ELD No. 04-08
July 26, 2004

Second Quarter 2004 Financial Results
(all figures in US dollars)

VANCOUVER, BC - Eldorado Gold Corporation (“Eldorado”, the “Company”, or “we”) is pleased to announce its Second Quarter 2004 financial results.

Financial Results

During Q2 2004, Eldorado sold 17,424 ounces of gold at an average realized price of \$396/oz. compared to the sale of 24,368 ounces of gold at an average realized price of \$344/oz. in Q2 2003. For the six month period ended June 30, 2004 gold sales were 40,217 ounces at an average realized price of \$403/oz compared to the first six months of 2003 of gold sales of 48,222 ounces at an average realized price of \$350/oz. Revenue for Q2 2004 of \$6.9 million decreased compared to Q2 2003 of \$9.0 million. The decrease in revenues for Q2 2004 is the result of lower gold production in the quarter resulting from the Shaft Deepening Project at the São Bento Mine (“São Bento”).

Eldorado reports a net loss of \$1.7 million for Q2 2004. The net loss is a result of a \$1.7 million loss on foreign exchange as our currency mix weakened against the U.S. dollar. This compares to a Q2 2003 net income of \$1.4 million of which the Company reported a gain on foreign exchange of \$2.5 million.

Cash flow from operations in Q2 2004 was a \$1.3 million loss compared to a cash generation of \$0.1 million in Q2 2003. Cash flow from operations was negative in the Q2 as a result of lower gold production as completion of the shaft deepening development work took precedent over ore production. The majority of the waste development associated with the Shaft Project will be complete in August. At this time, additional capacity to handle ore will permit an increase in production in Q3.

The Company continues to maintain a strong balance sheet with cash and cash equivalents of \$86.8 million as of June 30, 2004 and working capital of \$91.4 million. The Company remains unhedged and debt free.

Sao Bento Mine

Gold production at São Bento in Q2 2004 was 18,007 oz. at a cash operating cost of \$303/oz. Lower gold production levels were due mainly to the interference with ore production relating to the shaft deepening activities and infrastructure development at depth, causing cash costs on a per ounce basis to increase. Also contributing to higher cash costs was an adverse change in the mineralogy of the ore mined, significantly increasing both cyanide and oxygen consumption rates. This change in mineralogy is related to an intrusive which intersects the ore body in the area scheduled for mining in 2004 and as such will detrimentally affect the operation throughout 2004.

Kisladag Project

The Kisladag Project continues to advance consistent with the plan to commence construction in Q3 2004. In Q2 2004, the Company completed all documentation and submitted the application for the Zoning Permit, approval of the Zoning Permit is expected in August. Application for the Construction Permit remains on schedule to permit construction to commence in Q3 2004.

The Company, through its engineer Hatch Associates delivered a Feasibility Cost Update to the capital cost estimate and operating performance of the Kisladag Project in mid May. This update incorporated recently announced changes to the Value Added Tax (“VAT”) law, changes in metal prices, energy costs, currency and refinement in engineering design. Subsequent to the Feasibility Cost Update the Turkish Parliament has passed two major pieces of legislation. Legislation exempting the production of gold in Turkey from VAT and amendments to the Mining Law have been passed by the Turkish Parliament. The changes to the VAT law positively impacts the project improving the internal rate of return to 43% at a \$350/oz gold price.

Efemcukuru

Through Q2 2004, work continued in the preparation of the Environmental Impact Assessment (“EIA”) Report. This report is expected to be completed and submitted to the Ministry of the Environment (“MOE”) in Q3 2004. Upon approval of the study and receipt of the positive certificate from the MOE, the full feasibility work programme, including drilling, will commence. The project presently contains a defined high-grade resource in excess of 1 million ounces. As part of the feasibility work programme, drilling will be conducted to further expand this resource as previous drilling has not defined the limits of mineralization.

China Initiative

In Q2 2004, the Company signed a lease for office space in Beijing, the first step in acquiring a business license for a Representative Office of Eldorado in China. Eldorado continues to work with the China National Gold Corporation in acquiring three assets identified as being of interest to Eldorado. CNGC is proceeding with its due diligence and in obtaining the necessary regulatory approvals.

Exploration

As previously announced, Eldorado is conducting exploration programs in Brazil and Turkey. In both countries these programs are being advanced on schedule, and it is anticipated that results of the exploration program will be announced late in Q4 2004.

ON BEHALF OF ELDORADO GOLD CORPORATION

Certain of the statements made may contain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, which involve known and unknown risk, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking statements. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward looking statements. Specific reference is made to “Narrative Description of the Business – Risk Factors” in the Company’s Annual Information Form. Forward-looking statements in this release include statements regarding the expectations and beliefs of management, the assumed long-term price of gold, the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the potential of Eldorado’s properties and expectations of growth. We do not expect to update forward-looking statements continually as conditions change and you are referred to the full discussion of the Company’s business contained in the Company’s reports filed with the securities regulatory authorities.

Eldorado Gold Corporation’s shares trade on the Toronto Stock Exchange (TSX: ELD) and the American Stock Exchange (AMEX: EGO). The TSX has neither approved nor disapproved the form or content of this release.
