impact on earnings are no longer included in our consolidated financial statements as of September 30, 2006.

Debt facility

On October 11th, 2006, Golden Star entered into an agreement for a \$15 million debt facility to be provided by Ecobank Ghana Limited and Cal Bank Limited. Both banks are active in Ghana. The funds are available immediately for a term of 27 months at an interest rate of US Prime (currently 8.25%) plus one percentage point. Loan fees total one percent of the facility amount. The amount drawn under the facility is repayable in 24 equal installments starting three months after receipt of the funds. The debt is secured by the non-mobile assets of the Bogoso/Prestea mine and proceeds are to be used as partial funding for the Bogoso Sulfide Expansion Project. There are no hedging requirements or equity-type incentives required under the facility. As of November 6, 2006 \$7.5 million has been drawn under this facility.

In addition documentation is underway with two other Ghanaian banks for a second \$15.0 debt facility.

Ore processing at Bogoso/Prestea

As has been the case since mid-2004, Bogoso/Prestea continues to deal with ores that are not well suited for processing in the existing Bogoso processing plant. The Bogoso plant was originally configured to process oxide and other non-refractory ores. Since mid-2004, when oxide ore were depleted on the north end of the Prestea property, the Bogoso processing plant has processed ore from the Plant-North pit at Prestea which were thought to be relatively non-refractory. The Plant-North ore have proven more difficult to treat than anticipated, and recovery and plant through-put has been lower than expected as a result. We are now stockpiling the more refractory Plant-North ore as feed for the new BIOX[®] processing plant. Additional oxide and non-refractory ore from the sulfide pit pre-stripping will supplement feed to the existing Bogoso processing plant in the fourth quarter, and in early 2007 we expect to start mining oxide ores from the new Pampe project located 18 kilometers west of Bogoso to feed the existing Bogoso processing plant.

Improved Operating Margins

As discussed below in more detail the operating margins (“Gold sales” revenues less “Total mine operating costs”) at Bogoso have trended upward in each quarter of 2006 from a \$(1.9) million operating margin loss in the first quarter to a break-even margin in the second quarter, to a \$5.7 million positive margin in the third quarter. The margin improvements resulted from higher gold prices and higher gold output at the Bogoso plant.

Wassa’s operating margins have also seen improvements during 2006 from a \$(2.1) operating margin loss in the first quarter to a \$0.3 million positive margin in the second quarter and a \$0.5 million positive margin in the third quarter. A combination of improved operating costs, higher ore grades from the new SAK pit in the third quarter and improved gold prices versus the first quarter of 2006 were responsible for the margin improvement at Wassa.

RESULTS OF OPERATIONS

Third quarter 2006 compared to third quarter 2005

Net income totaled \$1.5 million or \$0.007 per share during the third quarter of 2006, versus a net loss of \$(6.7) million or \$(0.047) per share during the third quarter of 2005. The major factors contributing to

Table of Contents

the earnings improvement were higher gold prices, higher gold output, and a reduction in the derivative losses. Lower gold prices at the end of the third quarter coupled with a significant reduction in our derivative positions over the past year resulted in a \$1.4 million gain on derivatives in the third quarter of 2006 compared to a \$5.5 million loss in the same quarter of 2005. The increase was offset by a \$1.8 million impairment of deferred exploration costs in 2006. Interest expense was lower than a year ago as more interest was capitalized into construction projects in the current quarter.

We sold 4,197 more ounces of gold during the third quarter of 2006 versus the same period of 2005, at an average price of \$622 per ounce versus \$433 per ounce in the same quarter of 2005. The combination of higher gold output and improved gold price yielded a \$12.8 million increase in gold revenues.

Bogoso/Prestea's and Wassa's combined operations yielded an \$6.0 million operating margin ("Gold sales" revenues less "Total mine operating costs" – see Statement of Operations) for the third quarter of 2006 compared to an operating margin loss of \$(1.6) million in the third quarter of 2005. The major factors responsible for the improved operational results were higher gold prices and increased gold output, which more than offset higher operating costs.

