ITEM 2. Acquisition or Disposition of Assets

On October 12, 2001, Devon Energy Corporation ("Devon"), accepted all of the Anderson Exploration Ltd. ("Anderson") common shares tendered by Anderson stockholders pursuant to the Offer to Purchase for Cash and Directors' Circular dated September 6, 2001, (the "Offer to Purchase"). In the Offer to Purchase, Devon offered to purchase each outstanding common share, including the associated rights, of Anderson, for C\$40.00 per common share. The total common shares accepted on October 12, 2001 represented approximately 97% of the outstanding Anderson common shares. On October 17, 2001, Devon completed its acquisition of Anderson by a compulsory acquisition under the Canada Business Corporations Act of the remaining 3% of Anderson common shares. The total cost to Devon of acquiring Anderson's outstanding common shares and paying for the intrinsic value of Anderson's outstanding options and appreciation rights was approximately \$3.5 billion.

Devon filed a Form 8-K on October 26, 2001, related to the Anderson acquisition. This Form 8-K/A includes Anderson's historical consolidated financial statements and unaudited pro forma financial information related to the Anderson acquisition.

ITEM 7. Financial Statements and Exhibits

INDEX TO HISTORICAL CONSOLIDATED FINANCIAL INFORMATION

ANDERSON EXPLORATION LTD.

	PAGE

AUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE FISCAL YEARS ENDED SEPTEMBER 30, 1999, 2000 AND 2001:	
Report of KPMG LLP to the Directors of Anderson Exploration Ltd.....	5
Consolidated Balance Sheets as of September 30, 2000 and 2001.....	6
Consolidated Statements of Earnings for the fiscal years ended September 30, 1999, 2000 and 2001.....	7
Consolidated Statements of Retained Earnings for the fiscal years ended September 30, 1999, 2000 and 2001.....	8
Consolidated Statements of Cash Flows for the fiscal years ended September 30, 1999, 2000 and 2001.....	9
Notes to Consolidated Financial Statements for the fiscal years ended September 30, 1999, 2000 and 2001.....	10

AUDITORS' REPORT TO THE DIRECTORS

We have audited the consolidated balance sheets of Anderson Exploration Ltd. as at September 30, 2000 and 2001 and the consolidated statements of earnings, retained earnings and cash flows for each of the years in the three-year period ended September 30, 2001. These financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the company as at September 30, 2000 and 2001 and the results of its operations and its cash flows for each of the years in the three-year period ended September 30, 2001 in accordance with Canadian generally accepted accounting principles.

As discussed in Note 6 to the consolidated financial statements, the Company changed its policy for accounting for income taxes and, in accordance with Canadian generally accepted accounting principles, this change has been applied retroactively without restatement of prior years.

Accounting principles generally accepted in Canada vary in certain significant respects from accounting principles generally accepted in the United States. Application of accounting principles generally accepted in the United States would have affected results of operations for each of the years in the three-year period ended September 30, 2001, and shareholder's equity as at September 30, 2000 and 2001, to the extent summarized in Note 13 to the consolidated financial statements.

ANDERSON EXPLORATION LTD.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED SEPTEMBER 30, 1999, 2000 AND 2001**

(TABULAR AMOUNTS IN MILLIONS OF CANADIAN DOLLARS, UNLESS OTHERWISE STATED)

Anderson Exploration Ltd. ("Anderson Exploration" or "the Company") is engaged in the acquisition, exploration, development and production of oil and gas resources in western and northern Canada. The consolidated financial statements have been prepared in accordance with generally accepted accounting principles in Canada.

1. SIGNIFICANT ACCOUNTING POLICIES

(a) Principles of consolidation

The consolidated financial statements include the accounts of Anderson Exploration Ltd. and subsidiary companies and partnerships, all of which are wholly-owned. All significant intercompany accounts and transactions have been eliminated.

A significant portion of the Company's oil and gas exploration, development and production activities are conducted with others. Accordingly, the accounts reflect only the Company's proportionate interest in such activities.

(b) Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is determined using the specific item or average cost method.

(c) Property, plant and equipment

The Company follows the full cost method of accounting for oil and gas properties. Under this method, all costs relative to the exploration for and development of oil and gas reserves are capitalized into cost centres on a country by country basis. Capitalized costs include lease acquisitions, geological and geophysical costs, lease rentals on non-producing properties, costs of drilling productive and non-productive wells and plant and production equipment costs. General and administrative costs are not capitalized, except to the extent of the Company's working interest in operated capital expenditure programs to which overhead fees have been charged under standard industry operating agreements. Proceeds received from disposals of oil and gas properties and equipment are credited against capitalized costs unless the disposal would alter the rate of depletion and depreciation by more than 20 percent, in which case a gain or loss on disposal is recorded.

Depletion of oil and gas properties and depreciation of plant and production equipment, including estimated future costs to develop proved reserves, are provided on the unit of production method based on total proven reserves before royalties as estimated by Company engineers. Natural gas sales and reserves are converted to equivalent units of crude oil using their relative energy content. Buildings and other equipment are depreciated over their useful lives using the declining balance and straight line methods at rates varying from five percent to 40 percent per annum.

The Company applies a ceiling test to capitalized oil and gas property costs to ensure that such costs do not exceed the estimated future net revenues from production of proven reserves, at prices and operating costs in effect at the balance sheet date, plus the cost of unevaluated properties less management's estimate of impairment. The test also provides for estimated future administrative overhead, financing costs and taxes.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

(d) Future site restoration costs

Provisions for future site restoration costs are made using the unit of production method based on established reserves. Costs are based on engineering estimates considering current regulations, costs and industry standards. Actual expenditures incurred are applied against deferred future site restoration costs.

(e) Stock based compensation plans

Consideration received from employees or directors on the exercise of stock options under the employee stock option plan and the purchase of stock under the employee stock savings plan is recorded as share capital. The Company matches employee contributions to the stock savings plan and these cash payments are recorded as compensation expense.

Obligations for cash payments under the share appreciation rights plan are accrued as compensation expense over the vesting period of the rights. Changes in the share price, up or down, will change the compensation expense and are recognized prospectively when they occur.

(f) Taxes

Effective October 1, 2000, the Company adopted the liability method of accounting for income taxes (see note 6). Under this method, income tax assets and income tax liabilities are recognized, at current rates, for differences between amounts reported for financial statement purposes and their respective tax bases. The effect of a change in income tax rates on future income tax assets and future income tax liabilities is recognized in income in the period that the change occurs.

(g) Revenue recognition

Oil and natural gas revenues are recognized when title passes to the purchaser. Settlement payments received for restructuring or terminating long term natural gas sales contracts are deferred and recognized as revenue over the remaining period of the contracts, or over the life of the reserves associated with the contracts.

(h) Foreign currency translation

Monetary assets and liabilities denominated in a foreign currency are translated at the rate of exchange in effect at the balance sheet date while non-monetary assets and liabilities are translated at historical rates of exchange. Revenues and expenses are translated at monthly average rates of exchange. Translation gains and losses are included in earnings except for unrealized gains and losses on long term monetary items which are deferred and amortized to earnings over their remaining term.

