**Genworth Financial Mortgage Insurance Pty Limited**  
**Notes to Condensed Consolidated Financial Statements**  
**Six Months Ended June 30, 2012 and 2011**  
**(Unaudited)**

**(1) Nature of Business, Formation of Genworth Mortgage and Basis of Presentation**

Genworth Financial Mortgage Insurance Pty Limited (“Genworth Mortgage” or the “Company” as appropriate) offers mortgage insurance products in Australia and is headquartered in Sydney, Australia. In particular, the Company offers primary mortgage insurance, known as “lenders mortgage insurance,” or LMI, and portfolio credit enhancement policies. Until September 2011, Genworth Mortgage also offered LMI in New Zealand. The principal product is LMI, which is generally single premium business and provides 100% coverage of the loan amount in the event of a mortgage default. The nature of the Australian economy is that the majority of mortgages are originated through the country’s top four largest banks; therefore, the Company has a high concentration of business written for mortgages originating through these lenders.

The Company’s condensed consolidated financial statements are unaudited and have been prepared in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”) and rules and regulations of the U.S. Securities and Exchange Commission (“SEC”) disclosure requirements for interim financial information. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete consolidated financial statements. These condensed consolidated financial statements include all adjustments considered necessary by management to present a fair statement of the financial position, results of operations and cash flow for the periods presented. The results reported in these condensed consolidated financial statements should not be regarded as necessarily indicative of results that may be expected for the entire year. The condensed consolidated financial statements included herein should be read in conjunction with the audited financial statements and related notes contained in our 2011 year end financial statements on Form 8-K furnished on March 30, 2012.

The Company’s management has determined that the Company has one reportable operating segment, mortgage insurance.

The condensed consolidated financial statements are presented in U.S. dollars. The accompanying financial statements include Genworth Financial Mortgage Indemnity Limited and are prepared on a consolidated basis. All intercompany transactions have been eliminated in the consolidated financial statements.

Genworth Mortgage was incorporated in Australia on November 10, 2003. Prior to December 2011, Genworth Financial Mortgage Insurance Holdings Pty Limited owned 87% of the issued share capital of the Company and Genworth Financial Services Pty Ltd, which is 100% owned by the same immediate parent of Genworth Financial Mortgage Insurance Holding Pty Limited, owned 13% of the issued share capital of the Company. During December 2011, Genworth Financial Mortgage Insurance Holdings Pty Limited sold its remaining 87% of the issued share capital of the Company to Genworth Financial Services Pty Ltd. The ultimate parent company of Genworth Mortgage is Genworth Financial, Inc. (“Genworth”). Genworth was incorporated in Delaware on October 23, 2003. The Company is the principal operating entity of Genworth’s Australian mortgage insurance business.

**(2) Accounting Pronouncements**

***Recently adopted***

On January 1, 2012, we adopted new accounting guidance requiring presentation of the components of net income (loss), the components of other comprehensive income (loss) (“OCI”) and total comprehensive income either in a single continuous statement of comprehensive income (loss) or in two separate but consecutive statements. We chose to present two separate but consecutive statements and adopted this new guidance retrospectively. The Financial Accounting Standards Board (“FASB”) issued an amendment relating to this new guidance for presentation of the reclassification of items out of accumulated other comprehensive income into net income that removed this requirement until further guidance is issued. The adoption of this new accounting guidance did not have any impact on our consolidated financial results.

---

**Genworth Financial Mortgage Insurance Pty Limited**  
**Notes to Condensed Consolidated Financial Statements**  
**Six Months Ended June 30, 2012 and 2011**  
**(Unaudited)**

On January 1, 2012, we adopted new accounting guidance related to fair value measurements. This new accounting guidance clarified existing fair value measurement requirements and changed certain fair value measurement principles and disclosure requirements. The adoption of this accounting guidance did not have any impact on our consolidated financial statements.