SUMMARY OF FINANCIAL RESULTS	For the three months ended September 30,		For the nine months ended September 30,	
	2006	2005	2006	2005
Gold sold (oz)	57,855	53,658	148,001	146,772
Average realized price (\$/oz)	622	433	605	431
Gold revenues (in \$ thousands)	35,996	23,235	89,607	63,329
Cash flow provided by operations (in \$ thousands)	7,323	1,771	80	(1,153)
Net income/(loss) (in \$ thousands)	1,533	(6,657)	33,940	(12,575)
Net income/(loss) per share – basic (\$)	0.007	(0.047)	0.164	(0.088)

Nine months ended September 30, 2006 compared to nine months ended September 30, 2005

Net income totaled \$33.9 million or \$0.164 per share in the nine months ended September 30, 2006, versus a net loss of \$(12.6) million or \$(0.088) per share during the same period in 2005. The major factors contributing to the earnings improvement versus the first nine months of 2005 include a \$30.3 million pre-tax gain on the sale of Moto shares in the first quarter of 2006 and a \$20.9 million pre-tax gain from the sale of EURO shares and resultant change in accounting method in the second quarter (see "Significant Trends and Events" above for additional information on the Moto and EURO share sales.) Mine operating margins also contributed \$2.3 million in earnings compared to \$0.2 million in the first nine months of 2005. Royalty revenues, interest and other income contributed \$5.9 million to revenues, up from \$4.4 million in the first nine months of 2005. Offsetting the operational margins, royalty and gains on the sale of assets was a \$9.3 million loss on derivatives and \$1.8 million of exploration project impairment write-offs.

The improvement in the operating margin is mostly due to improved gold prices versus the same period of 2005. Consolidated gold revenues for the first nine months of 2006 increased by \$26.3 million from the same period a year ago. Approximately \$13.2 million of the increase is related to Wassa's revenues in the first quarter of 2006 versus zero revenues in the first quarter of 2005 when Wassa was still in its construction phase. The remaining increase in gold revenues is related to improvements in gold prices during 2006. Gold prices averaged \$605 per ounce in the first nine months of 2006 versus \$431 per ounce in the same period of 2005.

Bogoso/Prestea Operations

Three months ended September 30, 2006 - Bogoso/Prestea generated a \$5.5 million operating margin during the third quarter of 2006 on sales of 34,611 ounces of gold, versus an operating margin of \$1.9 million on sales of 29,346 ounces in the third quarter of 2005. The improvement in gold output reflects increases in grade and recovery versus the third quarter of 2005.

Bogoso/Prestea experienced lower plant through-put versus a year ago, which was mostly the result of harder ore from deeper levels of the Plant-North pit. The Bogoso processing plant processed an average of 3,995 tonnes per day during the third quarter of 2006 at an average grade of 4.45 grams per tonne, as compared to 4,324 tonnes per day at 4.20 grams per tonne in the same period in 2005. The improvement in gold recovery is a function of the higher grade ore mined and processed during the current period.

BOGOSO/PRESTEA

OPERATING RESULTS	For the three months ended September 30,		For the nine months ended September 30,	
	2006	2005	2006	2005
Ore mined (t) (Plant North pit)	398,956	426,617	1,123,275	1,350,764
Waste mined (t) (Plant North pit)	1,306,948	3,569,876	5,755,883	8,263,097
Ore processed (t)	367,536	397,815	1,073,059	1,167,368
Grade processed (g/t)	4.45	4.20	3.83	4.45
Recovery (%)	62.3	56.6	59.3	59.1
Gold sold (oz)	34,611	29,346	78,739	101,709
Cash operating cost (\$/oz)	372	280	444	288
Royalties (\$/oz)	18	13	18	12
Total cash cost (\$/oz)	390	293	462	300

Cash operating costs were \$372 per ounce in the third quarter of 2006 versus \$280 per ounce in 2005. Increases in mine operating costs including increases in fuel, labor and parts were the major factor contributing to the higher unit costs. The increased labor cost during the quarter is due to payments made to union employees as part of the new union agreement that was signed on September 9, 2006.

