### Management Commentary

“In 2015 we carved out a solid position for our new technology solutions, generated more than a million dollars of new sales from innovative technology-enabled services, and drove impressive growth in our Archiving and Information Management business,” said K. “Suri” Suriyakumar, Chairman, President and CEO of ARC Document Solutions. “Our team also generated a consolidated gross margin of nearly 35 percent, paid down more than 10 percent of our senior debt obligations, generated strong cash flows and healthy EBITDA performance, and created the opportunity to produce strong returns on a share repurchase program. All of this was done in the face of our traditional business being challenged due to secular headwinds and a continuing industry trend toward reducing print.”

“As we look at the next 24 to 36 months,” said Mr. Suriyakumar, “we expect to deliver excellent cash generation, healthy gross margin performance, and continuing improvements to our capital structure as we capture new business, gain traction with our new business lines, and build upon them to offset the slow declines in our traditional business. We’re building a new business, and as we do so, we believe our investors will recognize the fundamental value of our transformation.”

### 2015 Fourth Quarter Supplemental Information:

Net sales were \$104.5 million , a 2.8% decrease compared to the fourth quarter of 2014 .

Days sales outstanding in Q4 2015 and 2014 were 52 .

AEC customers comprised approximately 77% of our total net sales, while non-AEC customers made up 23% of our total net sales.

The number of MPS accounts has grown to approximately 9,000 , a gain of approximately 500 contracts over Q4 2014 .

<sup>(1)</sup> On February 1, 2013, we filed a civil complaint against a competitor and a former employee in the Superior Court of California for Orange County, which alleged, among other claims, the misappropriation of ARC trade secrets; namely, proprietary customer lists that were used to communicate with ARC customers in an attempt to unfairly acquire their business. In prior litigation with the competitor based on related facts, in 2007 the competitor entered into a settlement agreement and stipulated judgment, which included an injunction. We instituted this suit to stop the defendant from using similar unfair business practices against us in the Southern California market. The case proceeded to trial in May 2014, and a jury verdict was entered for the defendants. In the first quarter of 2015, we entered into a settlement and paid the defendant. Legal fees associated with the litigation were recorded as selling, general and administrative expense.

**Non-GAAP Financial Measures.**

EBIT, EBITDA and related ratios presented in this report are supplemental measures of our performance that are not required by or presented in accordance with accounting principles generally accepted in the United States of America ("GAAP"). These measures are not measurements of our financial performance under GAAP and should not be considered as alternatives to net income, income from operations, or any other performance measures derived in accordance with GAAP or as an alternative to cash flows from operating, investing or financing activities as a measure of our liquidity.

EBIT represents net income before interest and taxes. EBITDA represents net income before interest, taxes, depreciation and amortization. EBIT margin is a non-GAAP measure calculated by dividing EBIT by net sales. EBITDA margin is a non-GAAP measure calculated by dividing EBITDA by net sales.

We have presented EBIT, EBITDA and related ratios because we consider them important supplemental measures of our performance and liquidity. We believe investors may also find these measures meaningful, given how our management makes use of them. The following is a discussion of our use of these measures.

We use EBIT and EBITDA to measure and compare the performance of our operating segments. Our operating segments' financial performance includes all of the operating activities except debt and taxation which are managed at the corporate level for U.S. operating segments. As a result, we believe EBIT is the best measure of operating segment profitability and the most useful metric by which to measure and compare the performance of our operating segments. We use EBITDA to measure performance for determining

consolidated-level compensation. In addition, we use EBIT and EBITDA to evaluate potential acquisitions and potential capital expenditures.

EBIT, EBITDA and related ratios have limitations as analytical tools, and should not be considered in isolation, or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are as follows:

- They do not reflect our cash expenditures, or future requirements for capital expenditures and contractual commitments;
- They do not reflect changes in, or cash requirements for, our working capital needs;
- They do not reflect the significant interest expense, or the cash requirements necessary, to service interest or principal payments on our debt;
- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and EBITDA does not reflect any cash requirements for such replacements; and
- Other companies, including companies in our industry, may calculate these measures differently than we do, limiting their usefulness as comparative measures.

Because of these limitations, EBIT, EBITDA, and related ratios should not be considered as measures of discretionary cash available to us to invest in business growth or to reduce our indebtedness. We compensate for these limitations by relying primarily on our GAAP results and using EBIT, EBITDA and related ratios only as supplements.

Our presentation of adjusted net income, adjusted EBITDA, and adjusted cash flows from operations over certain periods is an attempt to provide meaningful comparisons to our historical performance for our existing and future investors. The unprecedented changes in our end markets over the past several years have required us to take measures that are unique in our history and specific to individual circumstances. Comparisons inclusive of these actions make normal financial and other performance patterns difficult to discern under a strict GAAP presentation. Each non-GAAP presentation, however, is explained in detail in the reconciliation tables above. For more information, see our 2014 Annual Report on Form 10-K.

Specifically, we have presented adjusted net income attributable to ARC and adjusted earnings per share attributable to ARC shareholders for the three and twelve months ended December 31, 2015 and 2014 to reflect the exclusion of loss on extinguishment of debt, restructuring expense, trade secret litigation costs, and changes in the valuation allowances related to certain deferred tax assets and other discrete tax items. We have presented adjusted cash flows from operating activities for the three and twelve months ended December 31, 2015 and 2014 to reflect the exclusion of cash payments related to trade secret litigation costs and cash payments related to restructuring expenses. This presentation facilitates a meaningful comparison of our operating results for the three and twelve months ended December 31, 2015 and 2014. We believe these charges were the result of the current macroeconomic environment, our capital restructuring, or other items which are not indicative of our actual operating performance.

We have presented adjusted EBITDA for the three and twelve months ended December 31, 2015 and 2014 to exclude loss on extinguishment of debt, trade secret litigation costs, stock-based compensation expense, and restructuring expense. The adjustment of EBITDA for these items is consistent with the definition of adjusted EBITDA in our credit agreement; therefore, we believe this information is useful to investors in assessing our financial performance.