On January 1, 2012, we adopted new accounting guidance related to accounting for costs associated with acquiring or renewing insurance contracts. Acquisition costs include costs that are related directly to the successful acquisition of our insurance policies, which are deferred and amortized in accordance with the expected pattern of risk emergence. These costs include costs incurred in the acquisition, underwriting and processing of new business including printing costs, sales material and, some support costs such as underwriting and contract and policy issuance expenses. Deferred acquisition costs (“DAC”) relating to each underwriting year is charged against revenue over time in accordance with the expected pattern of risk emergence. We adopted this new guidance retrospectively, which reduced retained earnings and stockholders’ equity by \$35 million as of January 1, 2011, and reduced net income (loss) by \$4 million, \$2 million and \$2 million for the years ended December 31, 2011, 2010 and 2009, respectively. This new guidance results in lower amortization and fewer deferred costs, specifically related to underwriting, inspection and processing for contracts that are not issued, as well as advertising and customer solicitation.

***Not Yet Adopted***

In December 2011, the FASB issued new accounting guidance for disclosures about offsetting assets and liabilities. The new guidance requires an entity to disclose information about offsetting and related arrangements to enable users to understand the effect of those arrangements on its financial position. These new disclosure requirements will be effective for us on January 1, 2013 and are not expected to have any impact on our consolidated financial statements.

**Genworth Financial Mortgage Insurance Pty Limited**  
**Notes to Condensed Consolidated Financial Statements**  
**Six Months Ended June 30, 2012 and 2011**  
**(Unaudited)**

**(3) Investments**

*(a) Net Investment Income*

Sources of net investment income were as follows for the periods indicated:

(U.S. dollar amounts in thousands)	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Fixed maturity securities	\$ 39,468	\$ 44,107	\$ 78,600	\$ 85,195
Cash and cash equivalents	7,723	2,901	15,921	5,899
Gross investment income before expenses and fees	47,191	47,008	94,521	91,094
Expenses and fees	(1,025)	(1,247)	(1,887)	(2,477)
Net investment income	\$ 46,166	\$ 45,761	\$ 92,634	\$ 88,617

*(b) Net Investment Gains*

The net investment gains were as follows for the periods indicated:

(U.S. dollar amounts in thousands)	Three months ended June 30,		Six months ended June 30,	
	2012	2011	2012	2011
Available-for-sale investment securities:				
Realized gains on sale	\$ 1,358	\$ 943	\$ 3,560	\$ 1,506
Realized losses on sale	—	—	(1,908)	(226)
Net realized gains (losses) on available-for-sales securities	1,358	943	1,652	1,280
Impairments:				
Total other-than-temporary impairments	—	—	—	—
Portion of other-than-temporary impairments included in other comprehensive income	—	—	—	—
Net other-than-temporary impairments	—	—	—	—
Net investment gains	\$ 1,358	\$ 943	\$ 1,652	\$ 1,280

The Company generally intends to hold securities in unrealized loss positions until they recover. However, from time to time, the intent on an individual security may change, based upon market or other unforeseen developments. In such instances, the Company sells securities in the ordinary course of managing its portfolio to meet diversification, credit quality, yield and liquidity requirements. If a loss is recognized from a sale subsequent to a balance sheet date due to these unexpected developments, the loss is recognized in the period in which the intent to hold the securities to recovery no longer exists. In the three months ended June 30, 2012 and June 30, 2011, there were no securities sold at a loss. The aggregate fair value of securities sold at a loss during the six months ended June 30, 2012 and June 30, 2011 was \$14 million and \$30 million, respectively, which was approximately 88% and 99%, respectively, of book value.

The following table presents the fair values and gross unrealized losses of investment securities, aggregated by investment type and length of time that individual investment securities have been in a continuous unrealized loss position, as of June 30, 2012:

(U.S. dollar amounts in thousands)	Less than 12 months			12 months or more			Total		
	Fair value	Gross unrealized losses	Number of securities	Fair value	Gross unrealized losses	Number of securities	Fair value	Gross unrealized losses	Number of securities
<b>Description of Securities</b>									
Fixed maturity securities:									
Government—non-U.S.	\$ 438	\$ (5)	1	\$ 414	\$ (11)	1	\$ 852	\$ (16)	2
Corporate—U.S.	—	—	—	—	—	—	—	—	—
Corporate—non-U.S.	105,359	(111)	6	43,807	(2,123)	4	149,166	(2,234)	10
Total for securities in an unrealized loss position	<u>\$105,797</u>	<u>\$ (116)</u>	<u>7</u>	<u>\$44,221</u>	<u>\$ (2,134)</u>	<u>5</u>	<u>\$150,018</u>	<u>\$ (2,250)</u>	<u>12</u>
% Below cost—fixed maturity securities:									
<20% Below cost	\$105,797	\$ (116)	7	\$44,221	\$ (2,134)	5	\$150,018	\$ (2,250)	12
Total for securities in an unrealized loss position	<u>\$105,797</u>	<u>\$ (116)</u>	<u>7</u>	<u>\$44,221</u>	<u>\$ (2,134)</u>	<u>5</u>	<u>\$150,018</u>	<u>\$ (2,250)</u>	<u>12</u>
Investment grade	\$105,797	\$ (116)	7	\$44,221	\$ (2,134)	5	\$150,018	\$ (2,250)	12
Below investment grade	—	—	—	—	—	—	—	—	—
Total for securities in an unrealized loss position	<u>\$105,797</u>	<u>\$ (116)</u>	<u>7</u>	<u>\$44,221</u>	<u>\$ (2,134)</u>	<u>5</u>	<u>\$150,018</u>	<u>\$ (2,250)</u>	<u>12</u>

As indicated in the table above, all of the securities in a continuous unrealized loss position for less than 12 months were investment grade and less than 20% below cost. These unrealized losses were primarily attributable to credit spreads that have widened since acquisition for corporate securities primarily in the finance and insurance and consumer non-cyclical sectors. For securities that have been in a continuous unrealized loss for less than 12 months, the average fair value percentage below cost was approximately 1% as of June 30, 2012.

*Fixed Maturity Securities In A Continuous Unrealized Loss Position For 12 Months Or More*

Of the \$2 million of unrealized losses on fixed maturity securities in a continuous unrealized loss for 12 months or more that were less than 20% below cost, the weighted-average rating was “BBB” and 100% were investment grade as of June 30, 2012. These unrealized losses were attributable to the widening of credit spreads for these securities since acquisition, primarily associated with corporate securities in the finance and insurance sector. The average fair value percentage below cost for these securities was approximately 5% as of June 30, 2012.

We expect our investments in corporate securities will continue to perform in accordance with our expectations about the amount and timing of estimated cash flows. Although we do not anticipate such events, it is at least reasonably possible that issuers of our investments in corporate securities will perform worse than current expectations. Such events may lead us to recognize potential future write-downs within our portfolio of corporate securities.

Given the current market conditions, including current financial industry events and uncertainty around global economic conditions, the fair value of these securities has declined due to credit spreads that have widened since acquisition. In our examination of these securities, we considered all available evidence, including the issuers’ financial condition and current industry events to develop our conclusion on the amount and timing of cash flows expected to be collected. Based on this evaluation, we determined that the unrealized losses on these securities represented temporary impairments as of June 30, 2012.

The scheduled maturity distribution of fixed maturity securities as of June 30, 2012 is set forth below. Actual maturities may differ from contractual maturities because issuers of securities may have the right to call or prepay obligations with or without call or prepayment penalties.

(U.S. dollar amounts in thousands)	Amortized cost or cost	Fair value
Due one year or less	\$ 291,985	\$ 294,748
Due after one year through five years	1,871,359	1,952,683
Due after five years through ten years	685,204	734,053
Due after ten years	23,512	23,724
Subtotal	2,872,060	3,005,208
Residential mortgage-backed securities	49,654	49,654
Total	<u>\$2,921,714</u>	<u>\$3,054,862</u>

As of June 30, 2012, \$23 million of investments were subject to certain call provisions. Typically, call provisions provide the issuer the ability to redeem a security, prior to its stated maturity, at or above par.