(i) Hedging

The Company utilizes derivative instruments in its management of exposures to fluctuations in commodity prices, interest rates and foreign currency exchange rates. Hedge accounting is used when there is a high degree of correlation between price movements in the derivative instrument and the item designated as being hedged. Gains and losses on derivative instruments used for hedging purposes are recognized in the same period as the hedged item and are recorded in the consolidated statements of earnings in the same manner as the hedged item. The fair values of derivative instruments are not recorded in the balance sheet. If correlation ceases, hedge accounting is terminated and future changes in the market value of the derivative instruments are recognized as gains or losses in the period of change.

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

(j) Per share amounts

Basic earnings per common share are computed by dividing earnings from operations by the weighted average number of common shares outstanding for the period. Diluted per share amounts reflect the potential dilution that could occur if securities or other contracts to issue common shares were exercised or converted to common shares. The treasury stock method is used to determine the dilutive effect of stock options and other dilutive instruments.

(k) Use of estimates

Management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates.

2. CORPORATE ACQUISITIONS AND DISPOSITION

(a) Acquisition of Numac Energy Inc.

Effective February 12, 2001, the Company acquired all of the outstanding shares of Numac Energy Inc. ("Numac"), an oil and gas production company, for cash consideration of \$8.00 per share. The transaction has been accounted for using the purchase method with the results of operations included in these financial statements from the date of acquisition. Details of the acquisition are as follows:

Net assets acquired, at assigned values:	
Property, plant and equipment.....	\$ 933.5
Deferred financing costs.....	3.5
Working capital deficiency (including bank indebtedness assumed of \$1.5 million).....	(12.4)
Long term debt assumed.....	(135.7)
Pension and lease obligations assumed.....	(6.6)

	\$ 782.3
	=====
Purchase price:	
Cash.....	\$ 773.3
Transaction costs.....	9.0

	\$ 782.3
	=====

(b) Acquisition of Ulster Petroleum Ltd.

On May 17, 2000, the Company acquired all the outstanding shares of Ulster Petroleum Ltd. ("Ulster"), an oil and gas production company. The consideration given for each Ulster share was \$13.10, made up of \$11.00 cash and 0.09655 of an Anderson Exploration common share based on Anderson Exploration's closing price of \$21.75 per share on the offer date. The transaction has been accounted for

ANDERSON EXPLORATION LTD.

Cash.....	\$ 542.2
Common shares (4,758,727 shares).....	103.5
Transaction costs.....	10.7

	\$ 656.4
	=====

(c) Disposition of Federated Pipe Lines Ltd.

On June 28, 2000, the Company entered into an agreement to sell its 50 percent interest in Federated Pipe Lines Ltd. ("Federated"), a pipeline transportation company. The Company received net proceeds on the sale of \$102.5 million and disposed of \$0.8 million of bank indebtedness. Net proceeds from this transaction were used to reduce debt related to the acquisition of Ulster.

The Company's proportionate interest in the results of operations of Federated are shown as discontinued operations in the consolidated statements of earnings and cash flows.

For the six months ended March 31, 2000, revenues from discontinued operations were \$16.7 million, earnings were \$1.8 million (net of taxes of \$1.5 million) and net capital expenditures were \$0.1 million. Results of discontinued operations subsequent to this date were included in the gain on sale of \$63.5 million (net of taxes of \$1.6 million), as a plan of arrangement to dispose of the assets existed at March 31, 2000.

	=====		=====	

* As at September 30.

The Company had a \$500 million syndicated revolving credit facility with an extendible 364 day revolving period and a six year term period. Advances under the facility could be drawn in either Canadian or U.S. funds. The facility bears interest at the banks' prime lending rate, bankers' acceptance rates plus applicable margins or U.S. LIBOR rates plus applicable margins. On October 15, 2001, all amounts outstanding under this facility were repaid following the acquisition of the Company by Devon Energy Corporation ("Devon") (note 14). The facility was cancelled on October 19, 2001.

The Company had a syndicated revolving credit facility that was arranged in May 2000 to finance the acquisition of Ulster (note 2). The facility was made up of three separate components. Tranche A was a committed 364 day \$100 million bridge facility available by way of a single draw. Tranche B was a committed 18 month \$300 million bridge facility available by way of a single draw. Tranche C is a committed \$500 million 364 day revolving credit facility, followed by a committed two year term period. In July 2000, the full amount of Tranche A and \$75 million of Tranche B were repaid with proceeds from

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

the issue of medium term notes. In February 2001, the remaining \$225 million under Tranche B was transferred to Tranche C. Tranche A and Tranche B are no longer available. Advances under the facility can be drawn in either Canadian or U.S. funds. The facility bears interest at the banks' prime lending rate, bankers' acceptance rates plus applicable margins or U.S. Libor rates plus applicable margins. All amounts outstanding under Tranche C were repaid during 2001 and the facility was cancelled on October 19, 2001.

The Company has fixed the rate of interest on \$244.0 million of its bank loans through swap agreements at an average rate of 7.01 percent. The swap agreements mature at various dates as shown below:

AMOUNT	INTEREST RATE*	MATURITY DATE
\$ 32.5	6.66%	October 2001
7.5	6.80%	October 2002
79.0	6.76%	May 2003
40.0	7.32%	February 2007
30.0	7.53%	March 2007

* Includes margin.

The Company arranged a new \$1 billion non-revolving bridge credit facility through a group of Canadian chartered banks to finance the acquisition of Numac (note 2). The unsecured facility had a maturity date of October 1, 2002. On March 14, 2001, Anderson Exploration sold U.S. \$400 million principal amount of 6.75 percent senior unsecured notes due 2011 to purchasers in the United States. Net proceeds from the issue were used to repay a portion of the bridge facility. In March 2001, existing credit facilities were used to repay the remainder of the outstanding amount under the bridge facility, and the facility was cancelled. At September 30, 2001, the senior unsecured notes were rated "Baaa" by Moody's Investors Service, Inc. and "BBB+" by Standard & Poor's Rating Services.

On June 29, 2000, the Company filed a short form shelf prospectus in connection with a two year medium term note program in an aggregate principal amount of up to \$500 million that are offered at prices and contain such other terms as may be determined at the time of issue. On July 18, 2000, the Company issued \$175 million of 7.25 percent unsecured, non-redeemable notes maturing July 2005 pursuant to the program. On August 2, 2001, the Company issued \$200 million of 6.55 percent unsecured, non-redeemable notes maturing August 2006 pursuant to the program. At September 30, 2001, the medium term notes were rated "BBB+" by Standard & Poor's Rating Services and "BBB (high)" by Dominion Bond Rating Service Limited. Subsequent to September 30, 2001, Dominion Bond Rating Service Limited lowered its rating of the medium term notes to "BBB (low)".

The senior U.S. dollar notes were assumed on the acquisition of Ulster (note 2). The senior notes are denominated in U.S. dollars and were issued in October 1995 in three series as follows:

Series A	7.23%, repaid in October 2000.....	U.S.\$15.0
Series B	7.42%, due in October 2005; annual principal repayments of U.S.\$5.8 million begin in October 2001.....	U.S.\$29.0
Series C	7.57%, due in October 2006; annual principal repayments of U.S.\$10.3 million begin in October 2004.....	U.S.\$31.0

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

During October 2000, the Series A notes totalling U.S. \$15.0 million were repaid. At September 30, 2001, U.S. \$60.0 million, representing Series B and Series C of the notes, was outstanding. The Company drew upon existing long-term credit facilities to finance the principal payment made in October 2001. Accordingly, the amount has not been included in current liabilities at September 30, 2001.