Nine months ended September 30, 2006 - Bogoso/Prestea generated a \$3.6 million operating margin during the first nine months of 2006 on sales of 78,739 ounces of gold, down from a \$6.5 million operating margin on sales of 101,709 ounces in the first nine months of 2005. The major factor contributing to the reduced margin was a 22,970 ounce reduction in gold sales. Lower ore grade from the Plant-North pit and lower plant through-put due to harder ores, were the major factors responsible for the lower gold output.

The Bogoso processing plant processed an average of 3,931 tonnes per day in the first nine months of 2006 at an average grade of 3.83 grams per tonne, as compared to 4,276 tonnes per day at 4.45 grams per tonne in the same period in 2005. Gold recovery increased slightly to 59.3% from 59.1% in the first nine months of 2005.

Cash operating costs for the nine months were \$6.0 million higher than in the first nine months of 2005 reflecting increases in the cost of fuel, power, labor, tires and mechanical parts. The increase in cash operating costs coupled with lower gold output combined to yield cash operating unit costs of \$444 per ounce versus \$288 per ounce in the first nine months of 2005.

Wassa Operations

Three months ended September 30, 2006 - Wassa generated a \$0.5 million operating margin in the three months ended September 30, 2006 on sales of 23,244 ounces of gold, compared to an operating

Table of Contents

margin loss of \$(3.5) million in the third quarter of 2005 on sales of 24,312 ounces. During the third quarter of 2006 the Wassa processing plant processed an average of 9,455 tonnes per day at an average grade of 0.96 grams per tonne with a gold recovery of 90.0% compared to 10,476 tonnes per day at an average grade of 0.86 grams per tonne with an 87.7% recovery in the same period of 2005. Lower plant through-put reflects an annual four-day maintenance shutdown in August and power rationing in the last third of the quarter (see Significant Trends and Events section above). The improvement in ore grades and recovery versus the same period of 2005 are related to the higher grade ore now being mined at the SAK pit. Cash operating costs and ounces sold were very similar in 2006 and 2005 yielding cash costs per ounce in 2006 similar to a year earlier (\$464 per ounce, versus \$460 per ounce in 2005).

WASSA

OPERATING RESULTS	For the three months ended September 30,		For the nine months ended September 30,	
	2006	2005	2006	2005 ⁽¹⁾
Ore mined (t)	581,815	692,142	1,858,312	1,380,385
Waste mined (t)	1,796,669	2,430,764	9,033,328	4,416,597
Ore and heap leach materials processed (t)	869,891	963,007	2,804,864	1,428,028
Grade processed (g/t)	0.96	0.86	0.86	0.98
Recovery (%)	90.0	87.7	88.8	88.7
Gold sold (oz)	23,244	24,312	69,262	45,063
Cash operating cost (\$/oz)	464	460	479	465
Royalties (\$/oz)	19	11	18	13
Total cash cost (\$/oz)	483	471	497	478

(1) The Wassa mine commenced commercial production in April 2005, thus amount shown are for only six months of operation.

While we have been successful in bringing Wassa plant through-put rates up to design level on a consistent basis, ore grades continue to fall short of expectation. Recent analysis indicated that excess ore dilution is reducing pit ore grades. In response to the dilution, we reviewed and improved the blasting techniques during the quarter. We continue to review our blasting techniques and, to better define the ore zones and we are expanding ore zone definition drilling. It is expected that changes in blasting procedures and more detailed definition drilling should continue to improve pit grades and higher gold output going forward.

In July 2006, Wassa began mining the new SAK ore body located approximately 3.5 kilometers south of the Wassa processing plant. It is expected that the SAK pit will provide approximately 100,000 tonnes per month of the higher grade ore to the Wassa plant over its 12 to 18 month life. The higher grades of the SAK pit ore largely compensated for the drop in plant through-put in September from the power shortage.