*(e) Investment Concentrations*

As of June 30, 2012, securities issued by finance and insurance industry groups and foreign state government represented approximately 19% and 31%, respectively, of the corporate fixed maturity securities portfolio held by the Company.

As of June 30, 2012, the Company held \$256 million in corporate fixed maturity securities issued by the New South Wales Treasury Corporation and \$267 million in corporate fixed maturity securities issued by the Queensland Treasury Corporation, which comprised 12% and 13%, respectively, of total stockholders' equity. No other single issuer exceeded 10% of total stockholders' equity.

**(4) Fair Value Measurements**

*Recurring Fair Value Measurements*

We have fixed maturity securities which are carried at fair value. Below is a description of the valuation techniques and inputs used to determine fair value by class of instrument.

*Fixed maturity securities*

The valuations of fixed maturity securities are determined using a market approach, income approach or a combination of the market and income approach depending on the type of instrument and availability of information.

We utilize certain third-party data providers when determining fair value. We consider information obtained from third-party pricing services ("pricing services") as well as third-party broker provided prices, or broker quotes, in our determination of fair value. Additionally, we utilize internal models to determine the valuation of securities using an income approach where the inputs are based on third-party provided market inputs. While we consider the valuations provided by pricing services and broker quotes, management determines the fair value of our investment securities after considering all relevant and available information. We also use various methods to obtain an understanding of the valuation methodologies and procedures used by third-party data providers to ensure sufficient understanding to evaluate the valuation data received, including an understanding of the assumptions and inputs utilized to determine the appropriate fair value. Additionally, we evaluate significant changes in fair value each month to further aid in our review of the accuracy our fair value measurements and understanding of changes in fair value, where more detailed reviews are performed by the asset managers responsible for the related asset class associated with the security being reviewed.

In general, we first obtain valuations from pricing services. If a price is not supplied by a pricing service, we will typically seek a broker quote. For certain private fixed maturity securities where we do not obtain valuations from pricing services, we utilize an internal model to determine fair value since transactions for identical securities are not readily observable and these securities are not typically valued by pricing services. For all securities, excluding certain private fixed maturity securities, if neither a pricing service nor broker quote valuation is available, we determine fair value using internal models.

For pricing services, we obtain an understanding of the pricing methodologies and procedures for each type of instrument. In general, a pricing service does not provide a price for a security if sufficient information is not readily available to determine fair value or if such security is not in the specific sector or class covered by a particular pricing service. Given our understanding of the pricing methodologies and procedures of pricing services, the securities valued by pricing services are typically classified as Level 2 unless we determine the valuation process for a security or group of securities utilizes significant unobservable inputs, which would result in the valuation being classified as Level 3.

For private fixed maturity securities, we utilize an internal model to determine fair value and utilize public bond spreads by sector, rating and maturity to develop the market rate that would be utilized for a similar public bond. We then add an additional premium, which represents an unobservable input, to the public bond spread to adjust for the liquidity and other features of our private placements. We utilize the estimated market yield to discount the expected cash flows of the security to determine fair value. In certain instances, we utilize price caps for securities where the estimated market yield results in a valuation that may exceed the amount that would be received in a market transaction. We assign each security an internal rating to determine the appropriate public bond spread that should be utilized in the valuation. While we generally consider the public bond spreads by sector and maturity to be observable inputs, we evaluate the similarities of our private placement with the public bonds, any price caps utilized and whether external ratings are available for our private placement to determine whether the spreads utilized would be considered observable inputs. During the second quarter of 2012, we began classifying private securities without an external rating as Level 3. In general, increases (decreases) in credit spreads will decrease (increase) the fair value for our fixed maturity securities. To determine the significance of unobservable inputs, we calculate the impact on the valuation from the unobservable input and will classify a security as Level 3 when the impact on the valuation exceeds 10%.

**Genworth Financial Mortgage Insurance Pty Limited**  
**Notes to Condensed Consolidated Financial Statements**  
**Six Months Ended June 30, 2012 and 2011**  
**(Unaudited)**

For broker quotes, we consider the valuation methodology utilized by the third party, but the valuation typically includes significant unobservable inputs. Accordingly, we classify the securities where fair value is based on our consideration of broker quotes as Level 3 measurements.