The bank loans, medium term notes and senior U.S. dollar notes are unsecured and rank equally with one another and are subject to the maintenance of certain financial ratios.

The oil indexed debentures had a fixed interest rate of 5.0 percent per annum plus a variable interest rate of up to 16.8 percent per annum based upon the average price of crude oil. The effective rate of interest on the debentures was fixed to maturity at 8.26 percent by an unsecured interest rate swap agreement. These debentures were repaid in October 2000.

The Company has a \$125 million operating line of credit, of which \$35.9 million was unused at September 30, 2001. The operating line is being used to support outstanding letters of credit associated with the Company's work proposals in northern Canada (note 12).

The Company's revolving credit facilities of \$248.8 million were repaid and cancelled in October 2001. The aggregate amount of payments estimated to be required in each of the next five years on the Company's other debt facilities are \$9.2 million in 2002, \$9.2 million in 2003, \$9.2 million in 2004, \$200.5 million in 2005 and \$225.5 million in 2006.

5. OTHER CREDITS

	2000	2001
	-----	-----
Deferred future site restoration costs.....	\$ 68.4	\$ 79.7
Deferred revenue.....	59.7	50.3
Pension obligation (note 10).....	5.5	7.9
Deferred lease obligations.....	--	3.3
	-----	-----
	\$133.6	\$141.2
	=====	=====

Site restoration involves the surface clean-up and reclamation of well sites and field production facilities to ensure they can be safely returned to appropriate land uses. In addition, certain plant facilities will require decommissioning, which involves dismantlement of facilities as well as the decontamination and reclamation of these lands. Total estimated future costs, given the current inventory of wells and facilities, are approximately \$369.6 million, of which \$79.7 million has been accrued to date.

6. TAXES

Effective October 1, 2000, the Company adopted the Canadian Institute of Chartered Accountants accounting recommendations with respect to income taxes. The new recommendations were applied retroactively without restatement of prior year financial statements. The change in policy resulted in an increase in property, plant and equipment of \$77.2 million, an increase in future income tax liabilities of \$198.0 million and a charge to retained earnings of \$120.8 million. The adjustment to retained earnings was primarily a result of the future income tax cost of the Ulster acquisition in which the tax basis acquired was less than the purchase price.

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

The temporary differences that gave rise to the Company's future income tax assets and liabilities are as follows:

	OCTOBER 1, 2000	SEPTEMBER 30, 2001
	-----	-----
Future income tax assets		
Alberta royalty tax rebate.....	\$ 44.7	\$ 25.4
Deferred future site restoration costs.....	29.9	28.1
Deferred revenue.....	26.0	21.2
	-----	-----
	100.6	74.7
	-----	-----
Future income tax liabilities		
Property, plant & equipment in excess of tax basis.....	1,136.8	1,894.3
Other.....	2.9	4.2

The Company has an employee stock option plan under which both employees and directors are eligible to receive grants. At September 30, 2001, 11,328,215 common shares were reserved for issuance under the plan. Options granted under the plan generally have a term of five years to expiry and vest equally over a three year period starting on the first anniversary date of the grant. The exercise price of each option equals the market price of the Company's common shares on the date of the grant. At

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

September 30, 2001, 7,062,365 options with exercise prices between \$13.15 and \$34.05 were outstanding and exercisable at various dates to the year 2006.

	1999		2000		2001

	7,062,365	3.3	\$22.48	2,489,232	\$16.59

In 1999, the employee stock option plan was amended to give the Board of Directors the discretion to attach share appreciation rights to stock options granted after February 10, 1999. Share appreciation rights give the holder of the options the right to surrender his or her options for cancellation and receive a cash payment from the Company equal to the excess of the then current market price of the common shares over the exercise price of the options. To date, share appreciation rights have not been attached to stock options granted.

A separate share appreciation rights plan, where employees are granted the right to receive cash payments from the Company, but not common shares, was established in 2000. Under this plan, employees

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

are entitled to cash payments equal to the excess of the then current market price of the common shares over the exercise price of the right. Other terms of the plan are similar to the employee stock option plan.

	2000		2001

At September 30, 2000 and 2001, the weighted average remaining contractual life of the rights was 4.5 years and 3.6 years, respectively. Compensation expense of \$ nil, \$4.1 million and \$11.4 million has been recorded in respect of this plan for the years ended September 30, 1999, 2000 and 2001, respectively.

On October 17, 2001, Devon completed its acquisition of the issued and outstanding shares of the Company. Immediately prior to the acquisition, all stock options and share appreciation rights outstanding vested and were subsequently exercised or paid out by the Company (note 14).

Under the employee stock savings plan, the Company is authorized to issue shares of common stock to all of its permanent employees. Under the terms of the plan, qualifying employees may contribute from four percent to eight percent of basic annual earnings. Employee contributions are invested in the Company's common shares purchased from treasury at market prices. The Company matches the employees' contributions, investing in qualified money market instruments or additional common shares of the Company purchased on the open market. The Company's share of contributions is recorded as compensation expense and amounted to \$3.5 million, \$4.1 million and \$4.3 million in 1999, 2000 and 2001, respectively. At September 30, 2001, 717,709 common shares were reserved for issuance under the plan. As a result of the acquisition of the Company by Devon, the issuance of shares under this plan ceased September 30, 2001.

On November 14, 2000, the Board of Directors approved a new Notice of Intention to make a Normal Course Issuer Bid, under which the Company could acquire up to five percent of its outstanding common shares through the facilities of The Toronto Stock Exchange. During the year, the Company repurchased 0.7 million shares at an average price of \$29.03 per share. Under the program that expired on November 30, 2000, the Company repurchased 1.0 million shares at an average price of \$27.16. The repurchased shares under both programs were cancelled and returned to treasury.

On August 18, 1999, the Board of Directors adopted a Shareholder Rights Plan to replace the Company's previous plan which expired in 1999. The Plan was approved by shareholders on February 16, 2000. If a bid to acquire control of the Company is made, the Plan is designed to give the Board of Directors of the Company time to consider alternatives to allow shareholders to receive full and fair value for their shares. In the event that a bid, other than a permitted bid, is made, shareholders become entitled to exercise rights to acquire common shares of the Company at 50 percent of market value. This would significantly dilute the value of the bidder's holdings. This Plan was not utilized in connection with Devon's acquisition of the Company.

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

8. PER SHARE AMOUNTS

In computing diluted earnings per share, 0.4 million, 1.9 million and 3.0 million shares were added to the weighted average number of common shares outstanding during the years ended September 30, 1999, 2000 and 2001, respectively, for the dilutive effect of employee stock options. No adjustments were required to reported earnings in computing diluted per share amounts.

10. PENSION PLANS AND OTHER POST-RETIREMENT BENEFITS

Effective October 1, 2000, the Company adopted the Canadian Institute of Chartered Accountants accounting recommendations with respect to pension plans and other post-retirement benefits. Upon adoption of these recommendations, a charge of \$0.3 million was recorded against retained earnings, with a corresponding increase in the pension accrual.

