## Item 5. Other Events

Devon Energy Corporation ("Devon") and Santa Fe Snyder Corporation ("Santa Fe Snyder") consummated their merger on August 29, 2000. The merger was accounted for under the pooling-of-interests method of accounting for business combinations. Combinations accounted for as poolings must conform with the overriding thrust of the pooling concept that requires a sharing of risks and rights among the stockholders of the combining companies. The Securities and Exchange Commission's (the "SEC") rules and regulations prohibit affiliates of companies involved in a pooling to sell or in any other way reduce their risk relative to any common shares received in the business combination until the "risk period" has expired. Under the SEC's rules and regulations, the risk period expires once financial results covering at least thirty days of post-merger combined operations have been published.

In order to terminate the risk period of the Devon-Santa Fe Snyder merger, Devon is providing the following unaudited operating results for the month ended September 30, 2000.

Total revenues (in millions)	\$ 246.3
Net earnings (in millions)	\$ 72.9
Net earnings applicable to common shareholders (in millions)	\$ 72.1
Net earnings per average common share outstanding:	
Basic	\$ 0.56
Diluted	\$ 0.54

The results shown above do not include approximately \$57.2 million (\$35.3 million after-tax) of expenses related to the Santa Fe Snyder merger that were expensed upon consummation of the merger in the month of August 2000.

## SIGNATURES