For remaining securities priced using internal models, we maximize the use of observable inputs but typically utilize significant unobservable inputs to determine fair value. Accordingly, the valuations are typically classified as Level 3.

The following table summarizes the primary sources considered when determining fair value of each class of fixed maturity securities as of June 30, 2012:

<u>(U.S. dollar amounts in thousands)</u>	<u>Total</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>

Realized and unrealized gains (losses) on Level 3 assets and liabilities are primarily reported in either net investment gains within the consolidated statements of income or OCI within stockholders' equity based on the appropriate accounting treatment for the instrument.

Purchases, sales, issuances and settlements represent the activity that occurred during the period that results in a change of the asset or liability but does not represent changes in fair value for the instruments held at the beginning of the period. Such activity consists of purchases and sales of fixed maturity securities.

The amount presented for unrealized gains (losses) for assets still held as of the reporting date primarily represents accretion on certain fixed maturity securities which were recorded in net investment gains.

Certain classes of instruments classified as Level 3 are excluded below as a result of not being material or due to limitations in being able to obtain the underlying inputs used by certain third-party sources, such as broker quotes, used as an input in determining fair value. The following table presents a summary of the significant unobservable inputs used for certain fair value measurements that are based on internal models and classified as Level 3 as of June 30, 2012:

(U.S. dollar amounts in thousands)	Fair value	Unobservable input	Range
<b>Assets</b>			
Fixed maturity securities:			
Residential mortgage-backed securities	\$49,654	Credit spreads	50bps – 100bps

**Six Months Ended June 30, 2012 and 2011**  
(Unaudited)

**(5) Reserve for Losses and Loss Adjustment Expenses**

The following table sets forth changes in the reserve for losses and loss adjustment expenses for the dates indicated:

(U.S. dollar amounts in thousands)	As of or for the six months ended June 30,	
	2012	2011
Balance as of January 1	\$ 272,028	\$ 205,934
Incurred related to insured events of:		
Current year	116,648	116,080
Prior years	74,672	(26,896)
Total incurred	<u>191,320</u>	<u>89,184</u>
Paid related to insured events of:		
Current year	(3,363)	(5,674)
Prior years	(137,914)	(52,250)
Total paid	<u>(141,277)</u>	<u>(57,924)</u>
Impact of foreign currency translation	(2,208)	11,073
Balance as of June 30	<u>\$ 319,863</u>	<u>\$ 248,267</u>

For the six months ended June 30, 2012, total incurred losses increased \$102 million, primarily driven by reserve strengthening of \$82 million in the first quarter of 2012 to reflect an adverse change in frequency and severity experience. The reserve strengthening was the result of higher than anticipated frequency and severity of claims paid from later stage delinquencies from prior years, particularly in coastal tourism areas of Queensland as a result of regional economic pressures, as well as our 2007 and 2008 vintages which have a higher concentration of self-employed borrowers. The increase in prior year reserves of \$75 million was primarily attributable to the reserve strengthening in the first quarter of 2012 and from the aging of delinquencies, partially offset by lower new delinquencies in the current year.

For the six months ended June 30, 2011, \$27 million was released from prior year reserves primarily driven by realized benefits from our ongoing loss mitigation activities.

Paid claims also increased in the current year as a result of an increase in both the number of claims and the average claim payment as we experienced a higher rate of conversion from later stage delinquency to claim.

**(6) Securitization Entities**

Part of the Company's product offering includes portfolio credit enhancement policies to Australian regulated lenders that have originated housing loans for securitization in the Australian, European and U.S. markets. Portfolio mortgage insurance serves as an important form of credit enhancement for the Australian securitization market and the Company's portfolio credit enhancement coverage is generally purchased for low loan-to-value, seasoned loans written by regulated institutions.