The Company maintains two pension plans, which were acquired in the business combination with Home Oil and in the Numac acquisition, respectively.

Home Oil Plan

The Home Oil Plan is a non-contributory registered defined benefit pension plan. In June 1995, the plan was amended to give active employees an opportunity to opt out of the plan in favour of a defined contribution alternative. Most employees opted out of the plan. These employees and all new employees accrue future benefits based on defined contributions. Employees remaining in the plan continue to accrue benefits under the defined benefit plan. The plan is funded based on independent actuarial valuations. Plan assets are invested primarily in treasury bills and/or publicly traded equity and fixed income securities. Retirement benefits are based on the employees' years of credited service and salaries during the last years of employment.

The retirement benefit under the Home Oil Plan is subject to a maximum pension as determined under the Income Tax Act (Canada). To the extent this limitation applied, supplemental retirement allowances were provided to qualifying employees at the time so that the total retirement benefits were sufficient to provide the annuity that those employees would have been entitled to without the limitation.

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

To support the Company's obligations under the supplemental plan, the Company has issued a letter of credit to the custodian of the supplemental plan.

In August 1997, the Company purchased annuity contracts in respect of all the then retired and deferred vested members of the Home Oil Plan. Pension assets were used to purchase the annuities. Projected benefit obligations were reduced to reflect this purchase of annuities. On October 6, 2000, a benefit enhancement of approximately \$8.3 million was granted to those retired and deferred vested members of the registered plan as of December 31, 2000 for whom annuities were purchased in 1997. Pension plan assets were reduced by this amount.

The Numac Plan

The Numac Plan is a registered defined contribution pension plan. Prior to January 1, 1994, the plan existed as a registered defined benefit plan. On that date, employees of Numac were given the option to convert to the defined contribution plan or remain in the defined benefit plan. Most employees opted out of the plan. These employees and all new employees accrue future benefits based on defined contributions. Pension plan assets under the Numac Plan are in excess of future plan obligations. As a result, funding of ongoing contributions to the defined contribution plan are being made from plan assets.

The retirement benefit under the Numac Plan is subject to a maximum pension as determined under the Income Tax Act (Canada). To the extent this limitation applied, supplemental retirement allowances were provided to qualifying employees at the time so that the total retirement benefits were sufficient to provide the annuity that those employees would have been entitled to without the limitation.

	=====	=====

The Company recorded pension expense of \$0.4 million, \$0.4 million and \$0.7 million in 1999, 2000 and 2001, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

11. FINANCIAL INSTRUMENTS

(a) Commodity price risk

The Company generally sells its crude oil and natural gas under short-term market-based contracts. As a result of the acquisition of Numac (note 2), the Company acquired crude oil and natural gas sales contracts. The crude oil contracts fixed the price on 12,700 barrels per day of production. After December 31, 2001, 5,700 barrels per day of production will continue to be hedged under these contracts. The natural gas sales contracts were entered into for two purposes. The first series of contracts effectively swapped floating prices for fixed prices. The second series of contracts fixed the basis differential on natural gas sales.

The Company has also entered into electricity purchase contracts in order to fix the cost of electricity used in operations. The contracts fix the price on up to 42 mega-watt hours per day at various prices through 2005.

(b) Interest rate risk

The Company has entered into fixed rate debt agreements and interest rate swap agreements in order to manage its interest rate exposure on debt instruments. These agreements are described in note 4.

(c) Foreign currency exchange risk

The Company is exposed to foreign currency fluctuations as crude oil and natural gas prices received are referenced to U.S. dollar denominated prices. As a result of the Numac acquisition, the Company acquired foreign exchange swap contracts which fix the exchange rate on up to U.S. \$4.0 million of currency each month. In addition, the Company has borrowed United States dollars on a long-term basis.

(d) Credit risk

A substantial portion of the Company's accounts receivable are with customers and joint venture partners in the oil and gas industry and are subject to normal industry credit risks. Purchasers of the Company's natural gas, crude oil and natural gas liquids are subject to an internal credit review to minimize the risk of non-payment.

The Company is also exposed to credit risk associated with possible non-performance by financial instrument counterparties. In an effort to minimize credit risk, it is the Company's practice to only enter into financial arrangements with established counterparties who have an investment grade credit rating as determined by recognized credit rating agencies.

(e) Fair value of financial instruments

The carrying amounts of financial instruments included in the consolidated balance sheet, other than long term debt, approximate their fair value due to their short term maturity.

The estimated fair values of long term debt and derivative instruments have been determined based on discounted cash flow analysis using current market interest rates for financial instruments with similar maturities.

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

The carrying values and estimated fair values of long term debt and derivative instruments are as follows:

	2000		2001	
	CARRYING VALUE	FAIR VALUE	CARRYING VALUE	FAIR VALUE
Long-term debt.....	\$(1,126.9)	\$(1,128.7)	\$(1,350.1)	\$(1,360.7)

Electricity purchase contracts.....	\$ --	\$ --	\$ --	\$ (25.7)

12. COMMITMENTS

The Company has acquired interests in northern Canada for total work expenditure proposals of \$379.6 million. Work expenditures commenced in fiscal 2000, with an estimated \$99.4 million of eligible expenditures incurred to September 30, 2001. Expenditures will continue over the next four years and include obligations to drill at least one well on each licence or permit. The proposals are supported by deposits of \$85.8 million in letters of credit. The letters of credit will be reduced proportionately after approval of eligible expenditures incurred.

13. DIFFERENCES BETWEEN CANADIAN AND UNITED STATES GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in Canada ("Canadian GAAP") that, in most respects, conform to accounting

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

principles generally accepted in the United States ("U.S. GAAP"). Canadian GAAP differs from U.S. GAAP in the following respects:

		YEAR ENDED SEPTEMBER 30

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

Cash flows by activity on the consolidated statement of cash flows in accordance with U.S. GAAP would be as follows:

	YEAR ENDED SEPTEMBER 30		
	1999	2000	2001
Cash flows from operating activities.....	\$ 400.8	\$ 764.1	\$ 1,629.7
Cash flows from investing activities.....	\$(287.0)	\$(1,119.2)	\$(1,642.8)
Cash flows from financing activities.....	\$(113.8)	\$ 355.1	\$ 13.1

On the consolidated statements of cash flows, site restoration expenditures of \$6.3 million, \$10.1 million and \$11.3 million, which are disclosed as investing activities under Canadian GAAP in 1999, 2000 and 2001, respectively, would be disclosed as operating activities under U.S. GAAP.

Under U.S. GAAP, presentation of certain cash flow items differs from Canadian GAAP. These presentation differences do not have an impact on reported cash flows.

(a) Full cost accounting

Under the full cost method of accounting in the United States, a ceiling test is applied to ensure that capitalized oil and gas property costs do not exceed the present value, discounted at 10%, of the unescalated estimated future net revenues from the production of proven reserves, plus the cost of unevaluated properties less management's estimate of impairment, less applicable taxes. The Company applied the U.S. GAAP ceiling test on an annual basis until September 30, 2000 and on a quarterly basis thereafter. Under Canadian GAAP, future net revenues are not discounted but interest and general and administrative expenses are deducted.