Nine months ended September 30, 2006 – The nine month results are not comparable to the first nine months of 2005 since Wassa was not placed in-service until April 1, 2005. While Wassa generated positive operating margins in the second and third quarters of 2006, it experienced a \$(1.3) million operating margin loss in the nine months ended September 30, 2006 on sales of 69,262 ounces of gold. The Wassa processing plant processed an average of 10,274 tonnes per day at an average grade of 0.86 grams per tonne with a gold recovery of 88.8%. Cash operating costs averaged \$479 per ounce and total cash costs averaged \$497 per ounce.

DEVELOPMENT PROJECTS

Bogoso Sulfide Expansion Project

Approximately 75% of the remaining ore reserves at Bogoso/Prestea are refractory and cannot be efficiently processed at our existing Bogoso processing plant. In 2005 a decision was made to construct a new 3.5 million tonne per annum processing facility at Bogoso alongside the existing 1.5 million tonne per annum Bogoso processing plant. The new plant will utilize the proprietary BIOX[®] bio-oxidation technology to treat the refractory sulfide ore. When completed, the new sulfide processing plant and the existing Bogoso processing plant are together expected to process 5.0 million tonnes of ore per year.

The existing Bogoso processing plant will retain its current configuration and will continue to process non-refractory ores. After the new BIOX[®] plant comes on line, it is anticipated that the existing Bogoso processing plant will process mostly oxide ore and the new BIOX[®] processing plant will process mostly refractory sulfide ore and mixed oxide-refractory ores. The two plants sitting side-by-side are expected to provide operational efficiencies since they will share common management, labor, reagent inventories, warehouse parts and maintenance efforts. With the two plants and their differing technologies, we expect to be able to process all of the ore types known to exist in the Bogoso/Prestea area.

The design and construction of the expansion project is being managed by GRD Minproc in accordance with an engineering, procurement and construction management contract.

In October we commenced commissioning and testing for the expansion project. The crusher, ball mill and carbon-in-leach circuit have been running for several weeks and in November we expect to commission the SAG mill and transfer the first inoculate to the first BIOX[®] tank. Over the next two months, while we fill the BIOX[®] tanks, we plan to operate the crusher, SAG mill and ball mill on oxide material. Once the BIOX[®] tanks are full, we expect to start crushing and milling sulfide ore and to commission the new flotation circuit.

Pre-stripping of the first two sulfide pits has commenced using mining equipment acquired in 2005 and 2006. Pre-stripping consists of 9.7 million tonnes of waste and 0.5 million tonne of ore to September 30, 2006. In addition, 0.6 million tonnes of ore has been exposed in the Buesichem pit. The existing Bogoso processing plant will continue to process non-refractory ores from the Plant-North pit at Prestea until completion of mining in early 2007. Thereafter, we plan to feed the existing Bogoso processing plant with oxide ores from Pampe, Mampon and areas on the south end of the Prestea property.

We estimate that the total capital cost of the new sulfide plant project, including the expansion of the mining fleet, to be approximately \$125 million, and expect construction to be completed by late 2006. We expect to spend an additional \$25 million on pre-stripping and inventory build-up. At September 30, 2006 we have spent approximately \$104.2 million on plant construction, \$13.7 million on mining equipment, \$13.0 million on pre-stripping and \$7.7 million on stockpile and other inventories. Additionally we capitalized interest of \$5.1 million to the project.

EXPLORATION PROJECTS

We budgeted \$16.5 million for exploration in 2006, focusing our efforts mostly on core assets in Ghana, including the Prestea Underground and the St. Jude Properties at Hwini-Butre and Benso. Actual spending on exploration, including both capitalized and expense items totaled \$11.6 million through September 30, 2006. Of the total, \$3.0 million has been spent at the St. Jude properties, \$2.0 million at the Prestea Underground, \$3.7 million at our mine sites and other properties in Ghana, \$0.6 million in South America, \$1.8 million in non-Ghana West Africa and \$0.5 million in overhead and North America.

Africa - Key areas where we have been active during 2006 include:

- Mineralized areas around the operating mines;
- Prestea Underground, where we have intensified exploration to facilitate feasibility (upper levels) and scoping studies (deep levels); and

Table of Contents

- Hwini-Butre and Benso, where intensive drilling programs are currently being carried out to allow feasibility and permitting to be progressed.