As of June 30, 2012 and December 31, 2011, the Company had a maximum exposure to loss from the provision of portfolio credit enhancement to securitization trusts sponsored by third parties of \$154 million and \$172 million, respectively. The exchange rate for calculating the maximum exposure to loss of translating the Australian dollar into the U.S. dollar as of June 30, 2012 and December 31, 2011 was \$1.02. This exposure was calculated based on the expectation of a 1 in 250 year event. The Company has applied the Australian Prudential Regulation Authority ("APRA") stress scenario to calculate this exposure. The Company holds sufficient capital resources to meet this obligation were it to occur.

**(Unaudited)**

**(7) Statutory Accounting**

The Company prepares financial statements for its regulator, APRA, in accordance with the accounting practices prescribed by the regulator, which is a comprehensive basis of accounting other than U.S. GAAP.

The balance sheet is recorded under Australian accounting standards and a prudential adjustment is made to derive the APRA capital base, being the tax-effected difference between the insurance liabilities under APRA and Australian accounting standards.

The Company's APRA net income after tax, capital base, minimum capital requirement and solvency ratio were as follows as of and for the year ended December 31:

<u>(U.S. dollar amounts in thousands)</u>	<u>2011</u>
APRA net income after tax	<u>\$ 259,132</u>
APRA capital base	\$2,414,629
APRA minimum capital requirement	\$1,544,272
APRA solvency ratio	1.56

The above APRA net income after tax, capital base, minimum capital requirement and solvency ratio are the combined amounts of Genworth Financial Mortgage Insurance Pty Limited and its wholly-owned subsidiary, Genworth Financial Mortgage Indemnity Limited.

Under the prudential regulation framework in Australia, mortgage insurers are required to establish a catastrophic risk charge defined as a 1 in 250 year event. APRA specifies a formula to quantify this event. The Company is required to maintain adequate capital to fund this charge, in addition to normal insurance liabilities, by ensuring that its capital base exceeds its minimum capital requirement at all times.

As of June 30, 2012, the APRA solvency ratio was 1.62.

In February 2012, the Company amended the reinsurance agreements with Genworth Mortgage Insurance Corporation ("GEMICO") and Brookfield Life Assurance Company Limited ("Brookfield"), affiliated companies, whereby Brookfield assumed obligations from GEMICO with respect to an additional layer of private mortgage guarantee insurance. The amendment was effective January 1, 2012 and approved by the North Carolina Department of Insurance in February 2012. The Company also renewed and expanded its external reinsurance program with a group of non-affiliated reinsurers with coverage effective January 1, 2012. Consistent with the Company's capital management plan of obtaining external reinsurance to replace internal reinsurance, the Company terminated its reinsurance agreement with GEMICO, effective July 2012 which will lower the capital ratio but remain in compliance with regulatory requirements.

The Company's ability to pay dividends to Genworth Financial Mortgage Insurance Holdings Pty Limited is allowable if the following apply:

- the Company's assets exceed its liabilities immediately before the dividend is declared and the excess is sufficient for the payment of the dividend;
- it is fair and reasonable to the Company's shareholders as a whole; and
- it does not materially prejudice the Company's ability to pay its creditors.

Any dividend above four preceding quarters' earnings requires prior approval from APRA. In addition, any dividend payment must result in the Company continuing to meet the APRA minimum capital requirement.

**(9) Planned Minority Initial Public Offering**

On April 17, 2012, Genworth, the Company's ultimate parent, announced a new timeframe for completing its planned minority initial public offering ("IPO") of up to 40% of its Australian mortgage insurance business, which was originally expected to occur during 2012. Genworth is now targeting completion of the IPO in early 2013, subject to market conditions, valuation considerations including business performance, and regulatory approvals.

**(10) Likely Developments**

On April 20, 2012, Moody's Investors Service ("Moody's") placed our Australian mortgage insurance business on review for possible downgrade following our announcement regarding an anticipated net operating loss in this business in the first quarter of 2012 as a result of the elevated loss experience and higher claims incidence and severity. Subsequently, Moody's extended the review period to align it with its review of the overall mortgage insurance industry and, on July 18, 2012, announced that its review of Australian mortgage insurers would not be finalized until Moody's draft Global Methodology for Rating Mortgage Insurers is finalized.