As a result of applying the U.S. GAAP ceiling test rules in prior years, the Company recorded additional depletion of \$711.0 million (\$400.0 million after tax) that reduced the carrying amount of its property, plant and equipment. This additional depletion was not recorded for Canadian GAAP purposes. As a result, depletion and depreciation expense is lower under U.S. GAAP.

Based on September 30, 2001 market prices for oil and natural gas, the Company's costs to be recovered exceeded discounted future net revenues by \$1.1 billion after-tax. This after-tax amount would have resulted in a pre-tax reduction in the carrying value of property, plant and equipment of \$1.9 billion at September 30, 2001. However, market prices for oil and natural gas changed significantly subsequent to the balance sheet date. Based on market prices for oil and natural gas at the date of the auditors' report on the Company's consolidated financial statements, the Company's discounted future net revenues were in excess of related costs to be recovered. Accordingly, the Company did not record a reduction in the carrying value of its property, plant and equipment at September 30, 2001.

(b) Foreign exchange on long-term debt

U.S. GAAP requires long term debt denominated in foreign currencies be translated at the rates of exchange in effect on the balance sheet date, with inclusion of the resulting gain or loss in earnings for the period. Canadian GAAP requires these gains and losses be amortized over the life of the long-term debt.

(c) Accounting for income taxes -- impact on depletion and depreciation expense

U.S. GAAP required the adoption of the liability method of accounting for income taxes in 1993, while under Canadian GAAP the Company followed the deferral method until September 30, 2000.

On October 1, 2001, the Company adopted the liability method for Canadian GAAP purposes. While this eliminated a conceptual difference between Canadian and U.S. GAAP, adoption under Canadian

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

GAAP resulted in a charge of \$120.8 million to retained earnings, whereas, under U.S. GAAP, this adjustment would be reflected in property, plant and equipment. As a result of the different implementation methods, differences in depletion and depreciation expense will continue to exist in future years.

(d) Derivative financial instruments

The Company has designated, for Canadian GAAP purposes, its derivative financial instruments as hedges of anticipated revenue and expenses. In accordance with Canadian GAAP, payments or receipts on these contracts are recognized in earnings concurrently with the hedged transaction. The fair value of contracts deemed to be hedges are not reflected in the financial statements.

Effective October 1, 2000, for U.S. GAAP purposes, the Company adopted the provisions of Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities" (as amended by SFAS No. 137 and 138). The statement, as amended, establishes accounting and reporting standards requiring that every derivative instrument be recorded in the balance sheet as either an asset or liability measured at its fair value, and that changes in the fair value be recognized currently in earnings unless specific hedge accounting criteria are met, including formal documentation requirements. The standard has been applied prospectively.

(e) Recent developments in U.S. accounting standards

The Financial Accounting Standards Board recently issued Statement No. 143, Accounting for Asset Retirement Obligations. This Statement addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. Statement No. 143 requires an enterprise to record the fair value of an asset retirement obligation as a liability in the period in which it incurs a legal obligation associated with the retirement of a tangible long-lived asset. Since the requirement is to recognize the obligation when incurred, approaches that have been used in the past to accrue the asset retirement obligation over the life of the asset are no longer acceptable. Statement No. 143 also requires the enterprise to record an increase to the carrying amount of the related long-lived asset (i.e., the associated asset retirement costs) and to depreciate that cost over the remaining useful life of the asset. The liability is changed at the end of each period to reflect the passage of time (i.e., accretion expense) and changes in the estimated future cash flows underlying the initial fair value measurement. Enterprises are required to adopt Statement No. 143 for fiscal years beginning after June 15, 2002. Anderson Exploration is currently assessing the impact that adoption of this standard would have on the consolidated financial position and results of operations of the Company.

The Financial Accounting Standards Board also recently issued Statement No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. Statement No. 144 will replace previous United States generally accepted accounting principles regarding accounting for impairment of long-lived assets and accounting and reporting for discontinued operations. Enterprises utilizing generally accepted accounting principles of the United States will be required to adopt Statement No. 144 for financial statements issued for periods beginning after December 15, 2001. Anderson Exploration is currently assessing the impact that adoption of this standard would have on the consolidated financial position and results of operations of the Company.

14. SUBSEQUENT EVENTS

On September 6, 2001, Devon Acquisition Corporation, a wholly-owned subsidiary of Devon, submitted an offer to the Company's shareholders to acquire all of the issued and outstanding shares for cash at a price of \$40.00 per share. Upon expiry of the offer on October 12, 2001, 97 percent of the shares of the Company were tendered to the offer. Devon Acquisition Corporation took up and paid for the shares

ANDERSON EXPLORATION LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

tendered to the offer on October 15, 2001. The remaining three percent of the shares outstanding were acquired on October 17, 2001 and Anderson Exploration Ltd. became a wholly-owned subsidiary of Devon Acquisition Corporation. The cost of acquiring the shares, including payments made for vested stock options and share appreciation rights, and repayment of Anderson Exploration's bank credit facilities was financed by a loan of \$5.9 billion from a wholly-owned subsidiary of Devon.

On October 18, 2001, Anderson Exploration and Devon Acquisition Corporation were amalgamated and, on October 25, 2001, the amalgamated company was continued under the Business Corporations Act (Alberta) and changed its name to Devon Canada Corporation.

UNAUDITED PRO FORMA COMBINED FINANCIAL INFORMATION

The following unaudited pro forma combined financial information relates to Devon's acquisition of Anderson completed on October 17, 2001 for approximately \$3.5 billion. The unaudited pro forma combined financial information includes a balance sheet as of September 30, 2001, which assumes the acquisition of Anderson occurred on that date. The unaudited pro forma combined financial information also includes statements of operations for the year ended December 31, 2000 and the nine months ended September 30, 2001, which assume the acquisition occurred on January 1, 2000.

The following unaudited pro forma combined financial information is based on the historical financial statements of Devon and Anderson. The pro forma information is based on the estimates and assumptions set forth in the notes to such information. The pro forma information is preliminary and is being furnished solely for information purposes and, therefore, is not necessarily indicative of the results of operations or financial position that might have been achieved for the dates or periods indicated, nor is it necessarily indicative of the results of operations or financial position that may occur in the future.

Anderson's historical financial information is prepared in accordance with accounting standards generally accepted in Canada, and is presented in Canadian dollars. Anderson's historical volumetric production data is prepared in accordance with the Canadian convention whereby such production data is shown before applicable royalty deductions. Also, Anderson's fiscal year ends on September 30, as opposed to Devon's year-end of December 31. For purposes of providing the pro forma effect of the Anderson acquisition on Devon's financial condition and results of operations, the following adjustments were made to Anderson's historical financial data:

- Anderson's historical results for the year ended September 30, 2000 were converted to results for the year ended December 31, 2000. This conversion was done by subtracting Anderson's historical interim results for the three months ended December 31, 1999 and adding its historical interim results for the three months ended December 31, 2000. Anderson's historical results for the year ended September 30, 2001 were converted to results for the nine months ended September 30, 2001. This conversion was done by subtracting Anderson's historical interim results for the three months ended December 31, 2000.