Prestea Underground - In early 2006 we initiated an extensive drilling program at Prestea Underground that was planned to continue throughout 2006. After excellent progress during the first eight months of the year during which we drilled 19,366 meters of diamond core, drilling has been suspended due to power restrictions imposed by the Ghana power supply authorities and subsequent safety issues related to the temporary closure of the Bondaye Shaft (the alternate escape route for the Prestea underground workings). Prior to the suspension of drilling we had two rigs working, one on 24 Level infilling on the West Reef mineralization, and one on 30 Level drilling down-plunge extensions of the Main Reef. In August, we announced an increase in inferred mineral resources for the West Reef to a total of 1.25 million tonnes at an average grade of 11.9 grams of gold per tonne versus the previously published inferred mineral resource of 0.90 million tonnes at an average grade of 12.6 grams of gold per tonne. This work confirmed that the West Reef target shoot continues down plunge for 400 meters with a true thickness ranging between 0.7 and 4.5 meters.

In addition, we have been drilling near-surface, potentially decline-accessible mineralization beneath and south of the Plant-North pit. This is being drilled from surface and is therefore unaffected by the power restrictions. Following completion of the drilling program the feasibility of commencing mining in the upper levels at Prestea will be evaluated in the first half of next year.

Hwini-Butre and Benso - Exploration has continued at a high rate at the Hwini-Butre and Benso projects including both diamond core drilling and Reverse Circulation (“RC”) drilling at the main prospects and Rotary Air Blast (“RAB”) drilling along extensions of the mineralized structures. In addition, data from geochemical surveys carried out previously have been reviewed and the geochemical coverage has been extended to new areas believed to have geological potential for repetitions of the known mineralized structures.

Drilling to collect metallurgical and geotechnical samples has been completed and test work is now in progress. To date, we have completed in excess of 22,000 meters of RAB drilling and 21,000 meters of RC and diamond drilling.

A feasibility study for development of Hwini-Butre and Benso as a satellite source of ore for our Wassa processing plant has been commenced.

South America — In August we signed a joint venture agreement with Newmont for the Saramacca project in Suriname. The agreement calls for Newmont to incur \$6 million in exploration expenditures on certain Saramacca properties over a period of five years at which point Newmont will earn a 51% interest in the joint venture. In the first two years of the earn-in period Newmont is required to contribute \$2 million to the project and any shortfall is to be settled in cash to Golden Star at the end of the two year period. The exploration project will be managed by Golden Star until the earliest of i) Newmont contributing \$2 million to the exploration project or ii) the second anniversary of the agreement. We are currently in negotiations with land owners and the Suriname government to finalize the transfer of the exploration licenses to us. This process may take up to 18 months to complete. To date, Golden Star has incurred \$0.1 million of expenditure on the Saramacca project which is refundable to us from Newmont.

During 2003 and 2004 we carried out two successive soil auger sampling programs and evaluated a series of stream sediment gold anomalies on the Saramacca property. This work defined a 5 kilometer long soil anomaly. Deep augering in 2004 further confirmed the anomaly now termed ‘Anomaly M’. Shallow diamond core drilling, comprising 24 holes for a total of 1,315 meters, commenced at Anomaly M in

Table of Contents

March 2005. Mineralization intersected within drill cores consisted of variably-sheared silicified pyritic metasediments of tuffaceous origin and volcanic conglomerates, often with little or no quartz veining. Significant gold assays were also intersected within the upper 5 to 10 meters of enriched lateritic duricrust and mottled saprolite.

LIQUIDITY AND CAPITAL RESOURCES

At September 30, 2006, our cash, cash equivalents and short term investments totaled \$10.0 million, down from \$89.7 million at December 31, 2005. Operating activities netted nil cash during the first nine months, but operations generated \$7.3 million in the third quarter, up from \$1.2 million in the same quarter of 2005. The use of cash to increase ore stockpiles and operating inventories was a major factor contributing to the nil operational cash flow during the first nine months of 2006. Capital projects used \$130.8 million of cash in the nine months while cash on the sale of the Moto shares contributed a net \$37.3 million of cash and sale of the EURO shares contributed an additional \$3.2 million, bringing net cash used in investing activities to \$90.4 million.