- Anderson's balance sheet data as of September 30, 2001, and its results of operations for the year ended December 31, 2000 and the nine months ended September 30, 2001, were converted to accounting principles generally accepted in the United States, including the full cost method of accounting for oil and gas properties. Such information was also converted to U.S. dollars using the appropriate exchange rates.

- Anderson's historical volumetric production data was converted to the U.S. convention whereby such production data is shown after applicable royalty deductions.

The information was prepared based on the following:

- Devon will account for the Anderson acquisition using the purchase method of accounting.
- The unaudited pro forma balance sheet has been prepared as if the Anderson acquisition occurred on September 30, 2001. The unaudited pro forma statements of operations have been prepared as if the Anderson acquisition occurred on January 1, 2000.
- In the nine-month period ended September 30, 2001, Devon recognized a \$49.5 million after-tax gain from the cumulative effect of a change in accounting principle. This related to Devon's adoption, as of January 1, 2001, of a new accounting principle related to accounting for derivative financial instruments. The \$49.5 million gain is not included in the unaudited pro forma combined statements of operations for the nine months ended September 30, 2001.
- There is no adjustment to the historical data to reflect annual cost savings of approximately \$25 million that Devon expects to result from the elimination of duplicate expenses after the Anderson acquisition.
- In June 2000, Anderson sold its 50% interest in a pipeline transportation company. For the year ended December 31, 2000, Anderson recognized earnings from discontinued operations, net of tax, of \$44.2 million. This gain is not included in the summary unaudited pro forma combined statements of operations for the year ended December 31, 2000.

No pro forma adjustments have been made with respect to the following unusual items. These items are reflected in the historical results of Devon or Anderson, as applicable, and should be considered when making period-to-period comparisons:

- In 2000, Devon recognized \$60.4 million of expenses related to its merger with Santa Fe Snyder Corporation. Devon accounted for the Santa Fe Snyder merger using the pooling-of-interests method of accounting and, therefore, the expenses incurred related to the merger were expensed. The after-tax effect of these expenses in 2000 was \$37.2 million.
- On May 17, 2000, Anderson acquired all the outstanding shares of Ulster Petroleum Ltd. The summary unaudited pro forma combined statements of operations do not include any results from Ulster's operations prior to May 17, 2000.
- On February 12, 2001, Anderson acquired all of the outstanding shares of Numac Energy Inc. The summary unaudited pro forma combined statements of operations do not include any results from Numac's operations prior to February 12, 2001.
- During the first nine months of 2001, Devon elected to discontinue operations in Malaysia, Qatar, Thailand and on certain properties in Brazil. Accordingly, during the first nine months of 2001, Devon recorded an \$87.9 million charge associated with the impairment of those properties. The after-tax effect of this reduction was \$68.8 million.
- Anderson had compensation plans pursuant to which it periodically issued awards referred to as "share appreciation rights" under which employees could earn compensation based on increases in the market price of Anderson's stock. Anderson awarded these rights in lieu of stock option grants. Pro forma general and administrative expenses reported in the

accompanying unaudited pro forma statements of operations for the year ended December 31, 2000 and the nine months ended September 30, 2001 include \$4.6 million and \$5.6 million, respectively, of expenses related to these plans. After taxes, these plans had the effect of decreasing unaudited pro forma net earnings in the 2000 and 2001 periods by \$2.6 million and \$3.2 million, respectively. Devon acquired all outstanding rights as part of the Anderson acquisition. Accordingly, these rights will not affect the combined company's net earnings subsequent to the closing of the Anderson acquisition.

- Devon's historical results of operations for the year 2000 and the first nine months of 2001 include \$41.3 million and \$25.4 million, respectively, of amortization expense for goodwill related to previous mergers. As of January 1, 2002, in accordance with new accounting pronouncements recently issued, such goodwill will cease to be amortized and, instead, will be tested for impairment at least annually. No goodwill amortization expense has been recognized in the pro forma statements of operations for the goodwill related to the merger and the Anderson acquisition.

NOTES TO UNAUDITED PRO FORMA COMBINED FINANCIAL INFORMATION
DECEMBER 31, 2000 AND SEPTEMBER 30, 2001

1. BASIS OF PRESENTATION

The accompanying unaudited pro forma balance sheet and statements of operations present the pro forma effect of the Anderson acquisition on Devon's historical balance sheet as of September 30, 2001 and Devon's historical statements of operations for the year ended December 31, 2000 and the nine months ended September 30, 2001.

Anderson's historical amounts presented in the accompanying unaudited pro forma balance sheet and statements of operations have been converted to accounting principles generally accepted in the United States and to U.S. dollars. For information on such conversions, see Note 5.

Devon's historical balances for other revenue have been reclassified to include separate line items for gas services revenue and gas services costs and expenses to conform to Devon's expected presentation subsequent to its merger with Mitchell Energy and Development Corp.

All dollar references in the accompanying unaudited pro forma combined financial information and related notes are to U.S. dollars, except that "C\$" refers to Canadian dollars.

2. METHOD OF ACCOUNTING FOR THE ACQUISITION

Devon will account for the Anderson acquisition using the purchase method of accounting for business combinations. Accordingly, Anderson's assets acquired and liabilities assumed by Devon will be revalued and recorded at their estimated "fair values." In the Anderson acquisition, Devon paid C\$40 per share for each outstanding common share, including associated rights, of Anderson. On a pro forma basis, assuming that the Anderson acquisition had occurred on September 30, 2001, this would have resulted in Devon paying approximately \$3.3 billion in cash to Anderson stockholders, as well as an additional \$0.1 billion of cash which would have been paid to Anderson employees for the intrinsic value of outstanding stock options and appreciation rights. These U.S. dollar amounts are based on the September 30, 2001 exchange rate of C\$1.00 to U.S.\$0.6333.

NOTES TO UNAUDITED PRO FORMA COMBINED FINANCIAL INFORMATION -- (CONTINUED)

3. PRO FORMA ADJUSTMENTS RELATED TO THE ANDERSON ACQUISITION

The Devon-Anderson unaudited pro forma balance sheet includes the following adjustments:

(a) This entry adjusts the historical book values of Anderson's assets and liabilities to their estimated fair values as of September 30, 2001. The calculation of the total purchase price and the preliminary allocation to assets and liabilities are shown below.

	(IN THOUSANDS, EXCEPT FOR SHARE PRICE)

Calculation and preliminary allocation of purchase price:	
Number of Anderson common shares outstanding.....	131,693
Acquisition price per share.....	\$ 25.33

Cash to be paid to Anderson stockholders.....	3,336,049
Cash to be paid to settle Anderson employees' stock options and appreciation rights.....	86,921

	3,422,970
Plus estimated acquisition costs to be incurred.....	125,000

Total purchase price.....	3,547,970
Plus fair value of liabilities to be assumed by Devon:	
Current liabilities.....	323,312
Long-term debt.....	861,750
Other long-term liabilities.....	7,075
Fair value of financial instruments.....	32,108
Deferred income taxes.....	1,414,766

Total purchase price plus liabilities assumed.....	\$6,186,981
	=====
Fair value of assets to be acquired by Devon:	
Current assets.....	\$ 145,397
Proved oil and gas properties.....	2,636,077
Unproved oil and gas properties.....	1,317,412
Other property and equipment.....	19,223
Other assets.....	96,115
Goodwill.....	1,972,757

Total fair value of assets to be acquired.....	\$6,186,981
	=====

The total purchase price includes \$125 million of estimated acquisition costs. These costs include investment banking expenses, severance, legal and accounting fees, printing expenses and other merger-related costs. These costs have been added to long-term debt in the Devon-Anderson unaudited pro forma balance sheet.

The purchase price allocation is preliminary and is subject to change due to several factors, including: (1) changes in the fair values of Anderson's assets and liabilities as of the effective time of the Anderson acquisition; (2) the actual acquisition costs incurred; (3) the number of Anderson shares and stock options and appreciation rights outstanding as of the effective time of the Anderson acquisition; and (4) changes in Devon's valuation estimates that may be made between now and the effective time of the Anderson acquisition. These changes will not be known until after the effective time of the Anderson acquisition. However, Devon does not believe that the final purchase price allocation will differ materially from the estimated allocation presented herein.

NOTES TO UNAUDITED PRO FORMA COMBINED FINANCIAL INFORMATION -- (CONTINUED)

(b) This adjustment includes a \$594.4 million reduction of common stock, a \$65.9 million reduction of additional paid-in capital, a \$619.2 million reduction of retained earnings and a \$151.7 million reduction in accumulated other comprehensive loss. These adjustments eliminate the historical book value of Anderson's stockholders' equity.

(c) This adjustment increases long-term debt by \$3.5 billion to include the long-term debt that Devon would have incurred at September 30, 2001, to fund the Anderson acquisition. Of this increase in debt, \$3.0 billion represents borrowings of long-term debt issued on October 3, 2001, with a weighted average fixed rate of 7.4%, including amortization of discounts and related costs. Of this \$3.0 billion, \$1.75 billion is due in 2011 and \$1.25 billion is due in 2031. The remaining \$0.5 billion increase in debt represents borrowings under Devon's \$3 billion, variable interest rate, five-year credit facility entered into on October 12, 2001. Debt under this facility matures between 2003 and 2005.

This adjustment also includes \$31.3 million of costs estimated to be incurred in connection with issuing this debt.

The Devon-Anderson unaudited pro forma statements of operations include the following adjustments:

(d) This adjustment increases historical depreciation, depletion and amortization expense to reflect the adjustment of Anderson's assets from historical book value to fair value. For Anderson's oil and gas producing properties acquired, pro forma depreciation, depletion and amortization expense was calculated using the equivalent units-of-production method. Anderson's proved oil and gas reserves, divided by its annualized production for the first nine months of 2001, yields an estimated reserve life of ten years.

(e) This adjustment increases interest expense due to the \$3.5 billion of long-term debt that Devon would have incurred at September 30, 2001, to fund the Anderson acquisition. This adjustment has been calculated using an average interest rate of 7.4% on the \$3.0 billion of fixed rate debt, and an estimated rate of 3.17%, plus the amortization of estimated financing costs to be incurred, on the \$0.5 billion of variable rate debt. The assumed interest rate on the variable rate debt is based on the terms of Devon's \$3 billion credit facility. The actual rates on this variable rate debt will vary with changes in market rates. A change in the interest rate of 0.125% would change the pro forma interest expense by \$0.8 million.

(f) This adjustment reduces interest expense to reflect the repayment of Anderson's bank debt with debt borrowed under Devon's \$3 billion credit facility that bears a lower interest rate, plus a decrease in interest expense related to the effect of valuing Anderson's fixed-rate debt at the estimated fair value of such debt. The adjustment relating to the repayment of Anderson's bank debt reduced interest expense for the year 2000 and the first nine months of 2001 by \$17.6 million and \$15.2 million, respectively. The adjustment relating to recording Anderson's fixed-rate debt at fair value decreased interest expense for the year 2000 and the first nine months of 2001 by \$2.5 million and \$1.8 million, respectively.

(g) This adjustment reduces the Alberta Royalty Tax Credit as a result of the acquisition of Anderson.

(h) This adjustment records the income tax impact of all pro forma adjustments at an effective tax rate of approximately 43% for the year 2000 and 37% for the nine months ended September 30, 2001. The rate for the first nine months of 2001 includes the effect of a change in Canadian tax rates enacted during the second quarter of 2001. Excluding the retroactive effect of this rate change, the rate applied to the 2001 pro forma adjustments would have been 40%.

4. GOODWILL

The preliminary allocation of the purchase price for the Anderson acquisition includes approximately \$2.0 billion of goodwill. In July 2001, the Financial Accounting Standards Board issued Statement No. 141, "Business Combinations," and Statement No. 142, "Goodwill and Other Intangible Assets." As a result of these two recent pronouncements, goodwill recorded in connection with business combinations completed after June 30, 2001 (including the Anderson acquisition) will not be amortized but, instead, will be tested for impairment at least annually. Accordingly, the Devon-Anderson unaudited pro forma statements of operations included in this note include no amortization of the goodwill to be recorded in the Anderson acquisition.

Statement No. 142 will be adopted by Devon as of January 1, 2002. Until that date, goodwill recognized from business combinations completed prior to June 30, 2001 must continue to be amortized. Therefore, Devon's historical goodwill related to previous mergers has not been reversed in the Devon- Anderson unaudited pro forma statements of operations included in this note. As of January 1, 2002, goodwill related to these previous mergers will no longer be amortized but, instead, will be tested for impairment at least annually. The Devon-Anderson unaudited pro forma statements of operations included in this note for the year ended December 31, 2000 and the nine months ended September 30, 2001 include amortization of goodwill related to previous mergers of \$41.3 million and \$25.4 million, respectively.

As indicated in Note 3, the allocation of the Anderson acquisition purchase price is preliminary. Devon is in the process of finalizing the purchase price allocation. During this process, Devon may determine that there are intangible assets acquired in the Anderson acquisition separate and apart from goodwill. To the extent that such intangible assets, if any, have definite useful lives, the value assigned to those intangible assets would be amortized over such lives. Although the amount allocated to such intangible assets, if any, will not be known until Devon finalizes the purchase price allocation, Devon does not believe that any such value, or the related amortization, would have a material effect on the Devon-Anderson unaudited pro forma financial information presented herein.

5. CONVERSION OF ANDERSON'S HISTORICAL FINANCIAL STATEMENTS

Anderson prepares its historical financial statements based on a fiscal year of September 30. To conform to Devon's year-end of December 31, Anderson's historical results for the year ended September 30, 2000 were converted to results for the year ended December 31, 2000. This conversion was done by subtracting Anderson's historical interim results for the three months ended December 31, 1999 and adding its historical interim results for the three months ended December 31, 2000. Anderson's historical results for the year ended September 30, 2001 were converted to results for the nine months ended September 30, 2001. This conversion was done by subtracting Anderson's historical interim results for the three months ended December 31, 2000.

Anderson prepares its historical financial statements using accounting principles generally accepted in Canada ("Canadian GAAP") and Canadian dollars. The following tables provide information relating to the conversion of Anderson's historical financial statements to those prepared using accounting principles generally accepted in the United States ("U.S. GAAP") and U.S. dollars.