Option exercises and new equipment loans provided \$3.4 million and \$12.4 million of cash, respectively. Loan repayments consumed \$5.1 million including \$1.3 million for EURO's bank loans and \$3.8 million for equipment financing loans.

Of the \$130.8 million spent on new capital projects during the first nine months, approximately \$101.6 million of the total was spent on the Bogoso Sulfide Expansion Project and associated pre-stripping, \$22.9 million was spent on other mine property and plant and equipment needs, mostly at Bogoso/Prestea and Wassa, and \$6.3 million was spent on capital exploration projects.

We have finalized documentation for the first of two \$15 million debt facilities. The first debt facility is provided by Ecobank Ghana Limited and Cal Bank Limited. Both banks are active in Ghana. The documentation for this facility has been executed and the funds are available immediately for a term of 27 months at an interest rate of US Prime plus one percentage point. Front end fees total one percent of the facility amount. As of November 6, 2006 \$7.5 million has been drawn on this facility. The debt is secured against the non-mobile assets of the Bogoso/Prestea mine and is to be used as partial funding for the Bogoso expansion project. There are no hedging requirements or equity-type incentives required under the facilities. The documentation for the remaining \$15 million debt facility with two other banks active in Ghana is well advanced and expected to be completed in the near future.

Liquidity Outlook

Capital expenditures plans for 2006 include the following projects:

Table of Contents

CASH SPENT ON CAPITAL PROJECTS YEAR-TO-DATE VERSUS 2006 BUDGET	Amount (millions)	
	Budget for 2006	Actual for nine months of 2006
Development		
Bogoso Sulfide Expansion Project	\$ 89.0	88.6
Bogoso/Prestea pre-stripping and mining equipment	25.0	13.0
Pampe	4.0	1.7
Mampon	1.2	0.3
St. Jude properties	1.0	0.4
Sustaining Capital		
Bogoso/Prestea	7.0	5.9
Prestea Underground care and maintenance	4.8	4.4
Wassa	6.2	7.4
Exploration		
Bogoso/Prestea	1.7	0.6
Prestea Underground	3.3	2.0
Wassa	0.9	1.2
St. Jude properties	4.6	3.0
Other	6.3	2.3
Total	\$155.0	\$130.8

At the current gold prices we expect both Bogoso/Prestea and Wassa to generate positive operating cash flows during the remainder of the year. We expect that these operational cash flows, along with the \$10.0 million of cash on hand, the \$15.0 million drawn on the Ecobank Ghana and Cal Bank loan and an additional \$15.0 million expected from other bank loans will be sufficient to complete development and start-up of the BSEP project.

LOOKING AHEAD

Our main objectives for the coming twelve months include:

- complete construction, commissioning and commencing commercial production of the Bogoso Sulfide Expansion Project;
- complete a feasibility study for the development of the Hwini-Butre and Benso as a satellite ore source for our Wassa mine; and
- complete a feasibility study for the development of the Prestea Underground mine as a source of high grade ore for Bogoso/Prestea.

Excluding the potential impact of any commercial production from our Bogoso Sulfide Expansion Project, we expect to produce about 200,000 ounces during 2006, comprised of 100,000 to 105,000 ounces from Bogoso/Prestea at an average cash operating cost of about \$390 per ounce and 95,000 to 100,000 ounces from Wassa at an average cash operating cost of about \$460 per ounce.

Commissioning and testing of a portion of the Bogoso Sulfide Expansion Project commenced in October and this work will continue through the fourth quarter. The date of commercial production for this expansion project is dependent on the success of the commissioning and testing during the fourth quarter.

RELATED PARTY TRANSACTIONS

We obtained legal services from a legal firm to which our Chairman is counsel. Total value of all services purchased from this law firm were \$0.6 million during the first nine months of 2006. Our Chairman did not personally perform any legal services for us during this time period nor did he benefit directly or indirectly from payments for the services performed by the firm.