NOTES TO UNAUDITED PRO FORMA COMBINED FINANCIAL INFORMATION -- (CONTINUED)

The following adjustments convert Anderson's Canadian GAAP balance sheet to a U.S. GAAP balance sheet:

- (a) This adjustment reflects the cumulative effect of reductions to the carrying value of Anderson's oil and gas properties using the full cost ceiling limitations set forth by the Securities and Exchange Commission for the full cost method of accounting for oil and gas operations.
- (b) This adjustment reverses foreign exchange losses deferred under Canadian GAAP but required to be included in the determination of earnings under U.S. GAAP.
- (c) This adjustment reflects the impact of the adoption of the liability method of accounting for income taxes under U.S. GAAP.
- (d) This adjustment records the fair value of derivative financial instruments under U.S. GAAP.
- (e) This adjustment reclassifies accrued site restoration costs from other liabilities to accumulated depreciation, depletion and amortization to conform to Devon's presentation.

The following adjustments convert Anderson's Canadian GAAP statements of operating results to U.S. GAAP statements of operating results:

- (f) This adjustment (1) allocates oil, gas and NGL royalty payments to oil, gas and NGL revenues in accordance with U.S. GAAP; (2) reclassifies third party processing revenues from lease operating expenses to gas services revenues and expenses, and freehold mineral taxes from royalties to production taxes, to conform to Devon's presentation; and (3) reclassifies transportation costs which are netted against oil, gas and NGL sales in Anderson's historical results as expenses in accordance with U.S. GAAP.
- (g) This adjustment records the impact of a lower depreciation, depletion and amortization rate for U.S. GAAP as a result of a reduction in carrying value of oil and gas properties which Anderson would have recognized in 1998 due to a U.S. full cost ceiling limitation.
- (h) This adjustment recognizes foreign exchange losses on long-term debt in accordance with U.S. GAAP.
- (i) This adjustment reflects additional depreciation, depletion and amortization resulting from the accounting for the initial adoption of the liability method of accounting for income taxes as an adjustment to property and equipment.
- (j) This adjustment records the impact of changes in the fair value of derivative instruments that do not qualify as hedges under U.S. GAAP.
- (k) This adjustment records the income tax impact of all the U.S. GAAP adjustments described above.

For the September 30, 2001 U.S. GAAP balance sheet, the historical Canadian dollar amounts were converted to U.S. dollars using the September 30, 2001 exchange rate of C\$1.00 to U.S.\$0.6333. For the U.S. GAAP statements of operations for the year ended December 31, 2000 and nine months ended September 30, 2001, Canadian dollars were converted to U.S. dollars using the exchange rates of \$0.6733 and \$0.6501, respectively. Such rates are the averages of the month end exchange rates for the year and nine-month periods.

6. REDUCTION OF CARRYING VALUE OF OIL AND GAS PROPERTIES

Under the full cost method of accounting, the net book value of oil and gas properties less related deferred income taxes (the "cost to be recovered"), may not exceed a calculated "full cost ceiling." The ceiling limitation is the discounted estimated after-tax future net revenues from oil and gas properties. The ceiling is imposed separately by country. In calculating future net revenues, current prices and costs are

NOTES TO UNAUDITED PRO FORMA COMBINED FINANCIAL INFORMATION -- (CONTINUED)

generally held constant indefinitely. The costs to be recovered are compared to the ceiling on a quarterly basis. If the costs to be recovered exceed the ceiling, the excess is written off as an expense, except as discussed in the following paragraph.

If, subsequent to the end of the quarter but prior to the applicable financial statements being published, prices increase to levels such that the ceiling would exceed the costs to be recovered, a write down otherwise indicated at the end of the quarter is not required to be recorded. A write down indicated at the end of a quarter is also not required if the value of additional reserves proved up on properties after the end of the quarter but prior to the publishing of the financial statements would result in the ceiling exceeding the costs to be recovered, as long as the properties were owned at the end of the quarter.

An expense recorded in one period may not be reversed in a subsequent period even though higher oil and gas prices may have increased the ceiling applicable to the subsequent period.

Based on oil and natural gas cash market prices as of September 30, 2001, Devon-Anderson combined's pro forma domestic and Canadian costs to be recovered exceeded the related ceiling values by \$497.5 million, and \$659.9 million, respectively. These after-tax amounts would have resulted in pro forma pre-tax reductions of the carrying values of Devon-Anderson combined's domestic and Canadian oil and gas properties of \$0.8 billion and \$1.1 billion, respectively, in the third quarter of 2001. However, the cash market prices of natural gas increased significantly during the month of October 2001. Based on cash market prices of oil and natural gas as of October 31, 2001, when Devon's consolidated financial statements were published, Devon-Anderson combined's pro forma domestic and Canadian ceilings as of September 30, 2001 exceeded the related costs to be recovered by \$414.2 million and \$370.5 million, respectively. Accordingly, Devon-Anderson combined's pro forma results for the nine months ended September 30, 2001, do not include a related reduction of the carrying value of oil and gas properties. Due to volatility in oil and gas prices and the effect of the Anderson acquisition, and the pending acquisition of Mitchell Energy and Development Corp., there is a possibility that Devon would have to record a reduction in the carrying value of its oil and gas properties as of December 31, 2001 or subsequent periods.

The Devon-Anderson combined pro forma results for the nine months ended September 30, 2001, do include a reduction of the carrying value of oil and gas properties related to Devon's decision to discontinue its operations in Malaysia, Qatar, Thailand and on certain properties in Brazil. After meeting the drilling and capital commitments on these properties, Devon determined that the properties did not meet Devon's internal criteria to justify further investment. Accordingly, during the first nine months of 2001, Devon recorded a pre-tax charge on \$87.9 million (\$68.8 million after-tax) associated with the impairment of these international properties.

NOTES TO UNAUDITED PRO FORMA COMBINED FINANCIAL INFORMATION -- (CONTINUED)

7. SUPPLEMENTAL PRO FORMA INFORMATION ON OIL AND GAS OPERATIONS

The following pro forma supplemental information regarding oil and gas operations is presented pursuant to the disclosure requirements of Statement of Financial Accounting Standards No. 69, "Disclosures About Oil and Gas Producing Activities."

Pro Forma Costs Incurred

The following tables reflect the costs incurred in oil and gas property acquisition, exploration and development activities of Devon, Anderson and Devon-Anderson combined on a pro forma basis, for the year ended December 31, 2000.

	=====	=====	=====	=====	==	=====

Future cash inflows are computed by applying year-end prices to the year-end quantities of proved reserves, except in those instances where fixed and determinable price changes are provided by contractual arrangements in existence at year-end. These year-end prices are adjusted for transportation and other charges, and for geographic differentials. The December 31, 2000 NYMEX oil price and Henry Hub gas price, upon which the combined company's actual net prices were based before relevant adjustments, were \$26.80 per barrel and \$9.23 per Mcf, respectively. Recent prices for oil and gas are substantially less than these December 31, 2000 prices. As of November 27, 2001, the NYMEX oil price was \$19.48 per barrel, and the Henry Hub gas price was \$1.89 per Mcf.