During the first quarter of 2006 a corporation controlled by Michael A. Terrell, a director of Golden Star, provided management services to St. Jude for which it was paid Cdn\$0.13 million. Mr. Terrell became a director of Golden Star following our acquisition of St. Jude in December 2005. Mr. Terrell's company ceased providing services to St. Jude at March 31, 2006.

OFF BALANCE SHEET ARRANGEMENTS

We have no off balance sheet arrangements.

OUTSTANDING SHARE DATA

This ITEM 2 includes information available to November 6, 2006. As of November 6, 2006 we had outstanding 207,845,758 common shares, options to acquire 6,217,101 common shares, warrants to acquire 11,688,334 common shares and convertible notes which are convertible into 11,111,111 common shares.

SUBSEQUENT EVENTS

Resignation of Chief Financial Officer

Effective October 13, 2006 Allan Marter, the Company's Chief Financial Officer since 1999, resigned. Mr. Roger Palmer, Vice President Finance and Controller has been appointed interim Chief Financial Officer until a permanent replacement CFO is hired.

New Debt Facility

On October 11th, 2006, Golden Star entered into an agreement for a \$15 million debt facility to be provided by Ecobank Ghana Limited and Cal Bank Limited. Both banks are active in Ghana. The funds are available immediately for a term of 27 months at an interest rate of US Prime (currently 8.25%) plus one percentage point. Loan fees total one percent of the facility amount. The amount drawn under the facility is repayable in 24 equal installments starting three months after receipt of the funds. The debt is secured by the non-mobile assets of the Bogoso/Prestea mine and proceeds are to be used as partial funding for the Bogoso Sulfide Expansion Project. There are no hedging requirements or equity-type incentives required under the facility.

ITEM 4 CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

The principal executive officer and principal financial officer have evaluated the effectiveness of Golden Star's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2006. Based on the evaluation, the principal executive officer and the principal financial officer concluded that the disclosure controls and procedures in place are effective to ensure that information required to be disclosed by Golden Star, including consolidated subsidiaries, in reports that Golden Star files or submits under the Exchange Act, is recorded, processed, summarized and reported on a timely basis in accordance with applicable time periods specified by the Securities and Exchange Commission rules and forms. There has been no change in our internal control over financial reporting during the quarter ended September 30, 2006, that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting other than disclosed in item (b) below.

(b) Change in Internal Control Over Financial Reporting

As discussed in the notes to the fiscal 2005 consolidated financial statements, it was determined that as of December 31, 2005 management did not maintain effective controls over the presentation and documentation of certain derivatives. Specifically, Golden Star did not prepare and maintain sufficient documentation to support the designation and effectiveness of hedges of certain gold future contracts entered into by its subsidiary, EURO Resources S.A., during 2005. Because of the existence of the deficiency in question at year-end, management concluded that our internal control over financial reporting was ineffective as of December 31, 2005.

During the nine months ended September 30, 2006, management has undertaken remedial action to address the above described material weakness by revising its accounting procedures to record the derivative transaction in accordance with Canadian and United States Generally Accepted Accounting Principles (GAAP). The Company no longer applies hedge accounting to its derivatives.

Management believes it has completed these remediation efforts; however, management has not engaged its audit firm to perform a stand alone engagement to determine if the material weakness continues to exist.

In March 2007 management's review of internal controls found that management did not maintain effective controls over its accounting for inventories. Specifically, management did not maintain effective controls over the computation and review of ore stockpile and in-process inventory balances which resulted in material mis-statement of such balances for the periods ended March 31, June 30 and September 30, 2006. These mis-statements constituted a material weakness.

CERTIFICATION

I, Peter J. Bradford, certify that:

1. I have reviewed this report on Form 10-Q/A as amended of Golden Star Resources Ltd. (“Registrant”);
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this quarterly report;
4. The Registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the Registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the periods covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the Registrant’s internal control over financial reporting that occurred during the Registrant’s most recent fiscal quarter (the Registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant’s internal control over financial reporting.
5. The Registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant’s auditors and the audit committee of Registrant’s board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant’s ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant’s internal control over financial reporting.
